R 1.1

Shower Door Installation Instructions

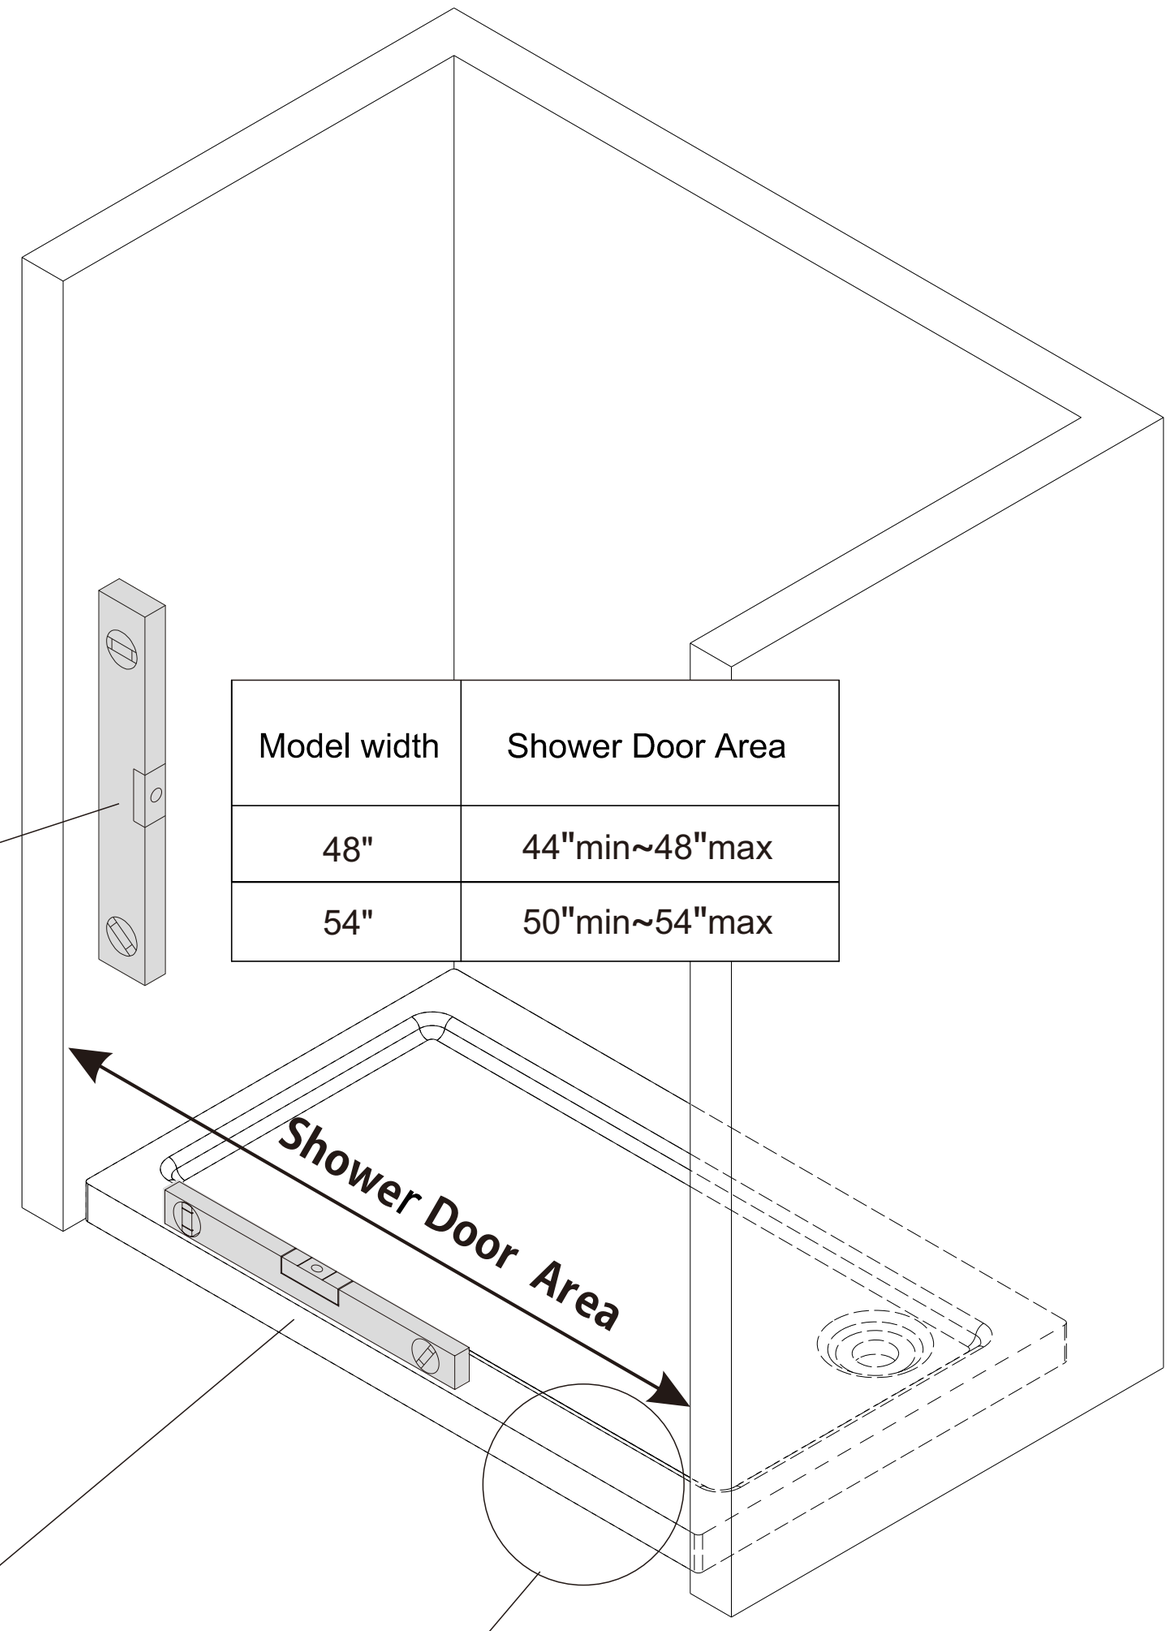

Please do not return the product to the store.
Contact us with any questions.

Model Specific Preparation

REQUIRED:

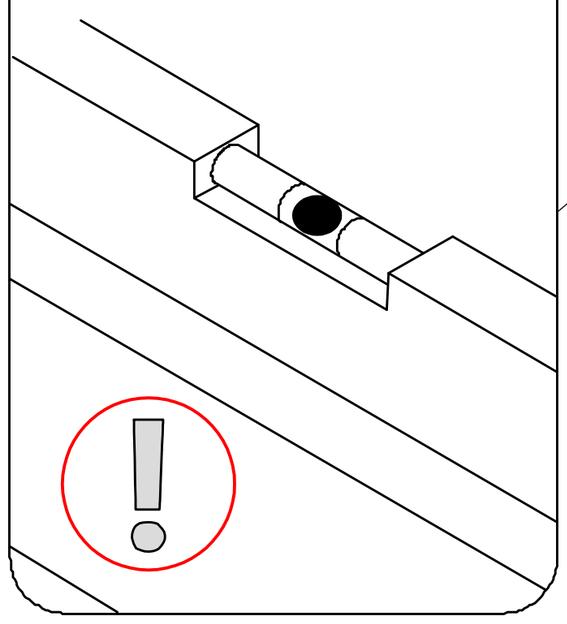

Verify threshold and wall with a level.

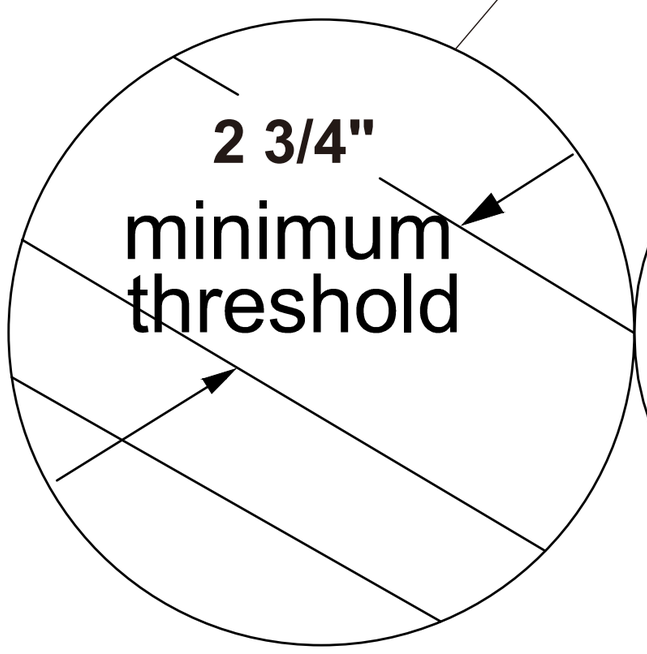

1/4"(6mm) Maximum out of plumb adjustment from top to bottom

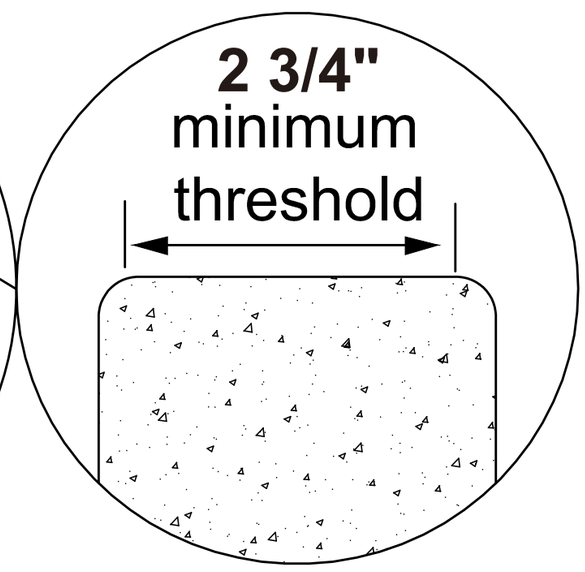

Model width	Shower Door Area
48"	44"min~48"max
54"	50"min~54"max

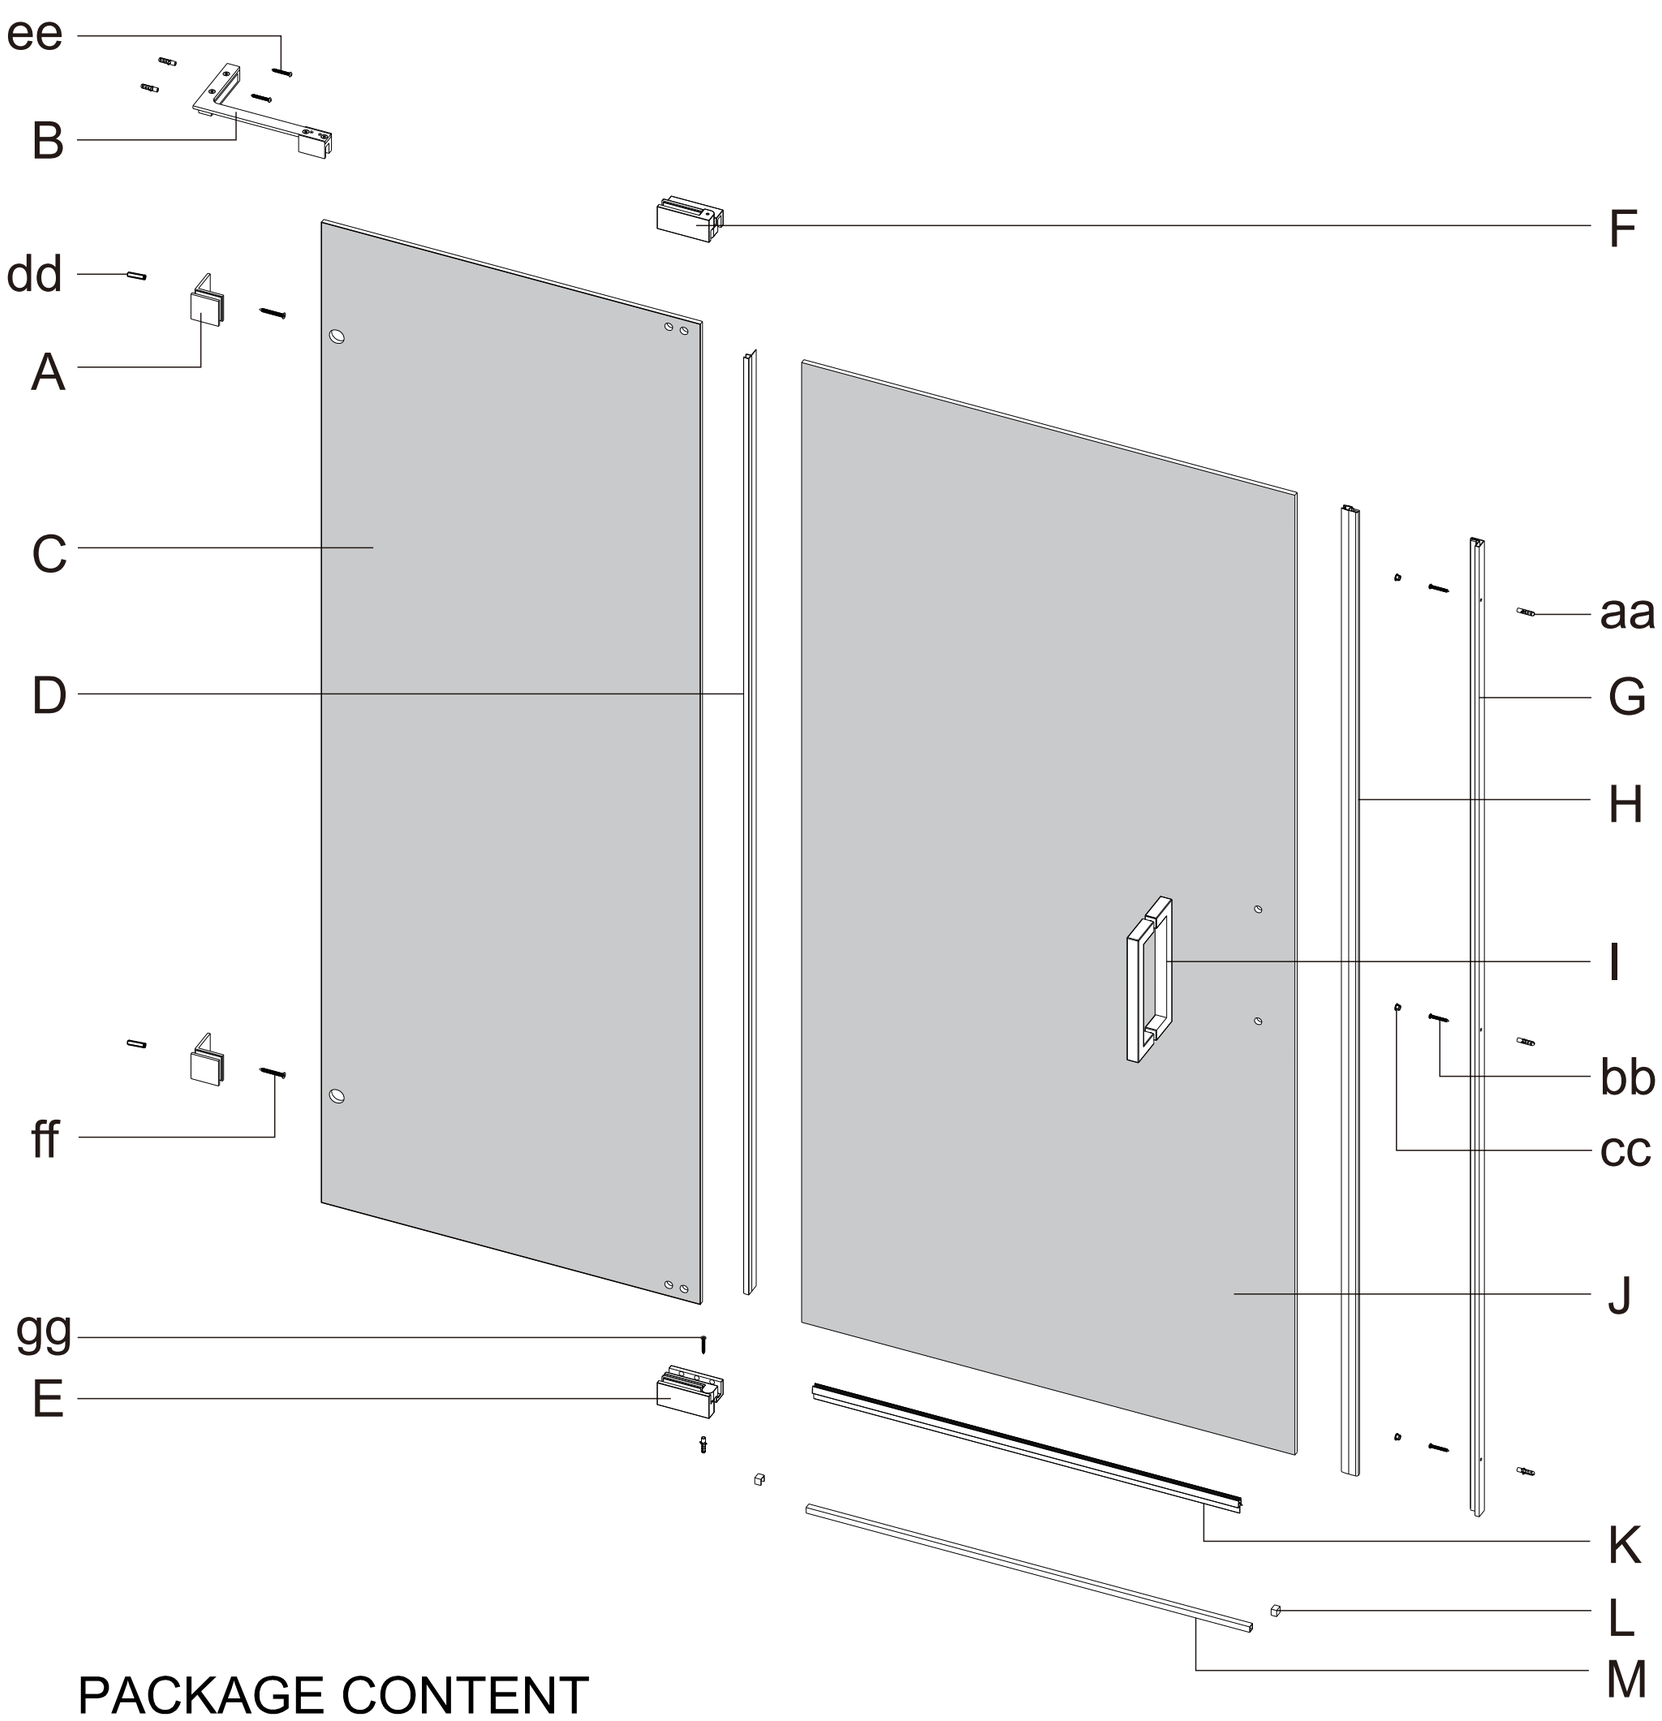

Threshold must be level.

TOOLS REQUIRED

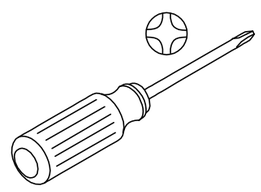

Drill Bits

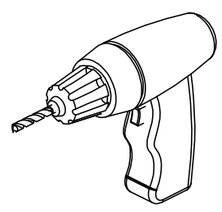

Ø1/8" & Ø1/4" (3&6mm) dia.

HSS

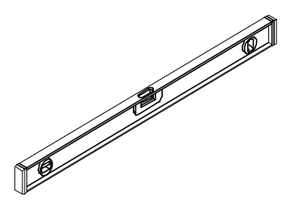

Phillips screw driver

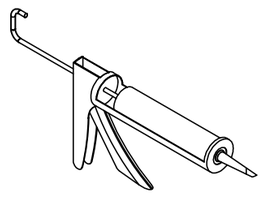

Electric hand drill

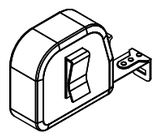

Level

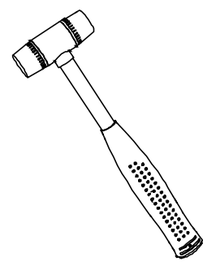

Caulkinggun

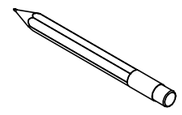

Measuring Tape

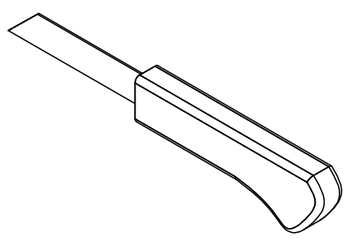

Soft Head Hammer

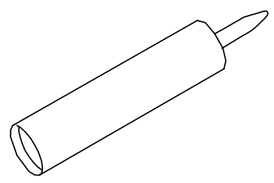

Marking Pencil

Utility Knife

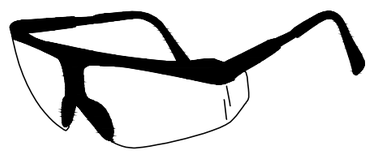

Sealant

MASONRY DRILL BIT FOR TILE Ø6mm

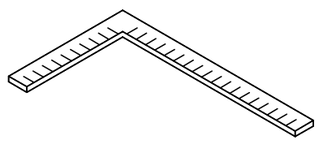

Safety Glasses

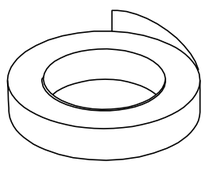

Gloves

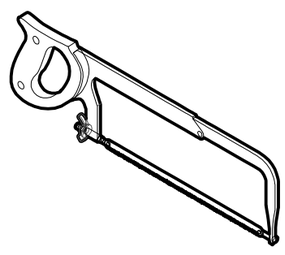

Carpenter's Squarer

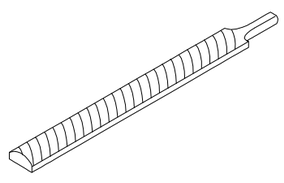

Masking or painter's tape

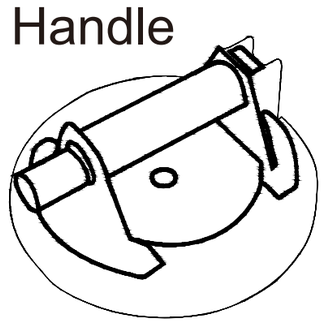

Hack Saw

Metal File

Glass suction Handle

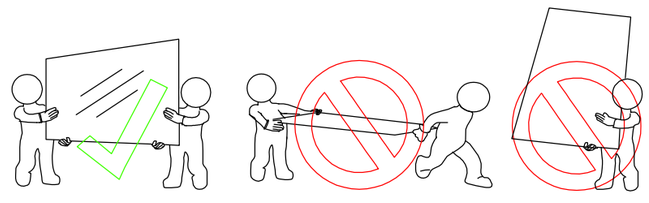

SAFETY INFORMATION

CAUTION

Please carefully read the following important safety information before handling or installing this shower door . There is a risk of serious injury while handling this product. To minimize these risks, please note:

- Always wear safety glasses and gloves while handling.
- Always follow the installation instructions.
- Inspect glass for damage before installation.
- Extreme caution should be taken while handling the glass during installation as the tempered glass may shatter if in contact with a hard surface.
- Do not cut or modify the tempered glass as it will shatter if cut.
- Carefully remove product from packaging and keep packaging until installation is complete.
- Inspect all parts for damage or missing; if there is damage or part missing to the unit prior to installation, please contact customer service at the number provided in this guide.
- Cover the drain with tape to prevent the loss of small parts.
- The shower base and finished walls should be installed before beginning the shower door installation.
- During the installation,protect the shower floor with a drop cloth to avoid damage.
- This product should be installed by two people who are familiar with construction requirements.Professional installation is recommended!
- Keep this installation manual for future reference.

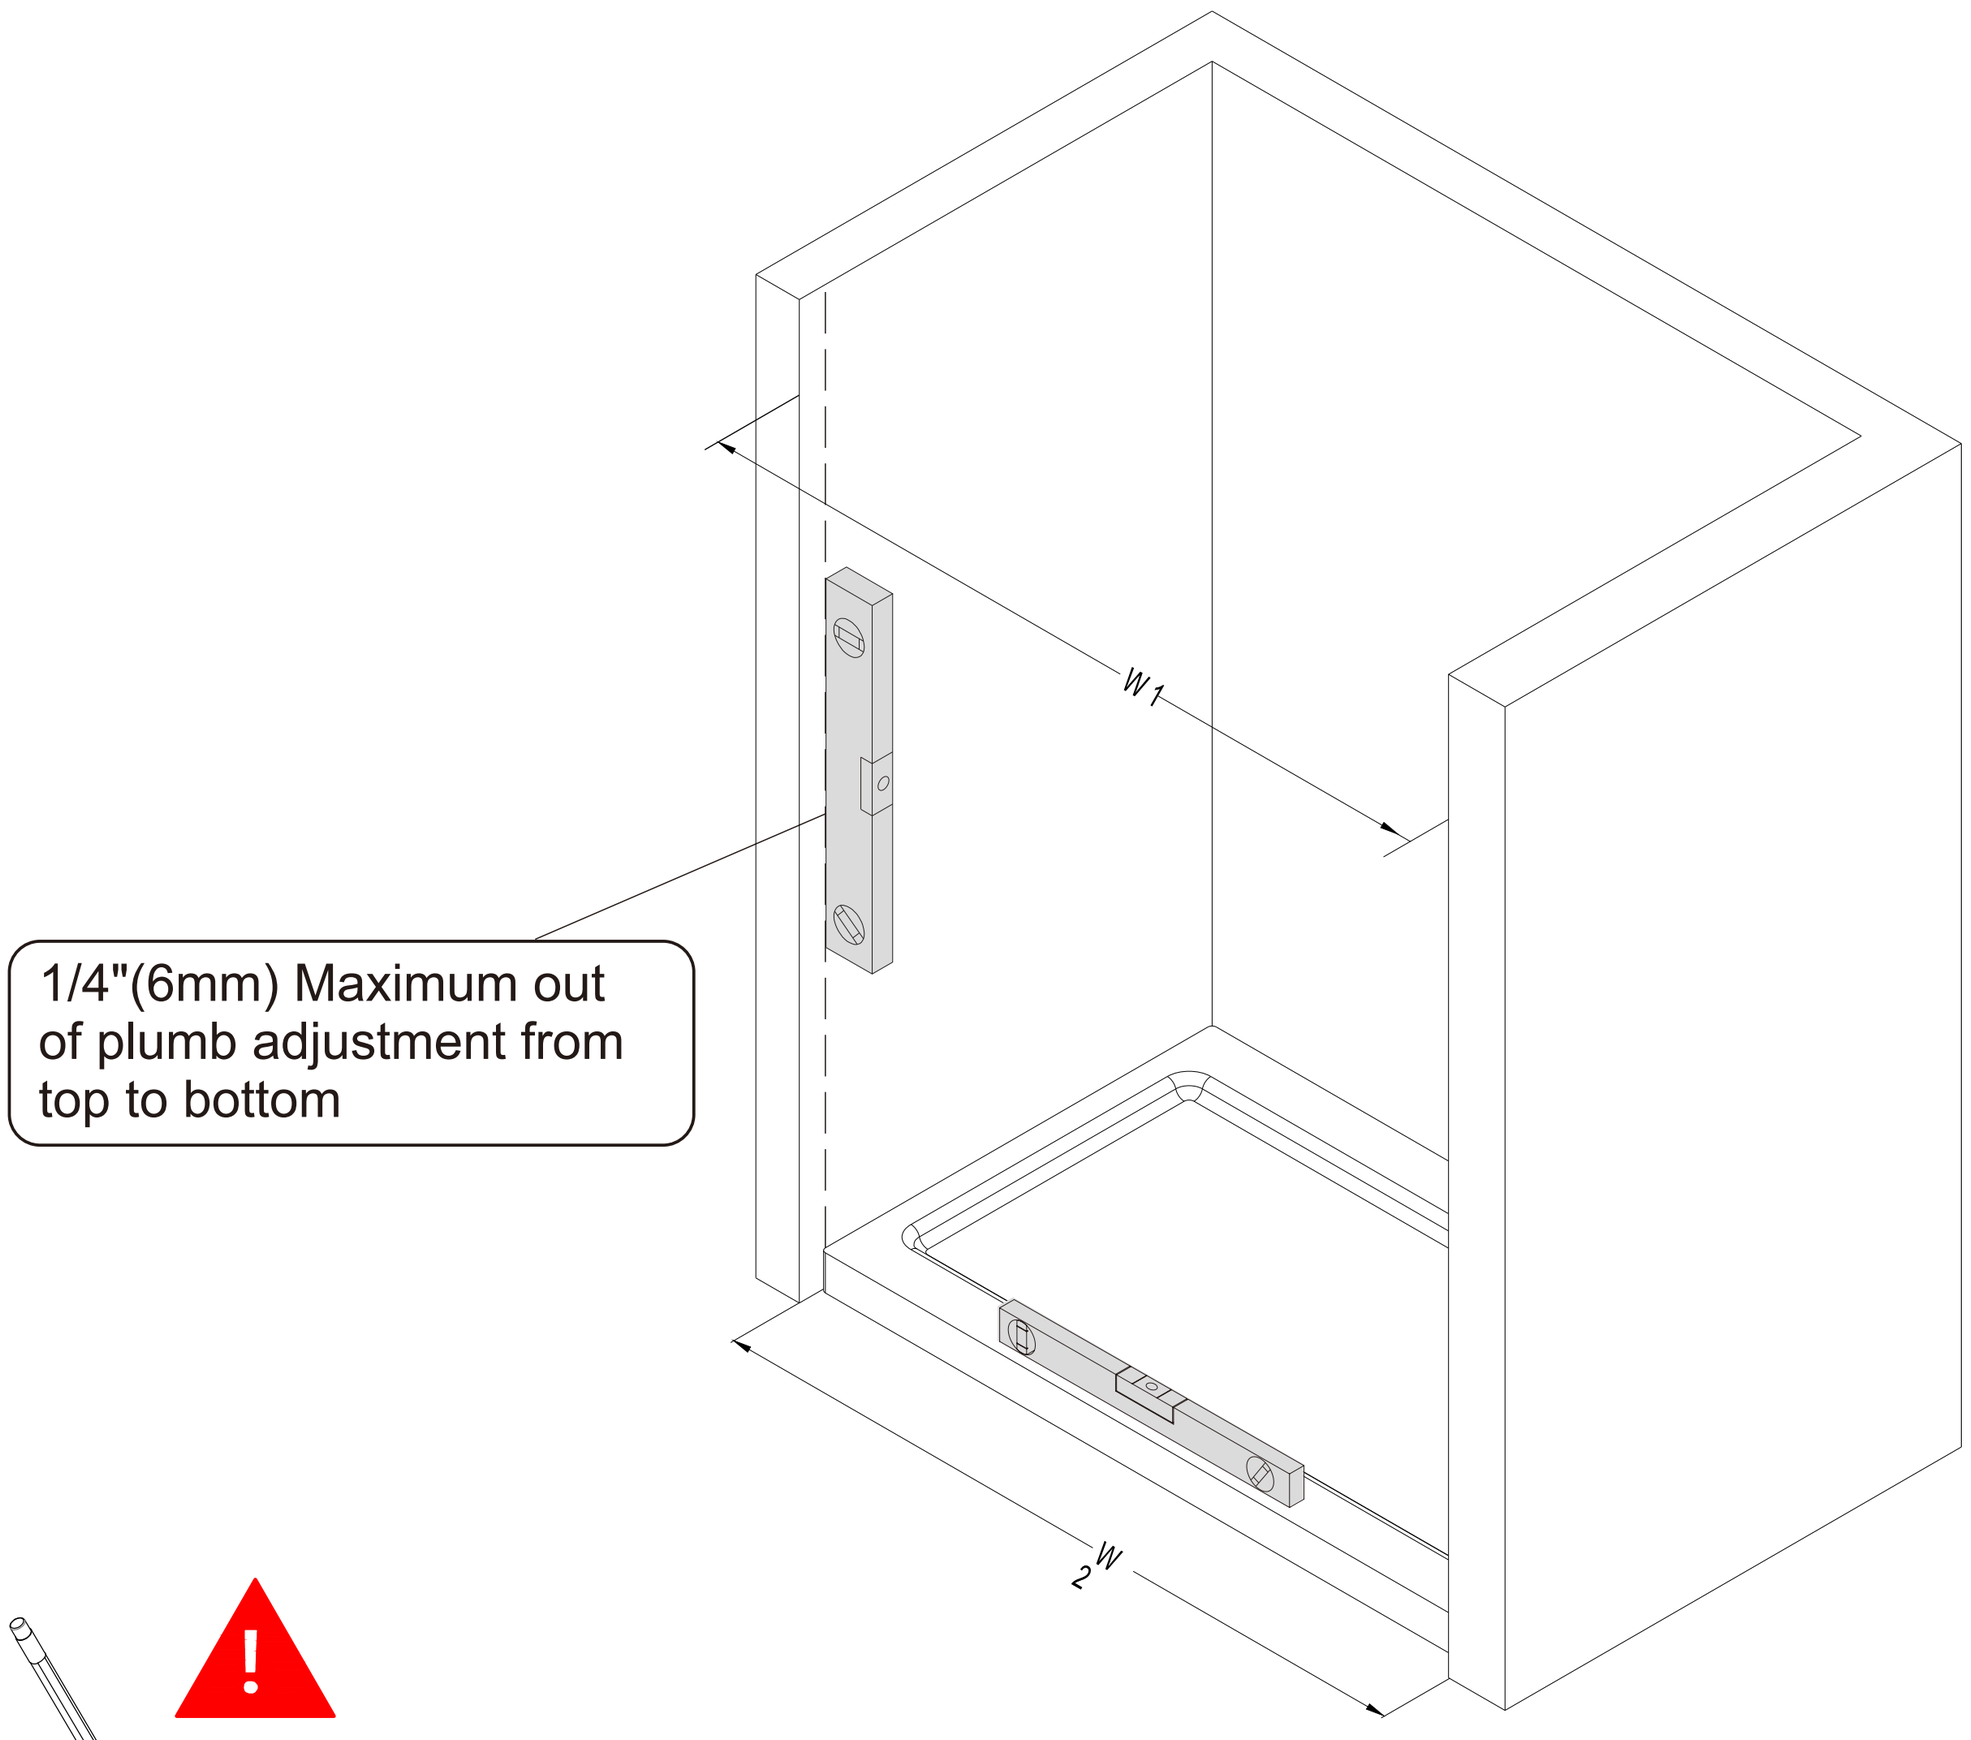

NOTE: Two people should perform this installaton.

1 Measure the finished opening width.

NOTE

1.Measure the finished opening width at the bottom and at the model height.
Use these dimensions as “W1” (top) and “W2”(bottom) in step #2.
2.Also check the threshold for level and the walls for plumb.

1/4"(6mm) Maximum out of plumb adjustment from top to bottom

_____ Finished opening top (W1)

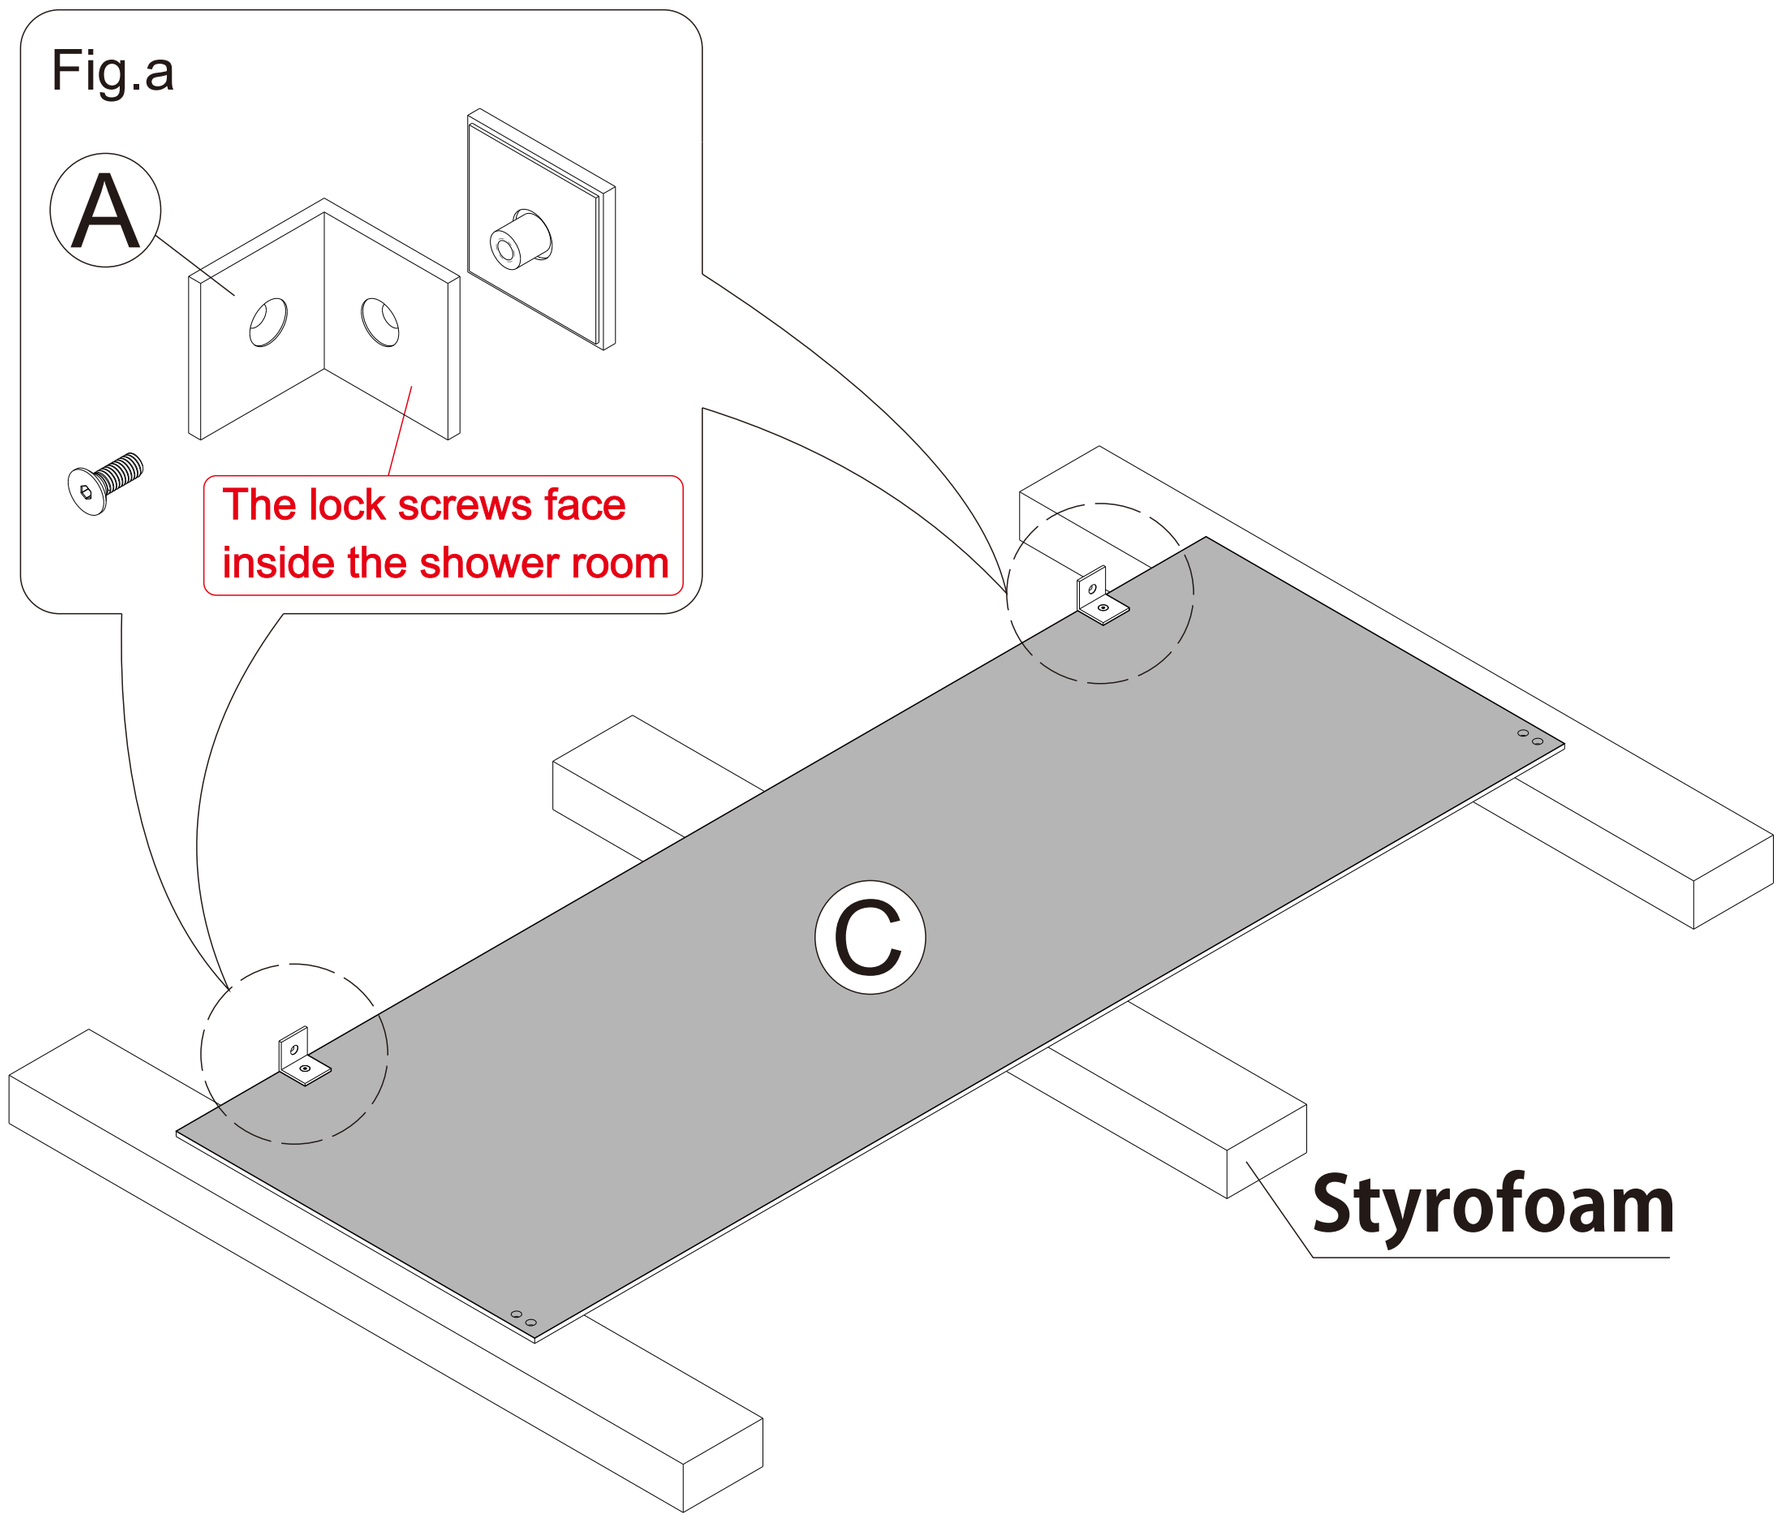

_____ Finished opening bottom (W2)

2-1 Install **Connectors(A)**

NOTE

1.Install the **Connector(A)** to the **Stationary Glass(C)** as Fig.a .

Fig.a

Note: The shower door can be installed left or right, according to the need to determine the installation direction.

CAUTION: Do not put glass directly on the ground

2-2 Determine the tray edge distance

NOTE

1.Determine your starting point from the edge of tray (3/8" (10mm) is recommended) and mark the position as Fig.a.

2.Use a pencil to mark the **Connector(A)** holes as Fig.b .

Fig.a

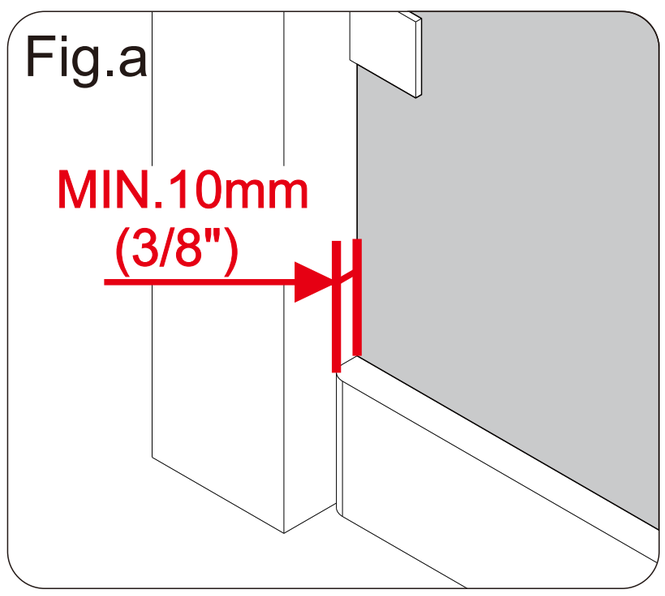

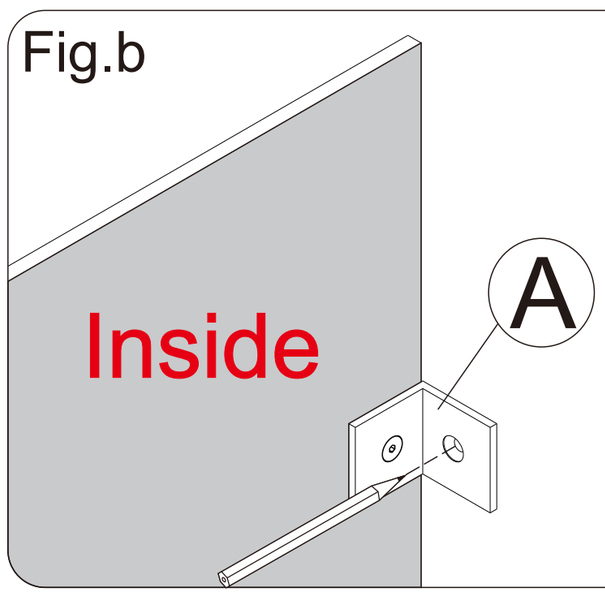

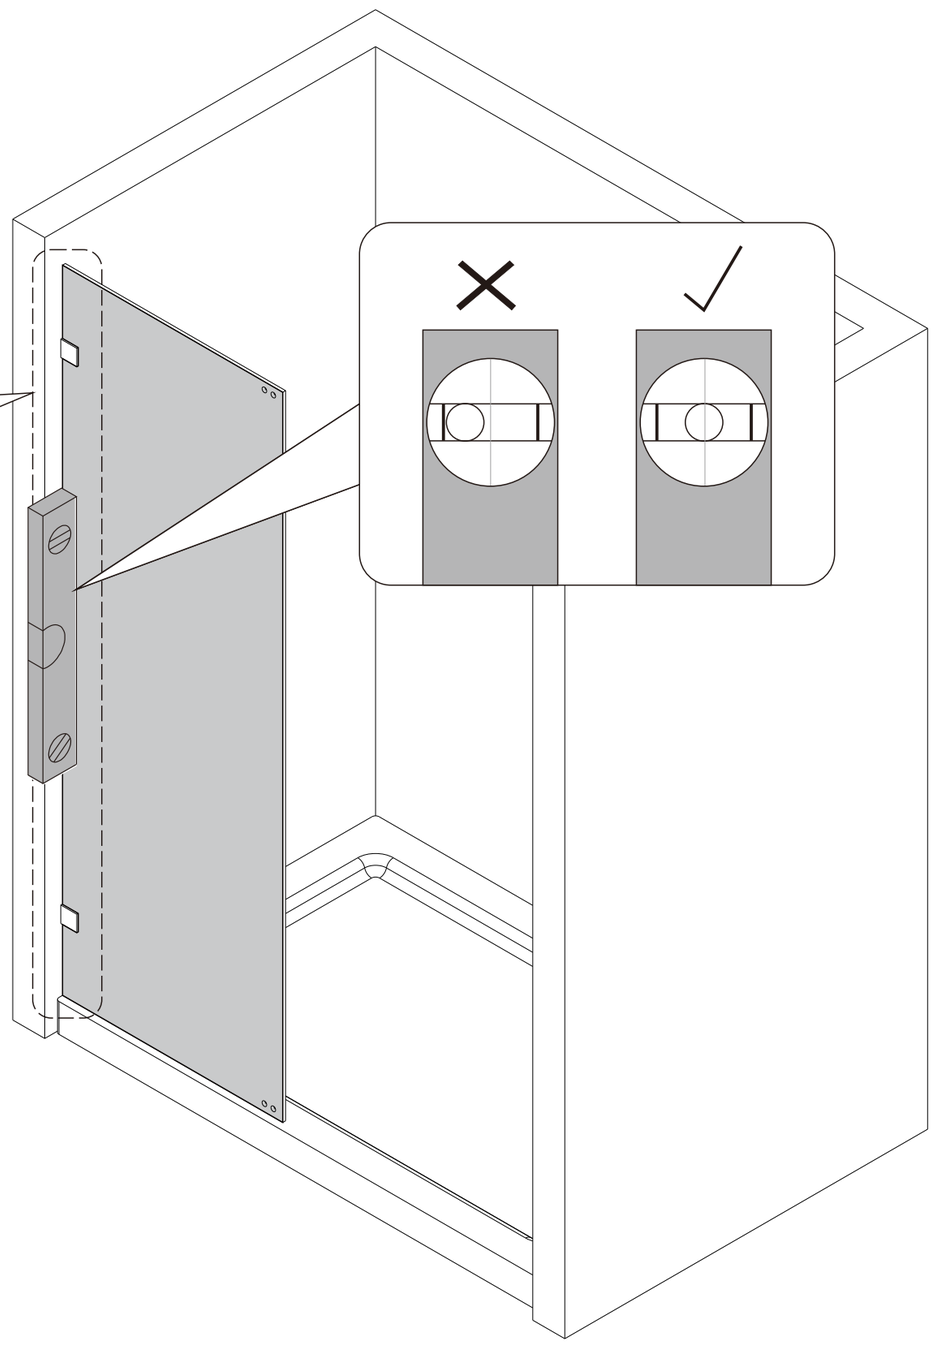

Fig.b

Note: The shower door can be installed left or right, according to the need to determine the installation direction.

2-3 Install **Wall Anchor(dd)**

NOTE

1.Drill holes with Φ8mm(5/16") drill bit as Fig.a.
2.Insert **Wall Anchors(dd)** as Fig.b.

Fig.a

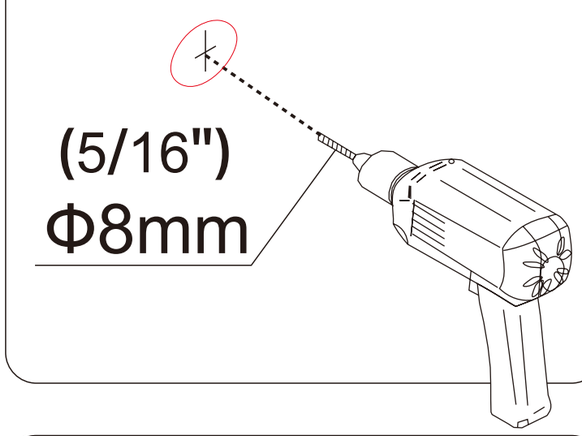

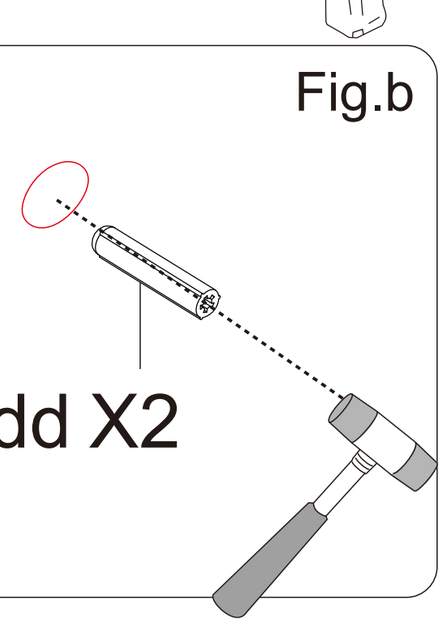

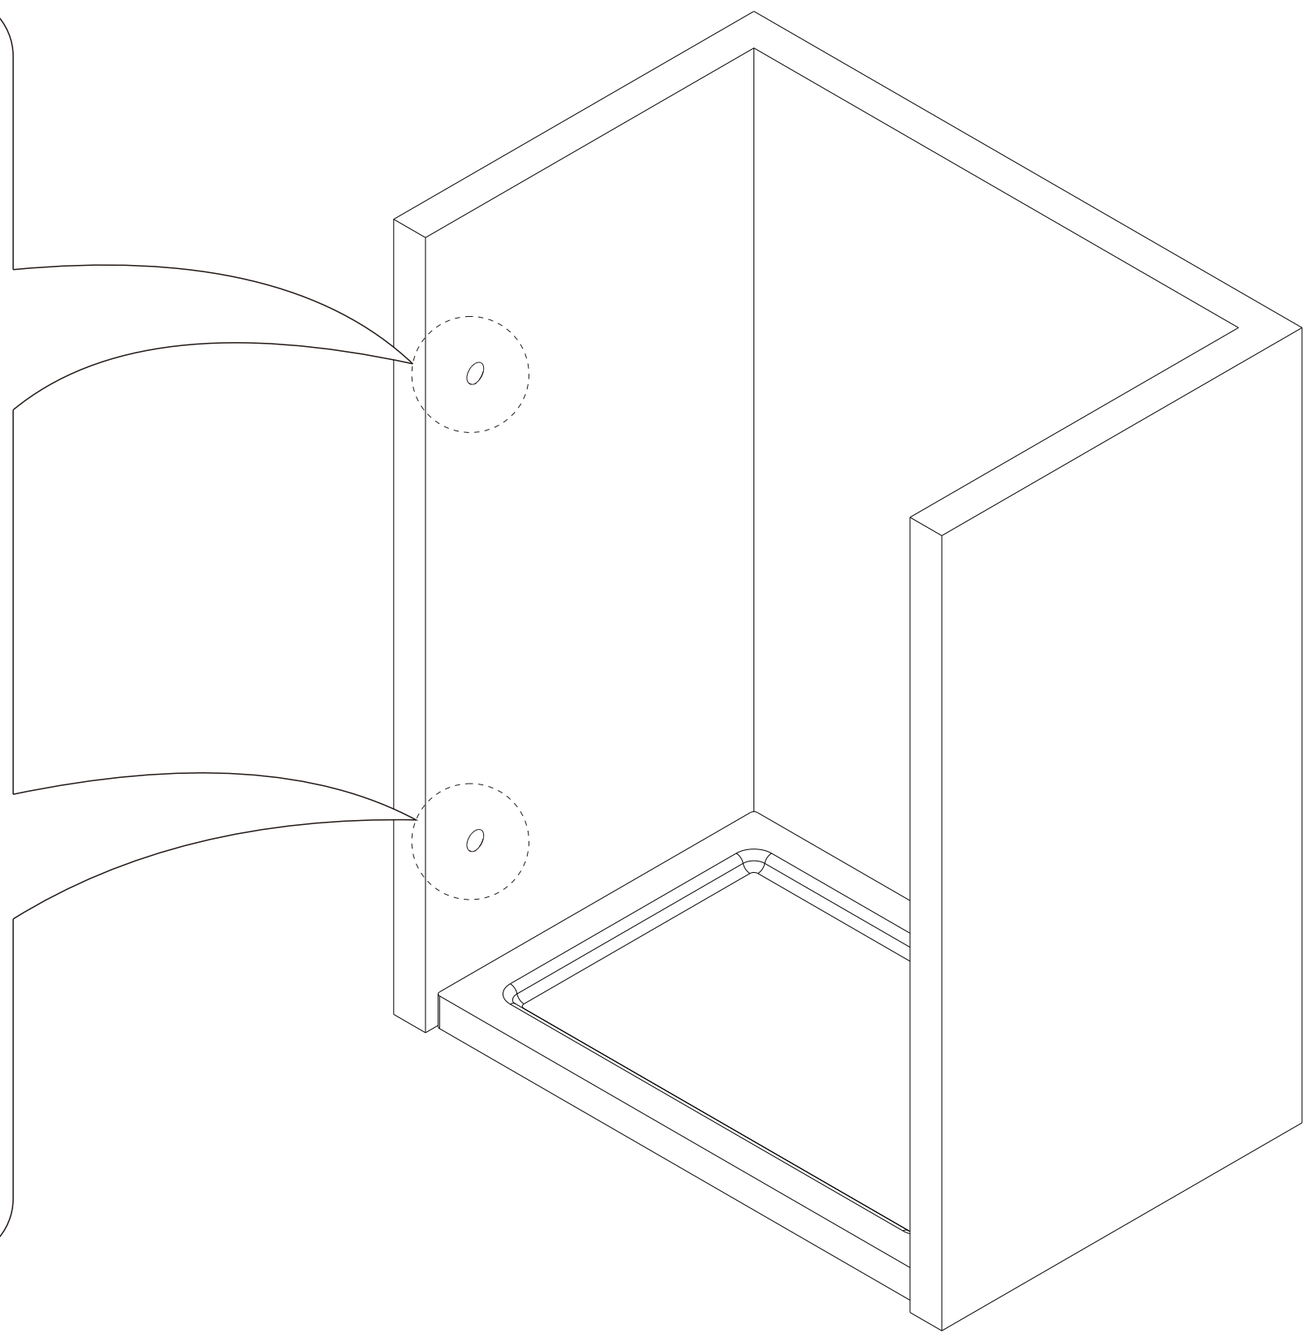

Fig.b

NOTE

● If a Stud is present behind the wall:
drill Φ5/32″(4mm) pilot holes into the stud and use the ST5.0x35mm **Screws(aa)**
OR
● If NO Stud is present behind the wall:
drill Φ5/16"(8mm) holes and insert the **Wall Anchors(hh)** and use the ST5.0x35mm **Screws(aa)**.

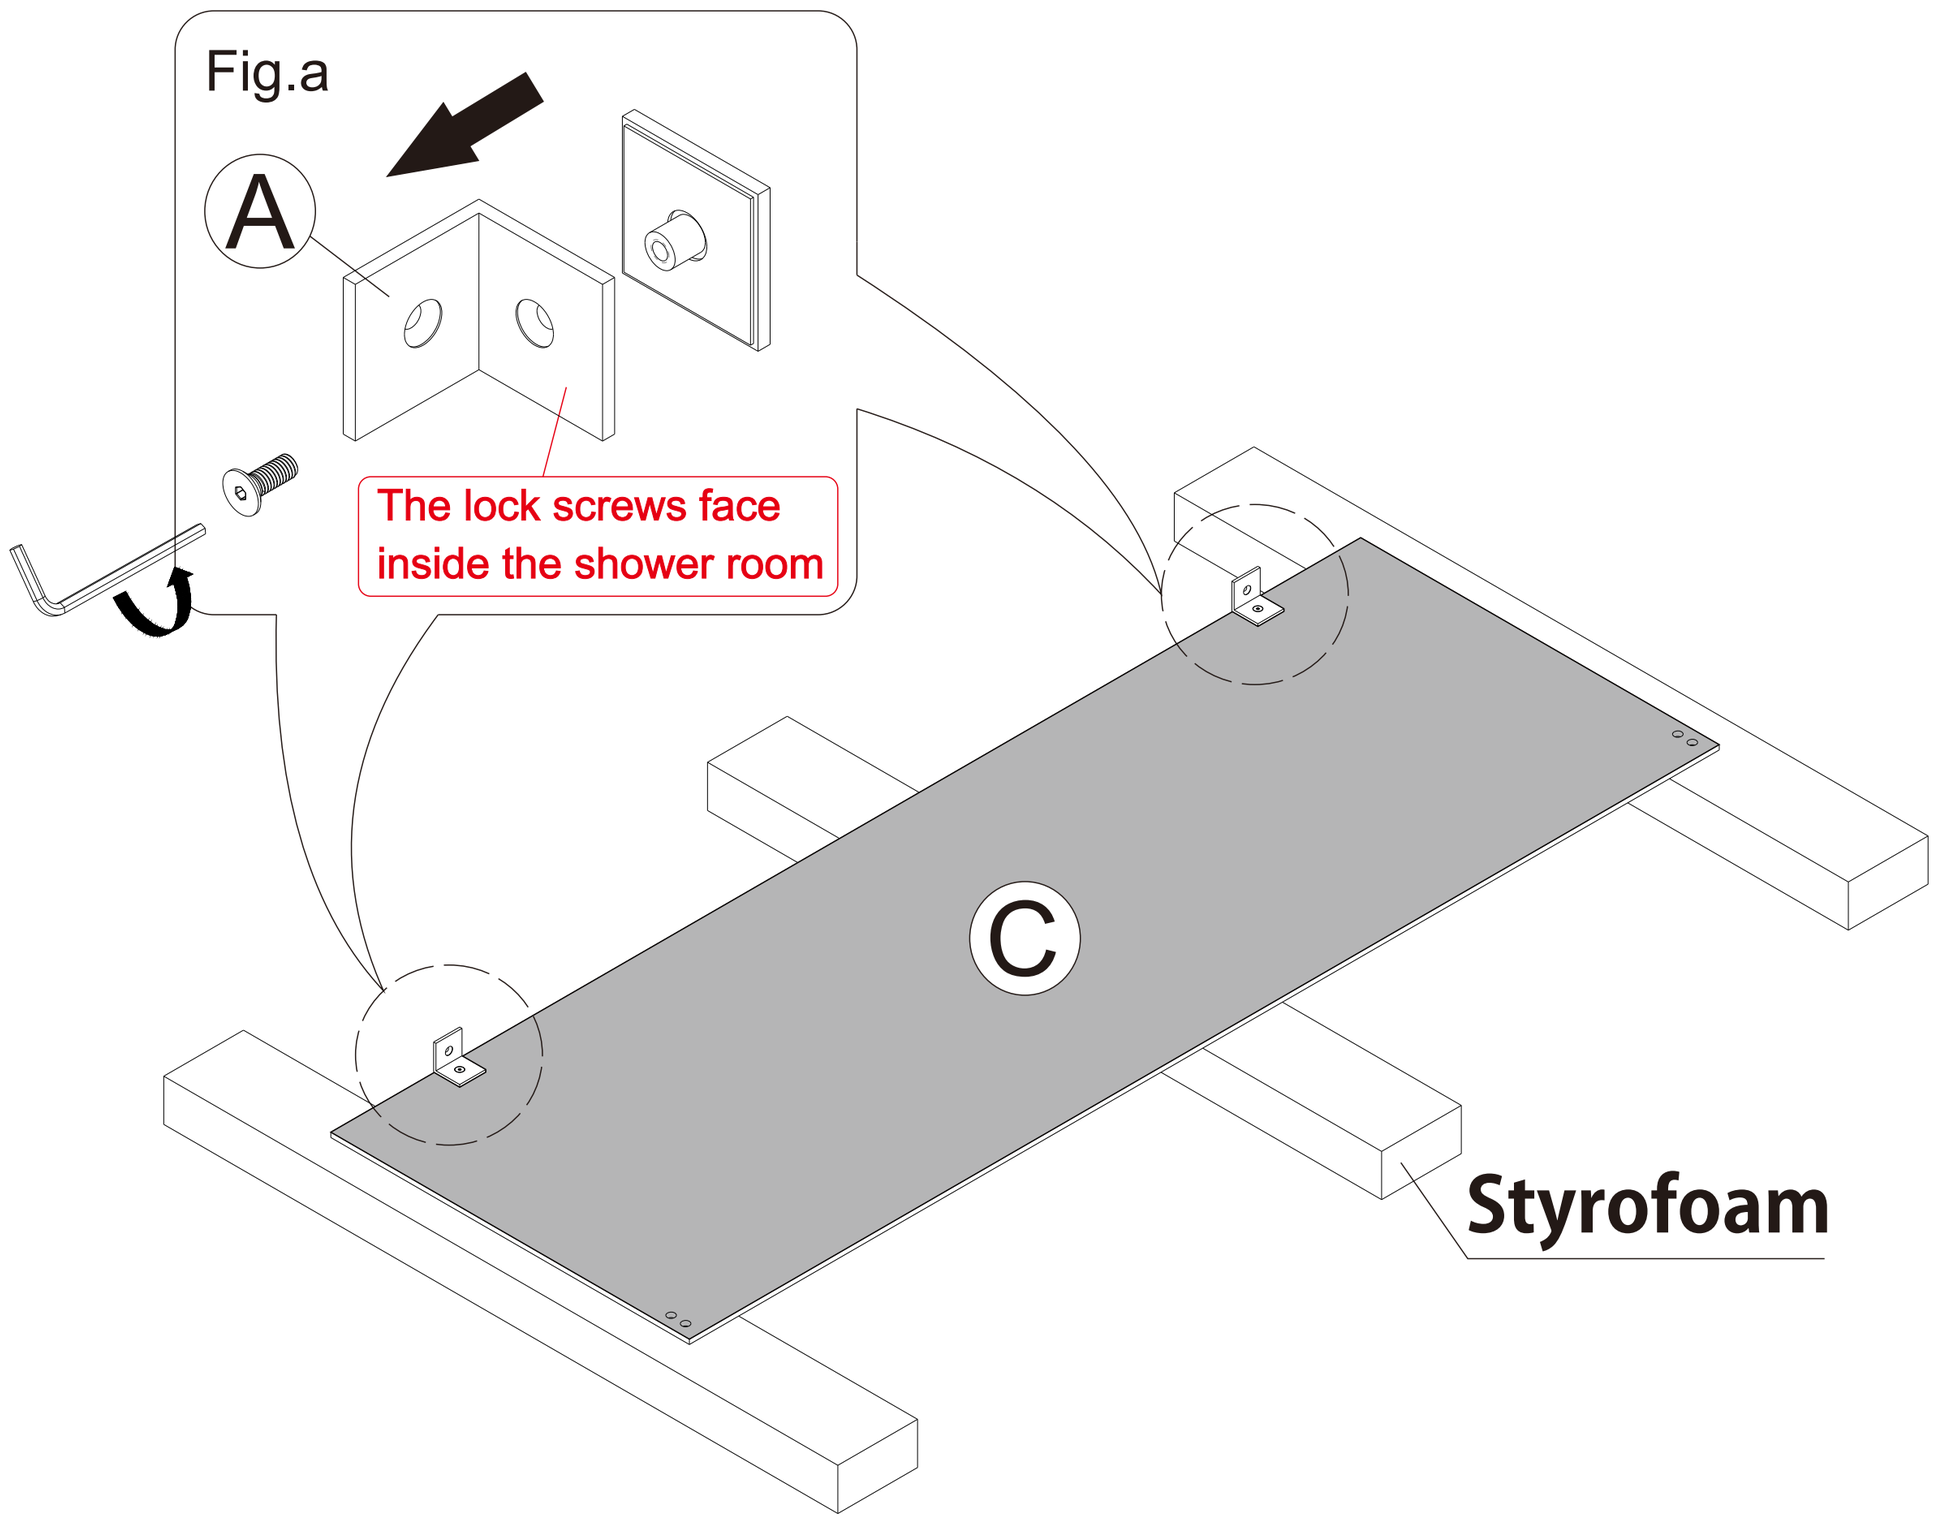

Note: The shower door can be installed left or right, according to the need to determine the installation direction.

2-4 Remove the connectors(A)

NOTE

1.Remove the **Connectors(A)** from the **Stationary Glass(C)** as Fig.a

Fig.a

Note: The shower door can be installed left or right, according to the need to determine the installation direction.

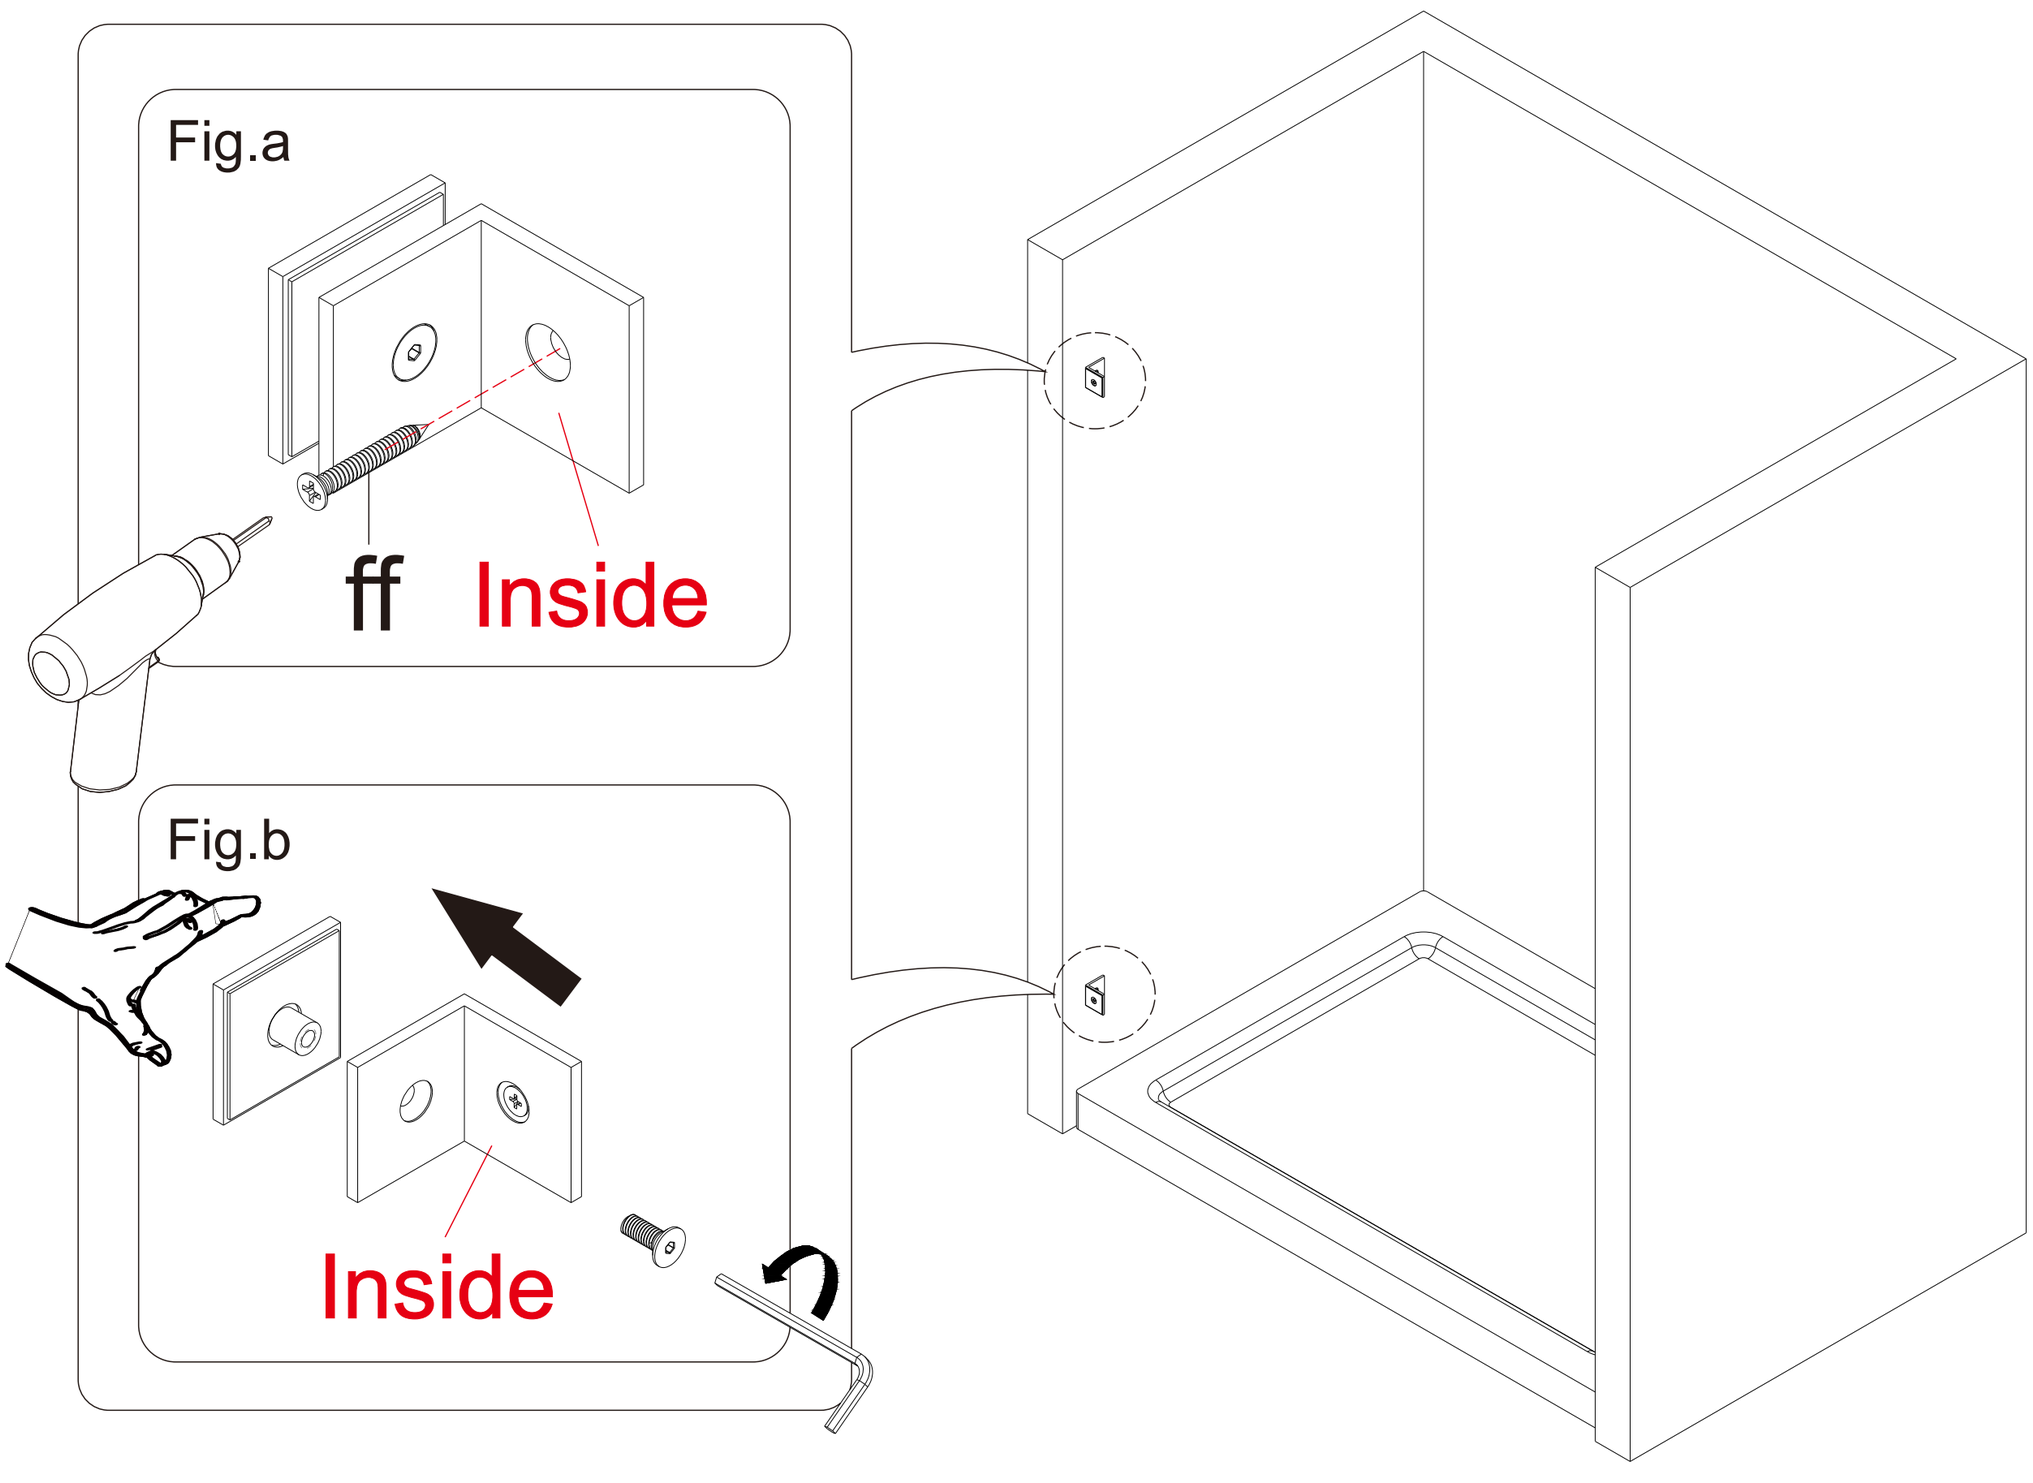

CAUTION: Do not put glass directly on the ground

2-5 Install **Connectors(A)**

NOTE

1.Secure the **Connectors(A)** to the wall with **Screws(ff)** as Fig.a.

2.After fixing the **Connector(A)**, take out the **Connector(A)** platen to facilitate the subsequent installation of the **Stationary Glass(C) as Fig.b**

Note: The shower door can be installed left or right, according to the need to determine the installation direction.

3 Install **Stationary Glass(C)**

Fig.a

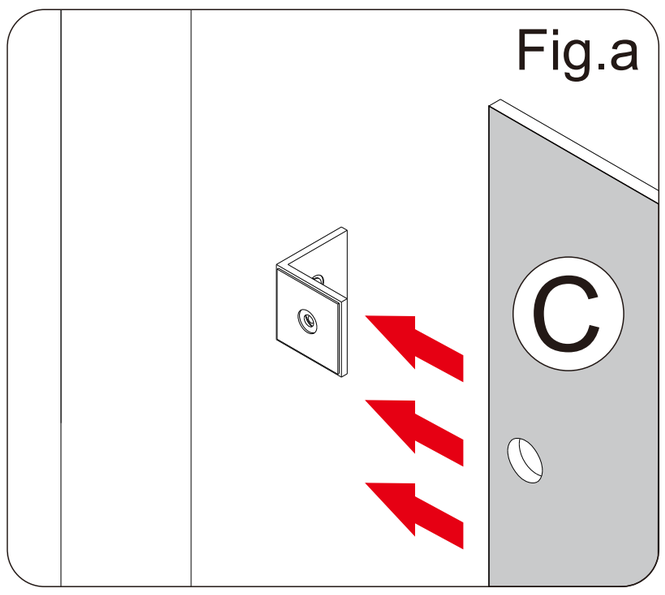

Fig.b

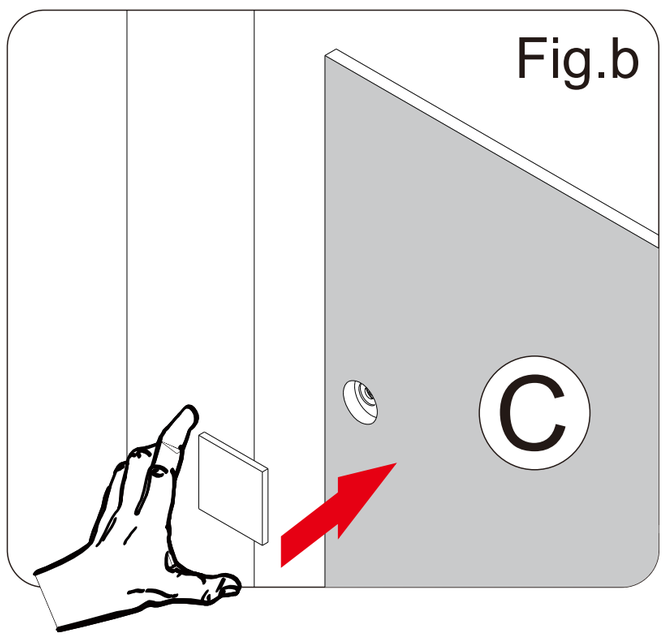

Fig.c

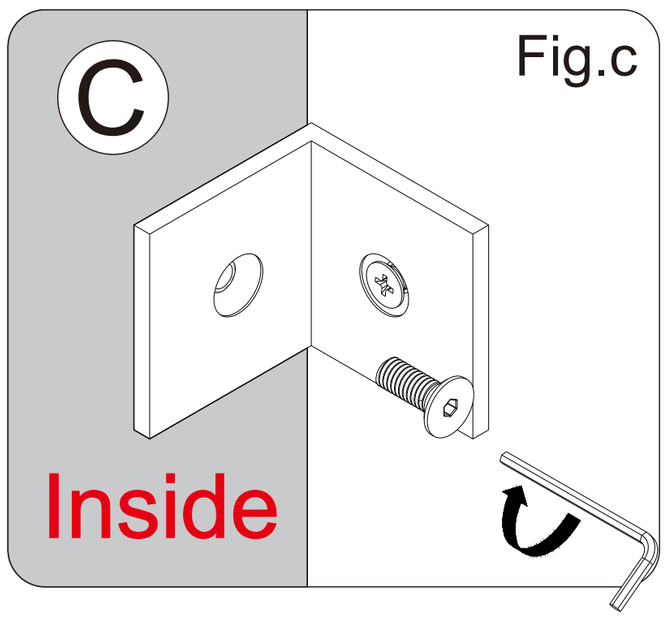

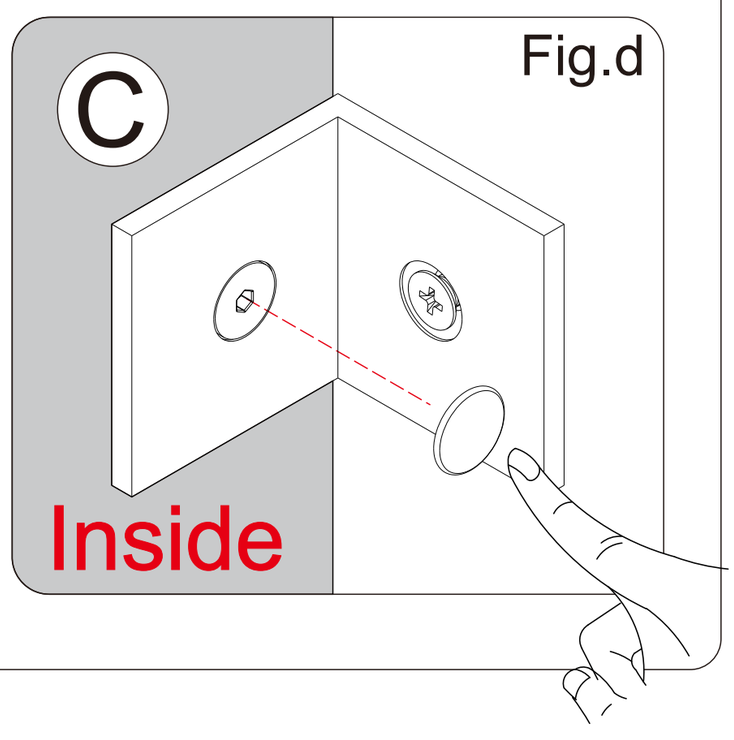

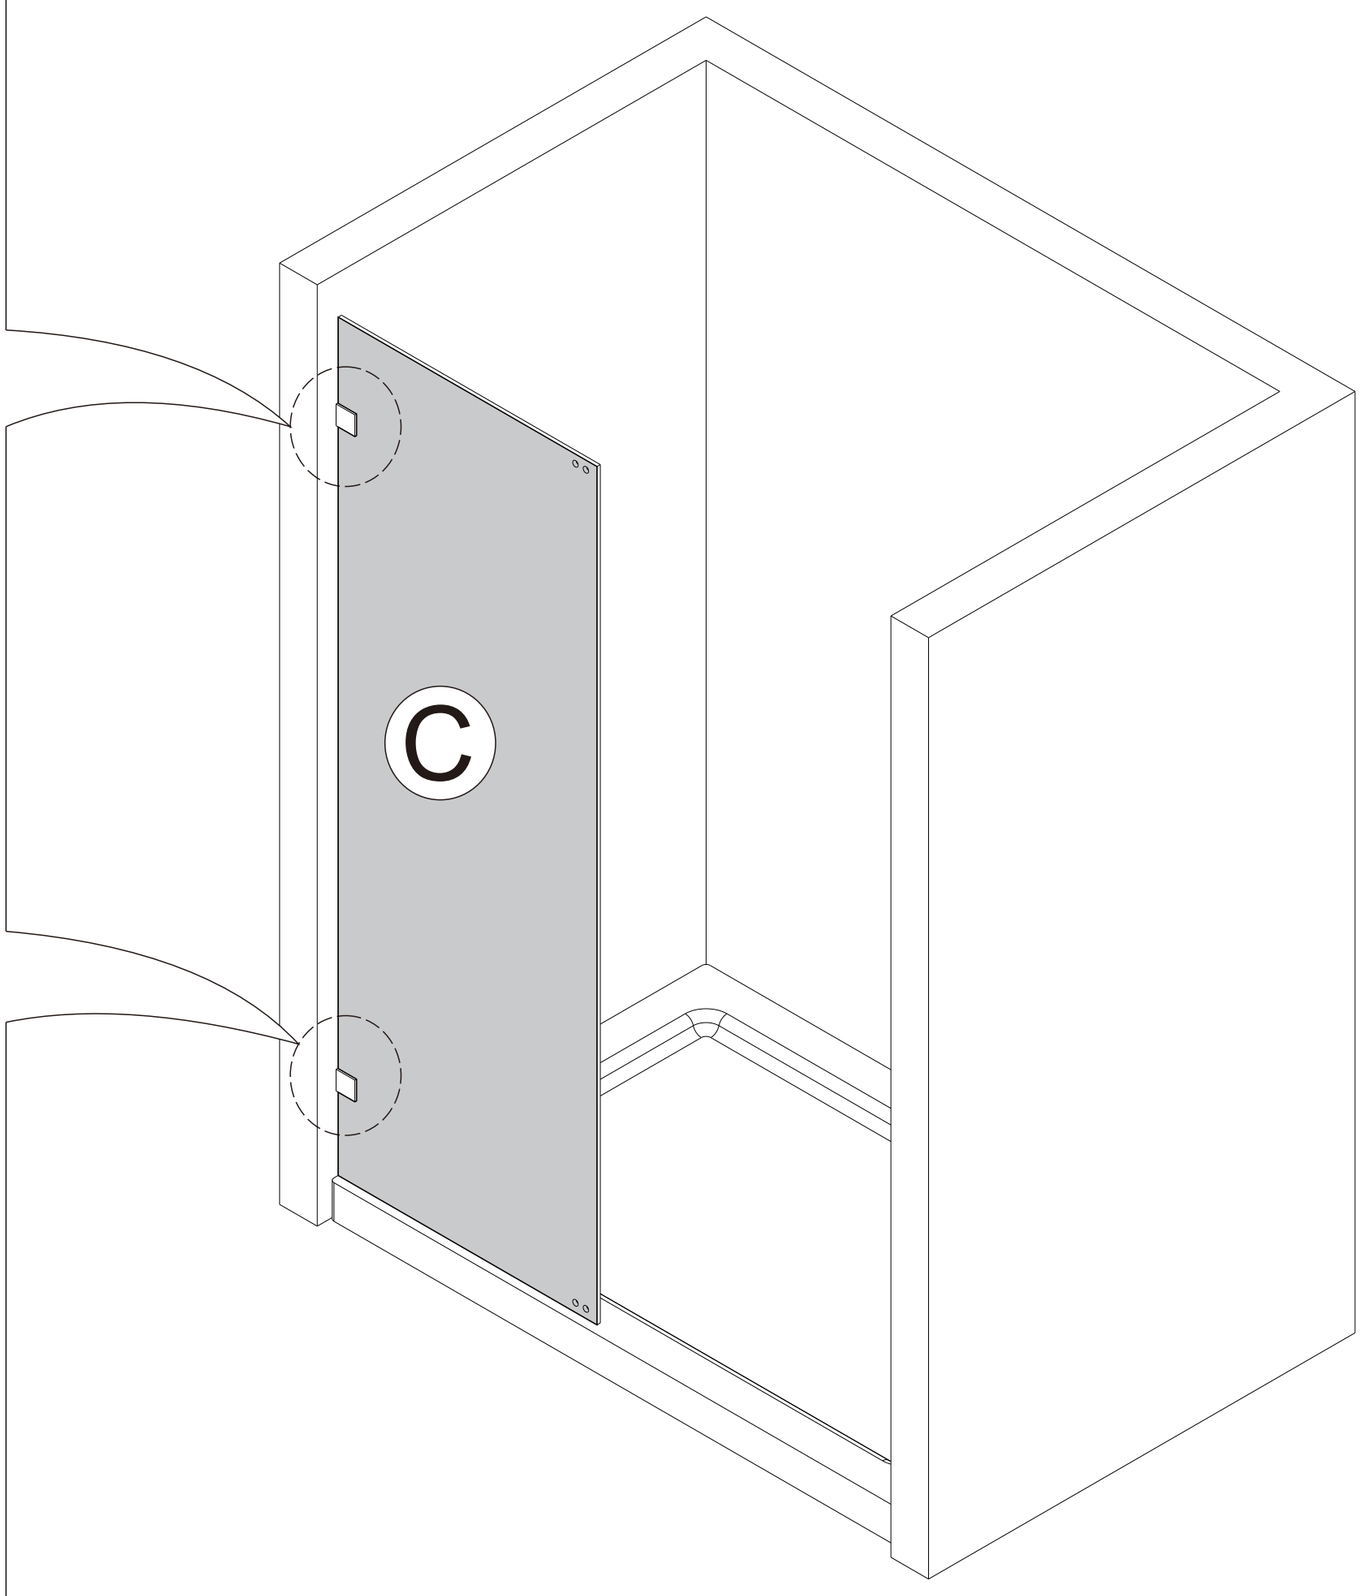

Fig.d

NOTE

1.Secure the **Stationary Glass(C)** with a **Connector(A)** as Fig.a、Fig.b and Fig.c

2.Install the trim cover on the **Connector(A)** as Fig.d

Note: The shower door can be installed left or right, according to the need to determine the installation direction.

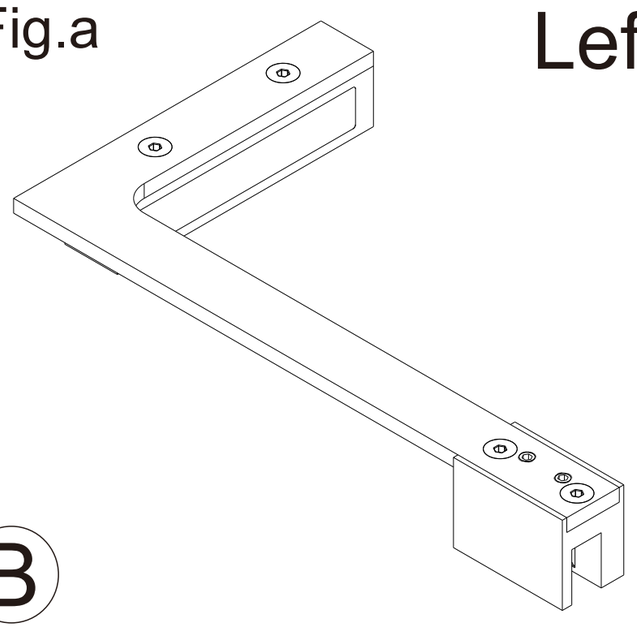

4-1 Tips & Tricks

NOTE

The matching tie rod is suitable for left installation , as shown in the figure is to change the direction of the tie rod for right installation as Fig.a-f

Hotline : + 1 302 336 8180

4-2 Install **Pull rod(B)**

NOTE

1.Install the **Pull rod(B)** on the **Stationary Glass(C)** as Fig.a
2.Note that the **Pull rod(B)** should be perpendicular to the wall, if it is not vertical, you can twist the screw to adjust the **Pull rod(B)** as Fig.b、Fig.c and Fig.d

Fig.a

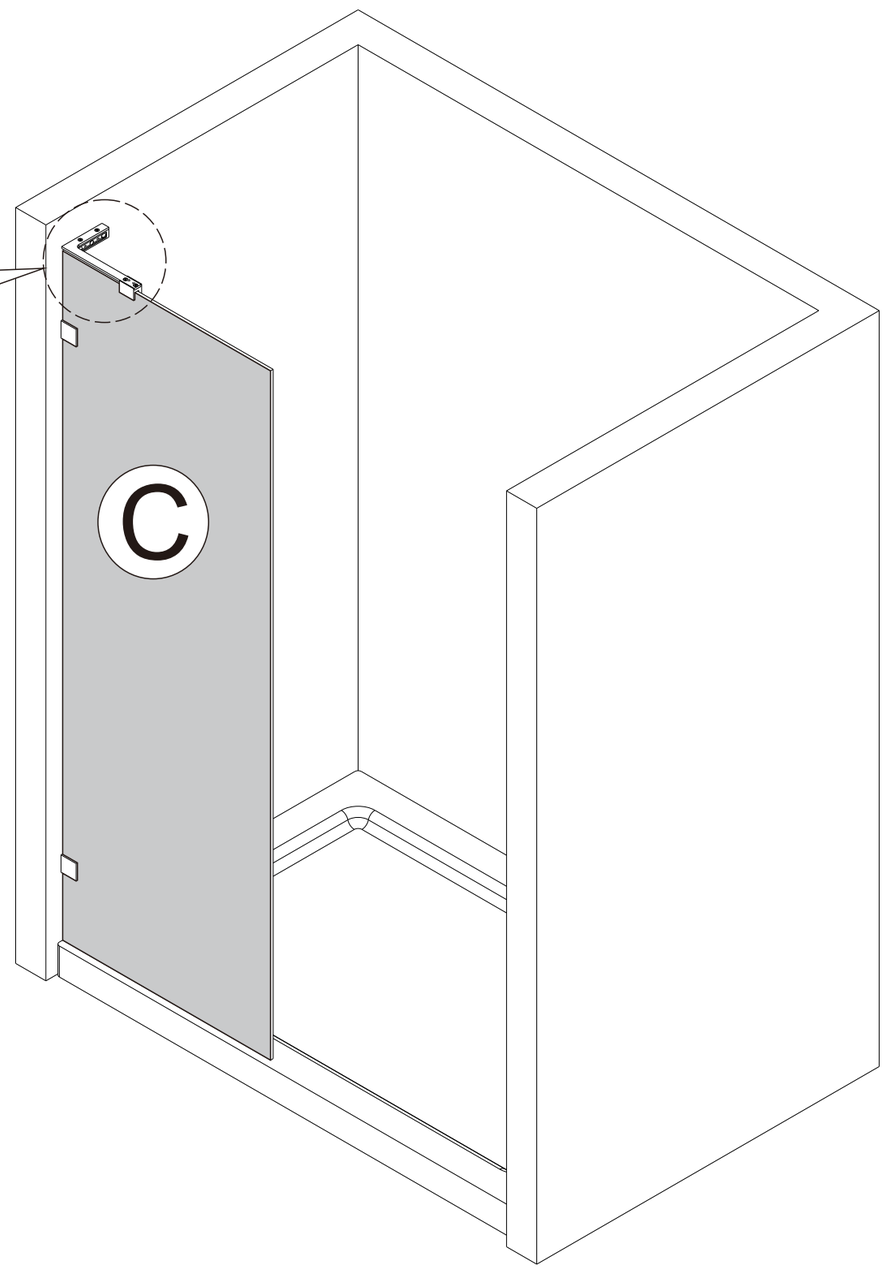

Fig.b

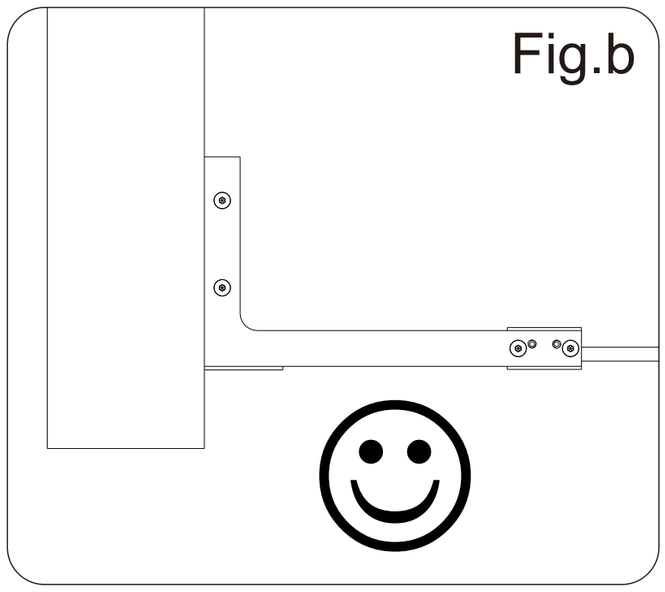

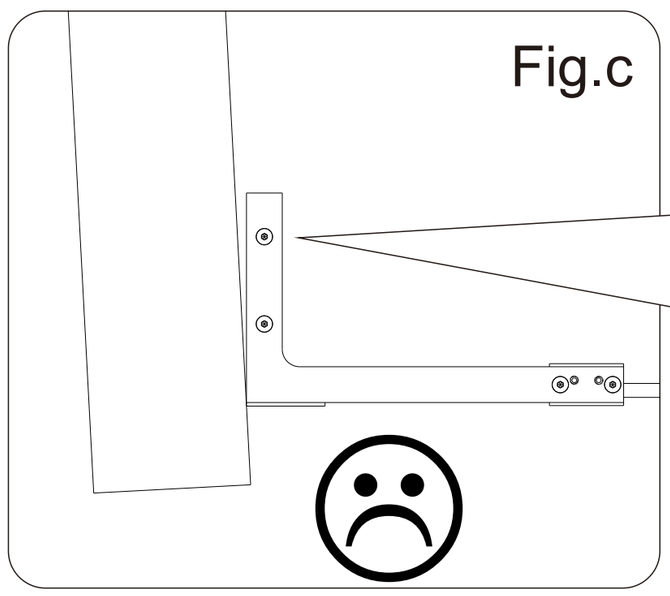

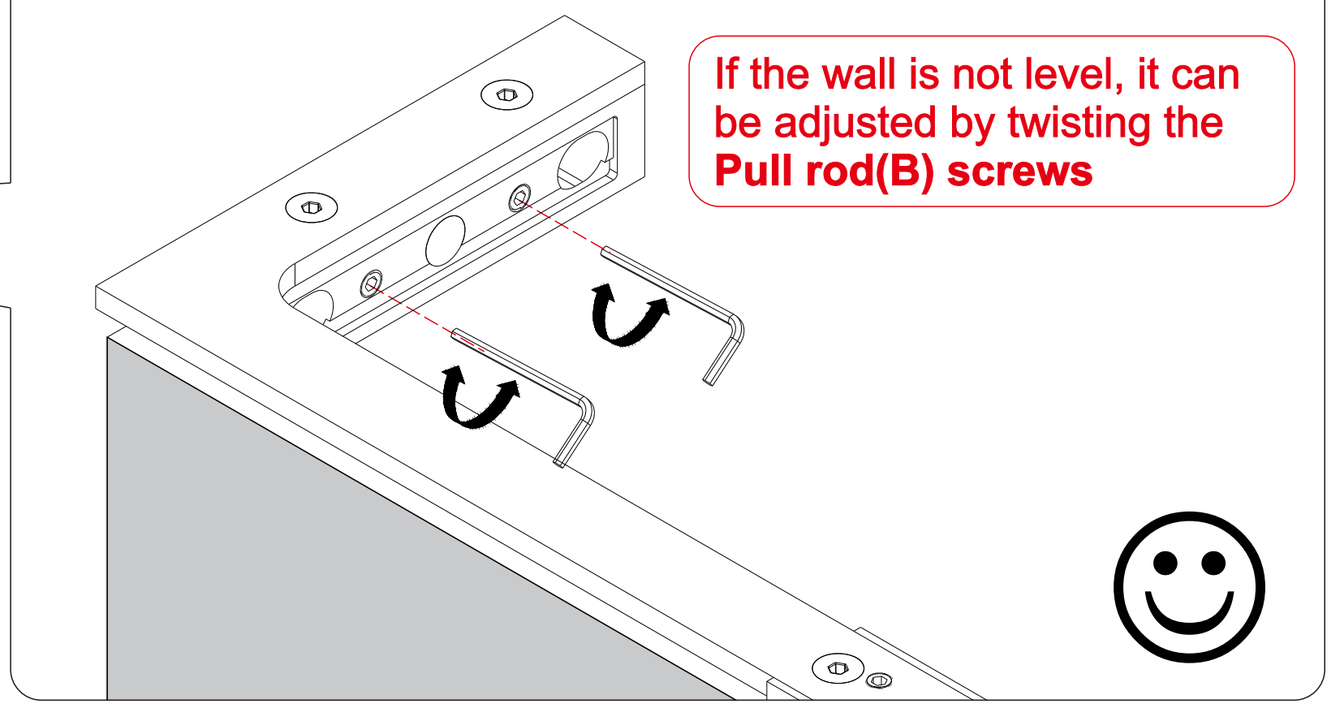

Fig.c

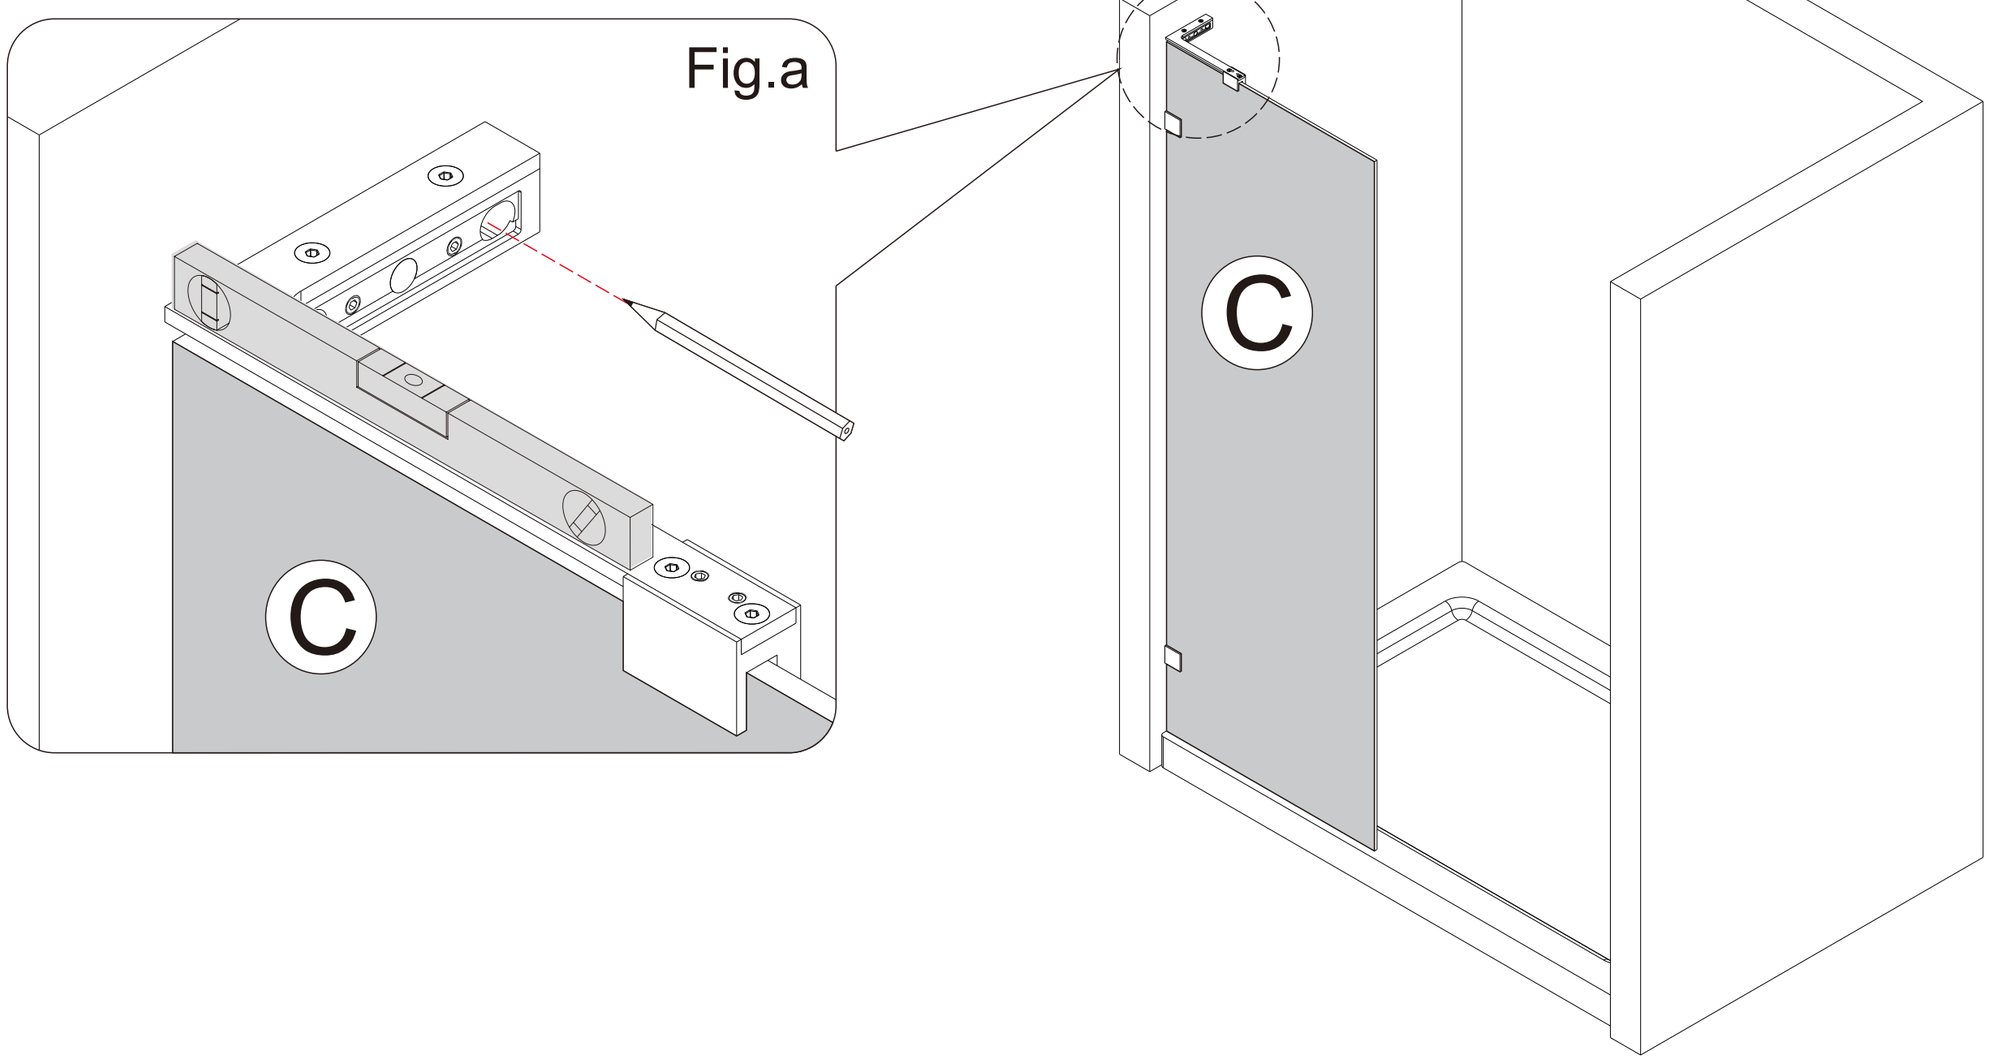

If the wall is not level, it can be adjusted by twisting the **Pull rod(B) screws**

4-3 Install **Pull rod(B)**

NOTE

1.Once the **Pull rod(B)** is level, mark the hole with a pencil as Fig.a .

Fig.a

Note: The shower door can be installed left or right, according to the need to determine the installation direction.

4-4 Install **Wall Anchor(aa)**

NOTE

1. Drill holes with Φ6mm(1/4") drill bit as Fig.a.
2. Insert the **Wall Anchors(aa)** as Fig.b.

Fig.a

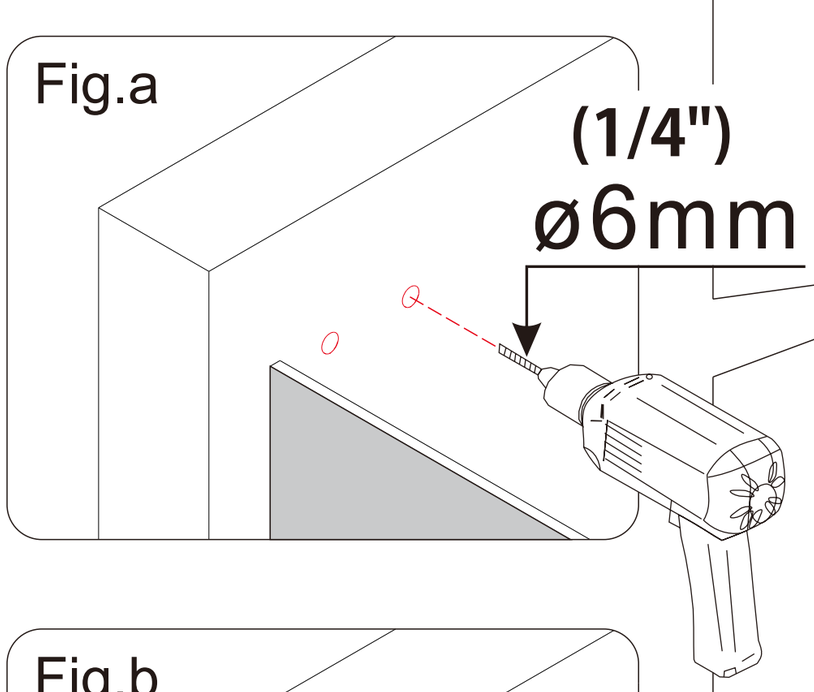

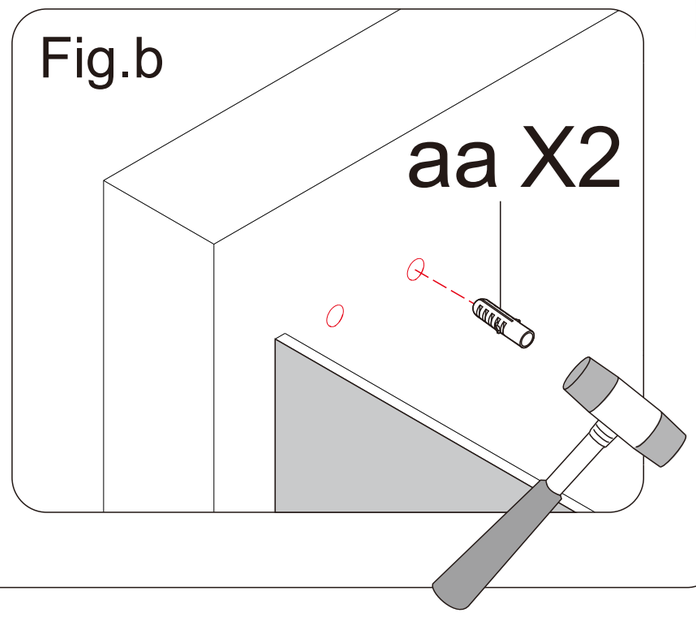

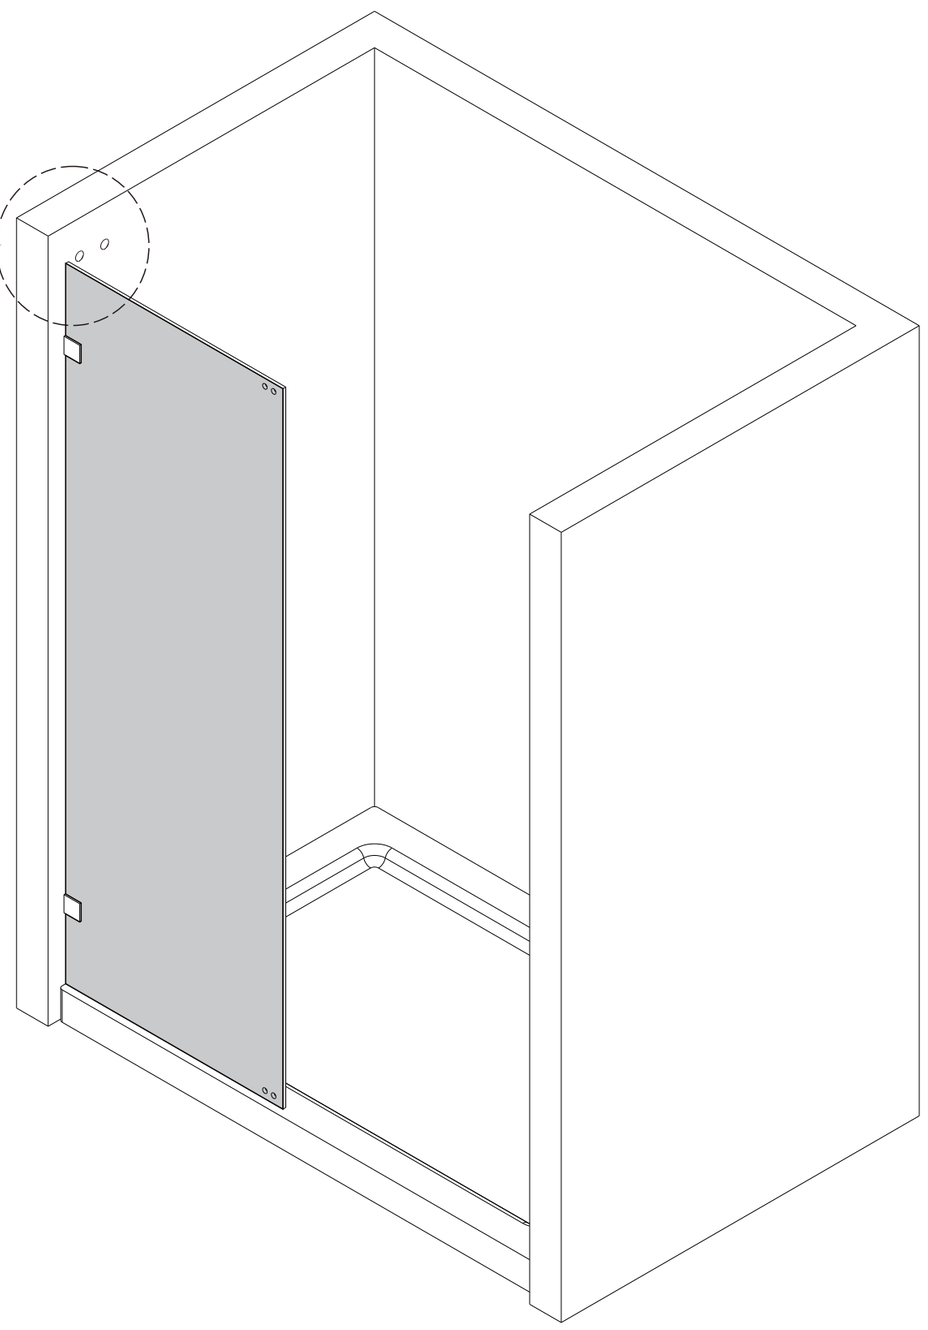

Fig.b

NOTE

● If a Stud is present behind the wall:
drill Φ1/8″(3mm) pilot holes into the stud and use the ST4.0x40mm **Screws(ee)**
OR
● If NO Stud is present behind the wall:
drill Φ1/4"(6mm) holes and insert the **Wall Anchors(aa)** and use the ST4.0x40mm **Screws(ee)**.

Note: The shower door can be installed left or right, according to the need to determine the installation direction.

4-5 Install **Pull rod(B)**

NOTE

1.Secure the **Pull rod(B)** to the wall with **Screws (ee)** as Fig.a
2.Twist the screws on the **Pull rod(B)** so that the **Pull rod(B)** olds the **Stationary Glass(C)** as Fig.b
3.Install the decorative cover on the **Pull rod(B)** as Fig.c

Fig.a

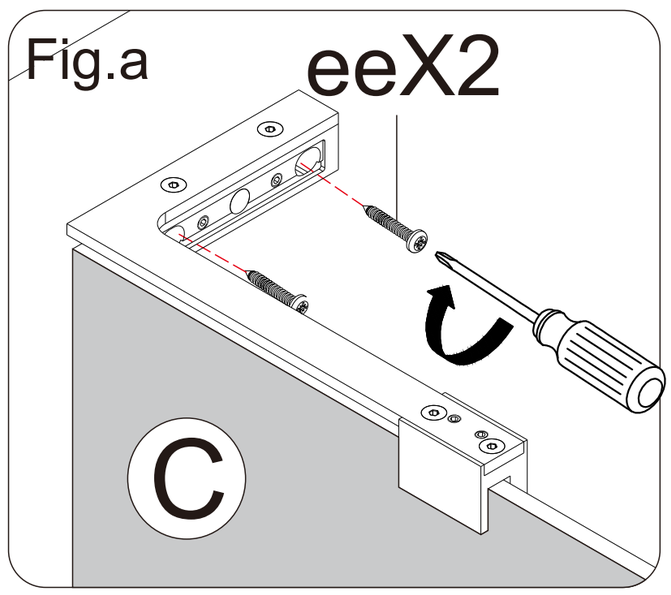

Fig.b

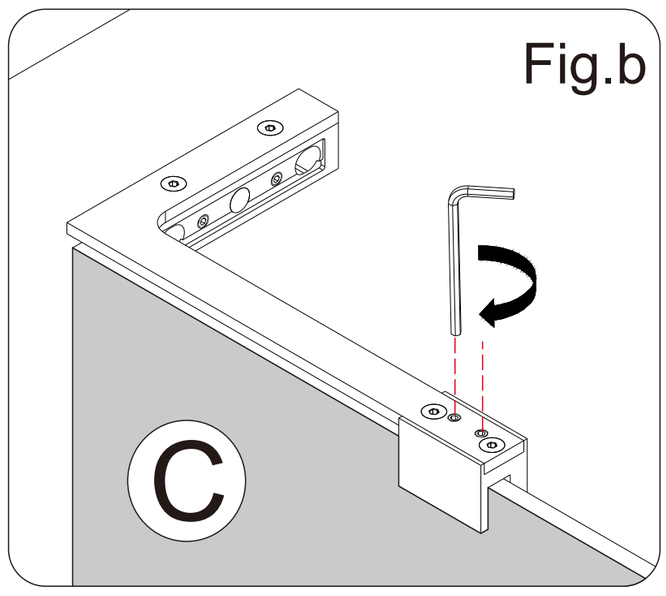

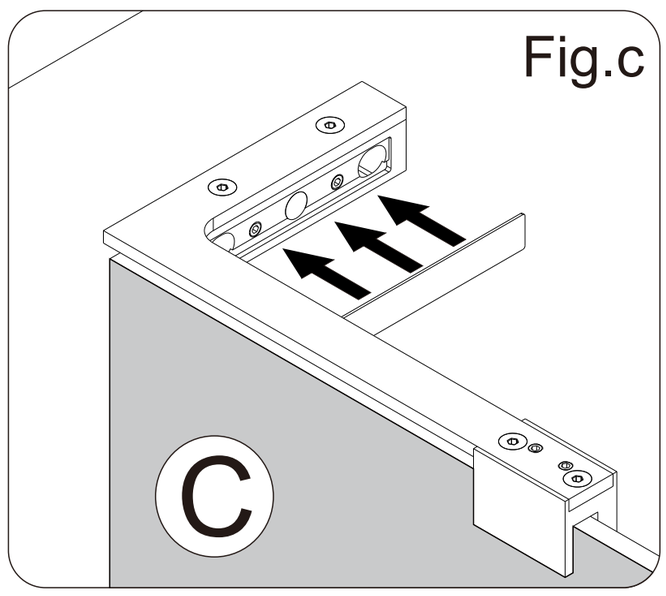

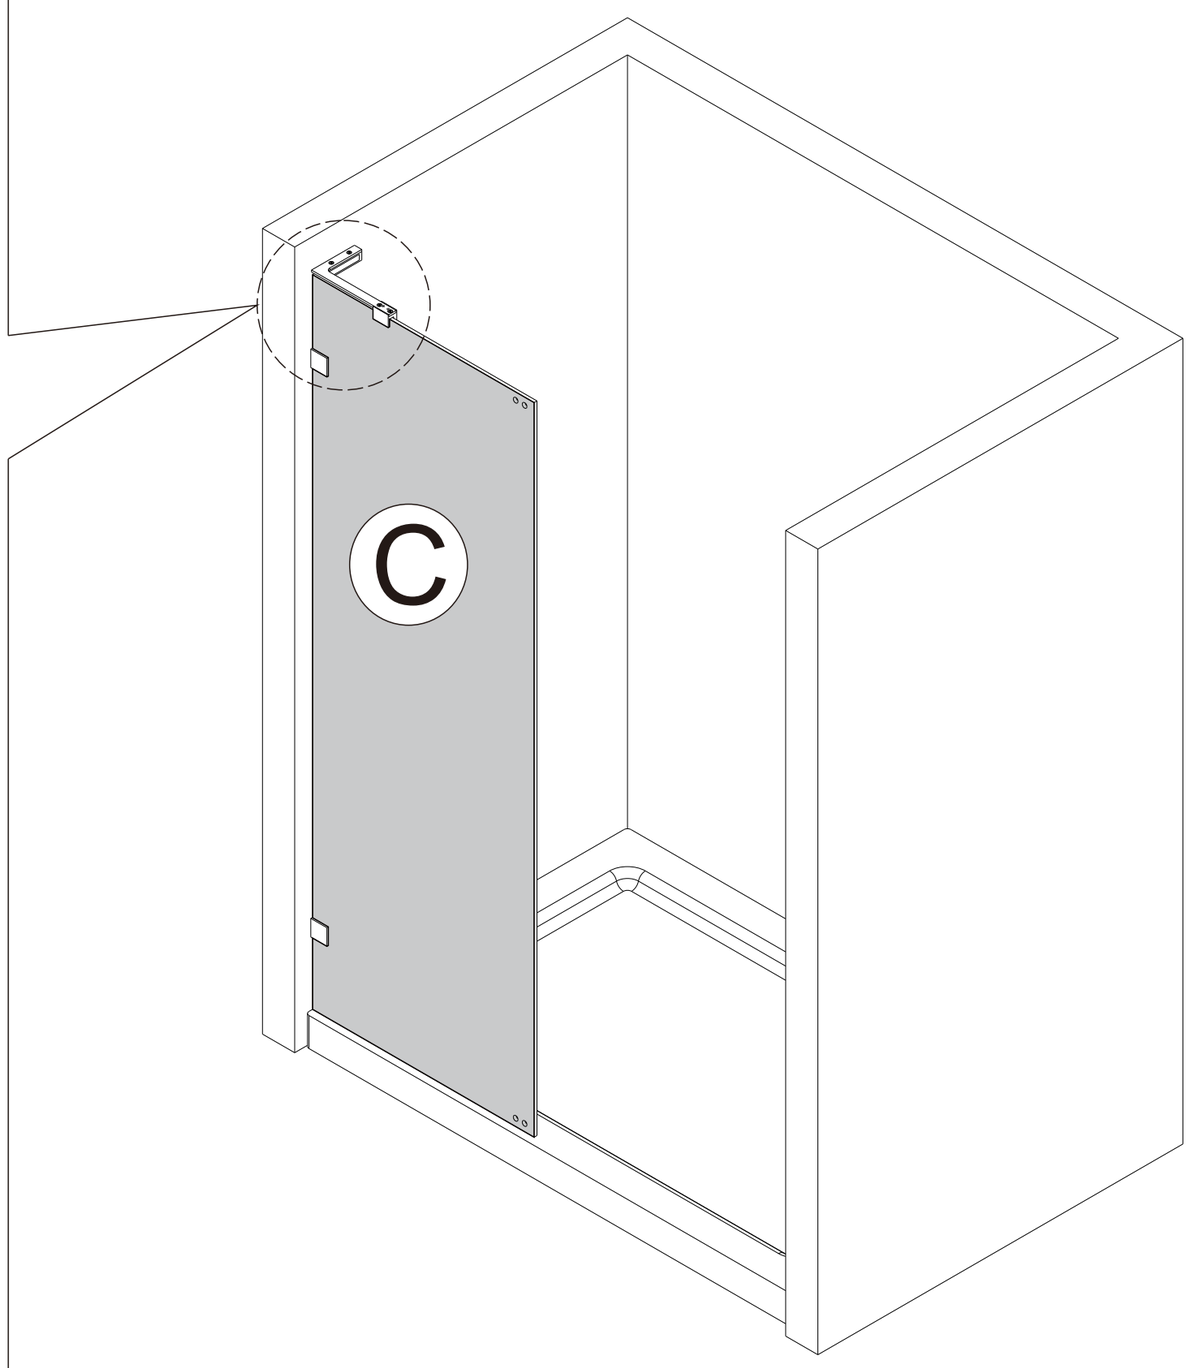

Fig.c

Note: The shower door can be installed left or right, according to the need to determine the installation direction.

5-1 Install **Pivot Sleeve(E)**

Fig.a

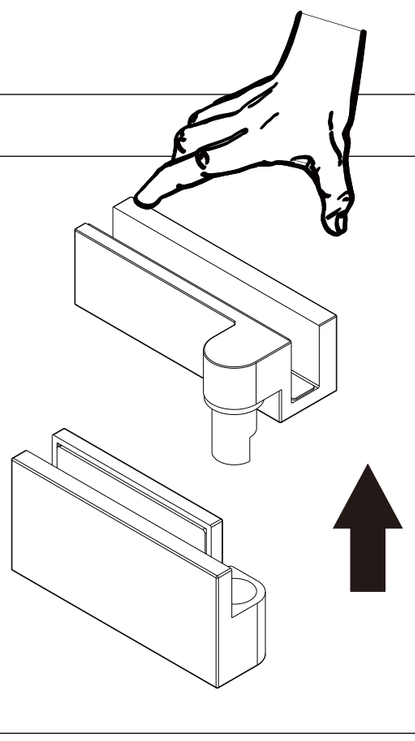

Fig.b

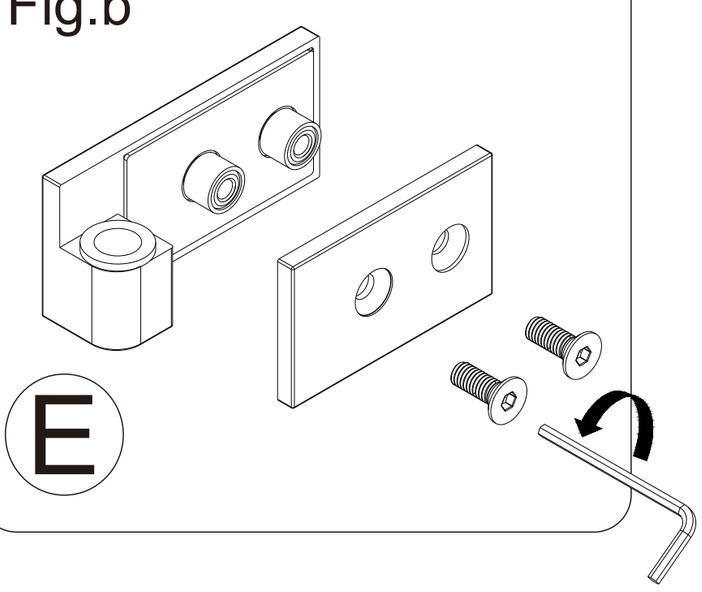

Fig.c

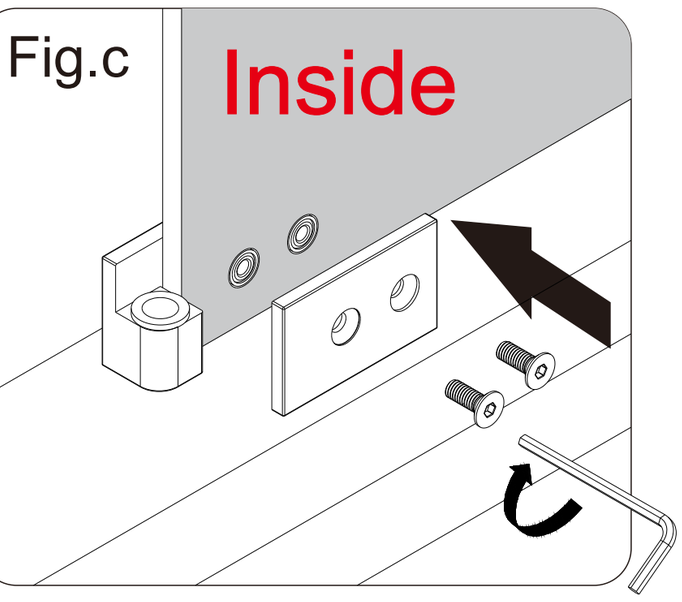

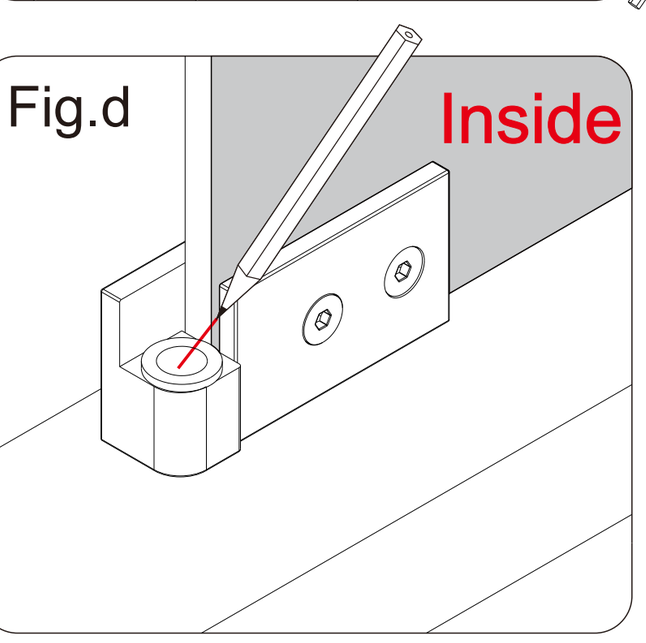

Fig.d

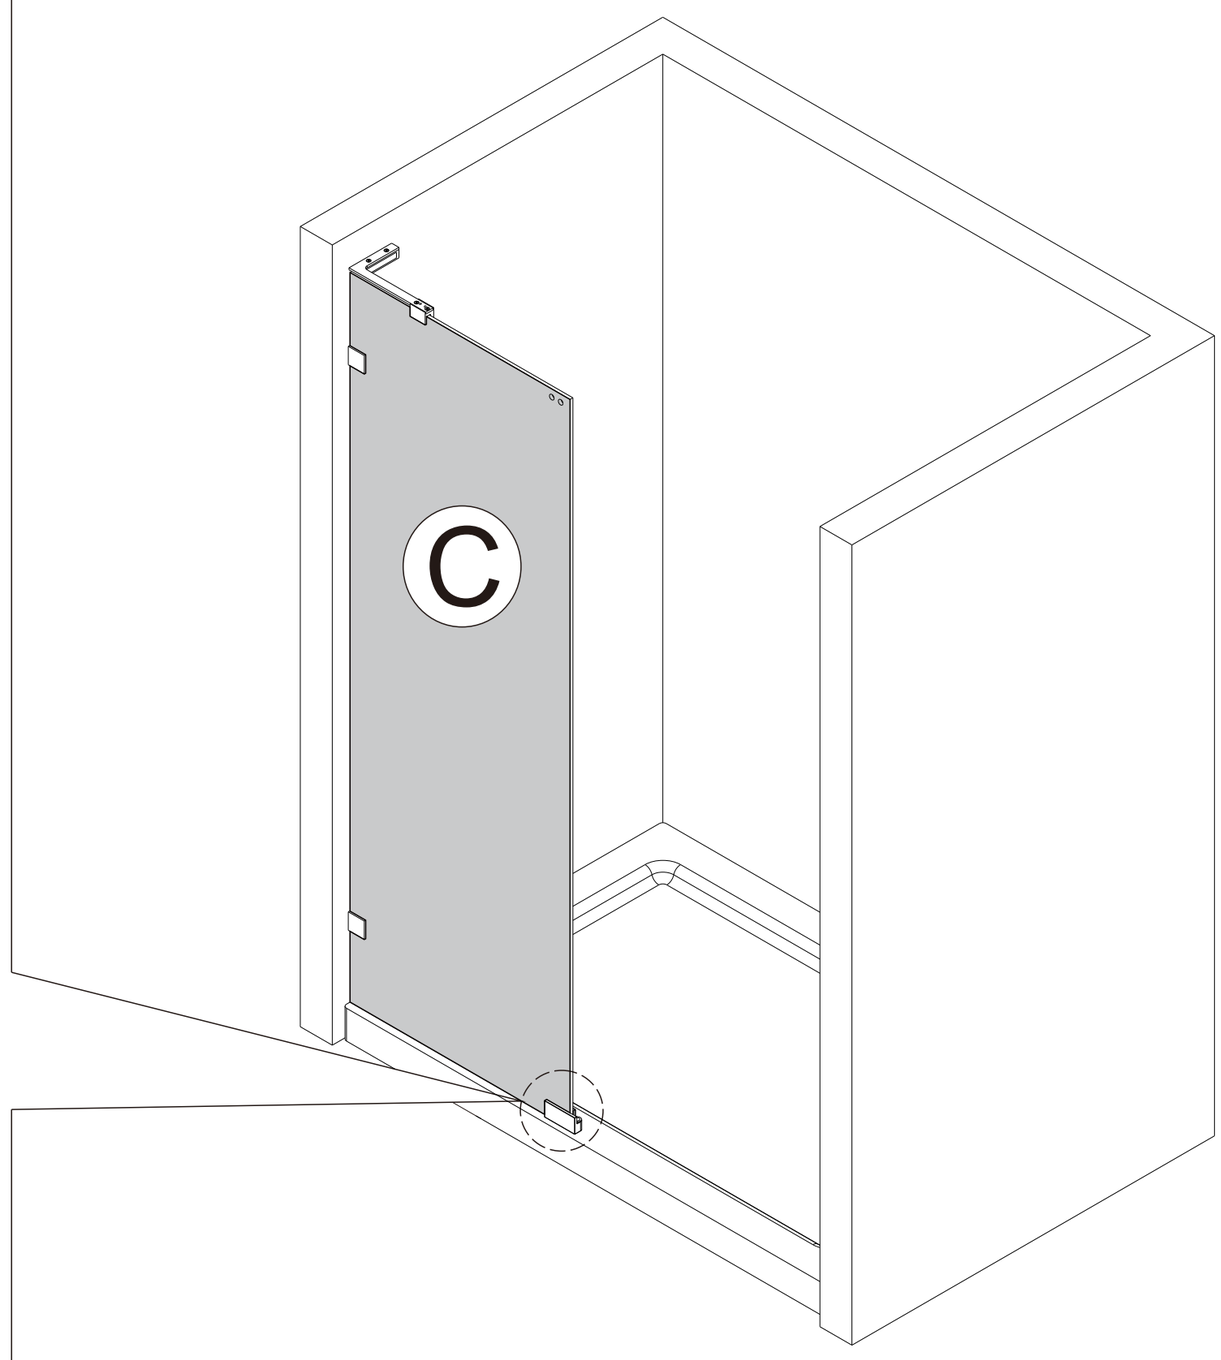

NOTE

1.Disassemble the **Pivot Sleeve(E)** as Fig.a and Fig.b .

2.Install the **Pivot Sleeve(E)** on the **Stationary Glass(C)** as Fig.c .

3.Use a pencil to mark the hole in the **Pivot Sleeve(E) as Fig.d**

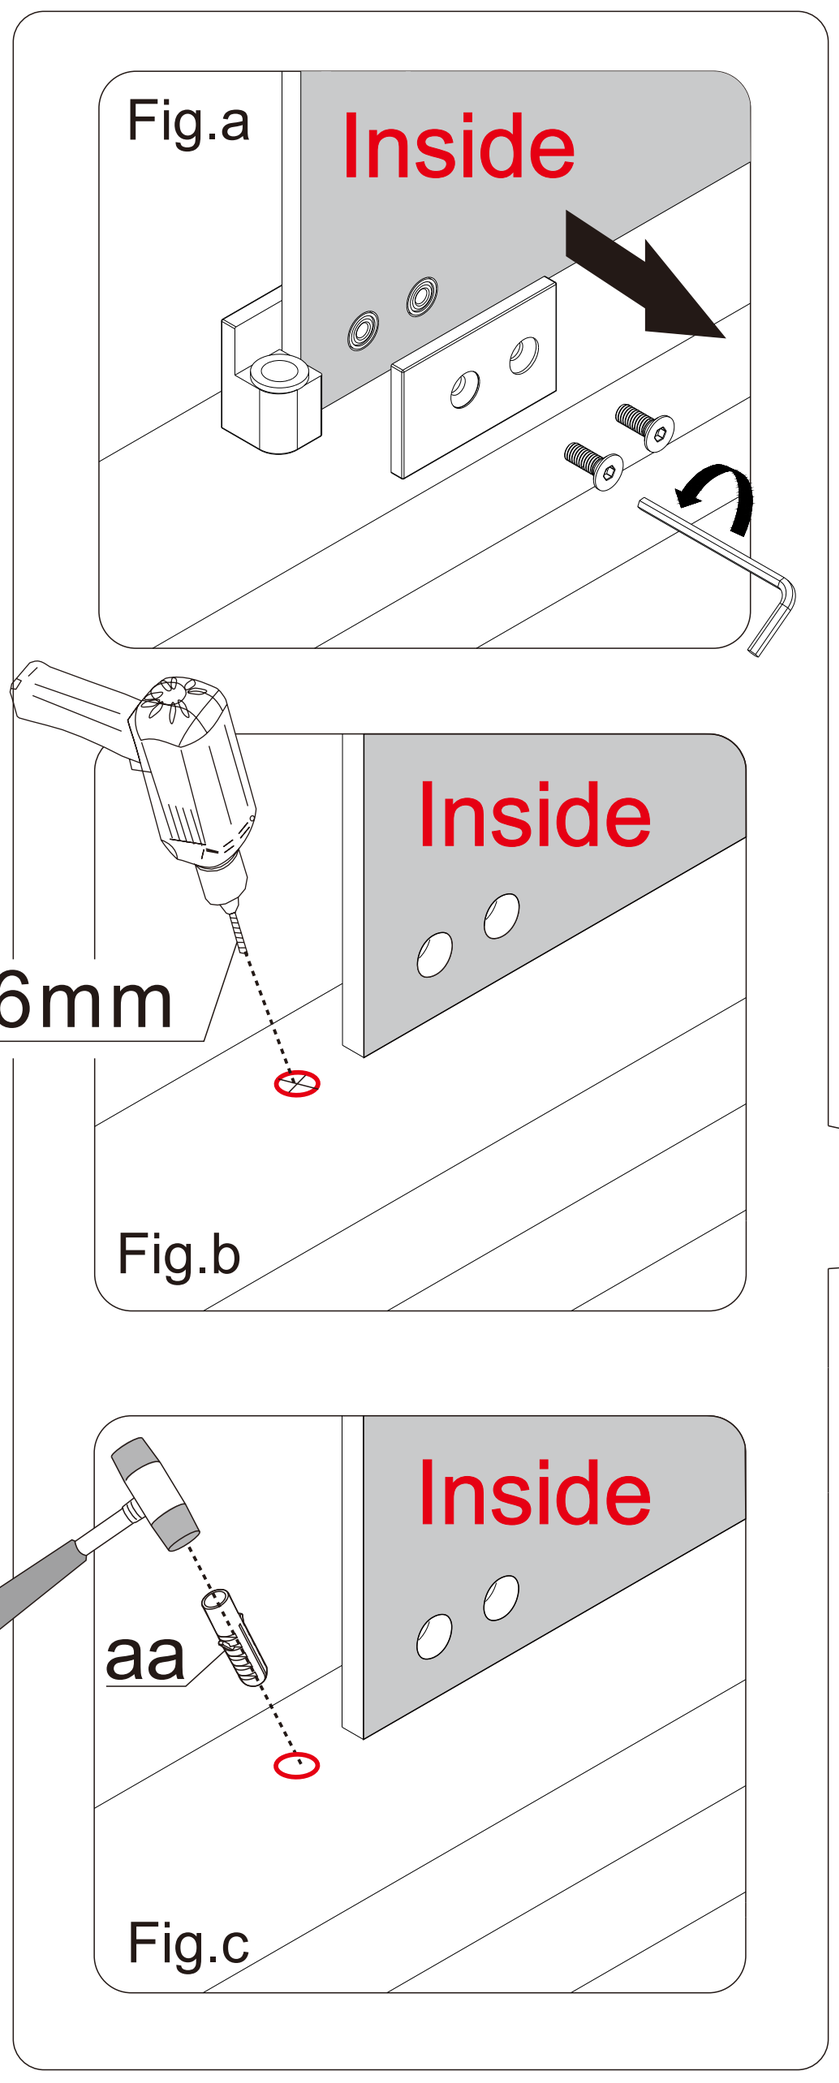

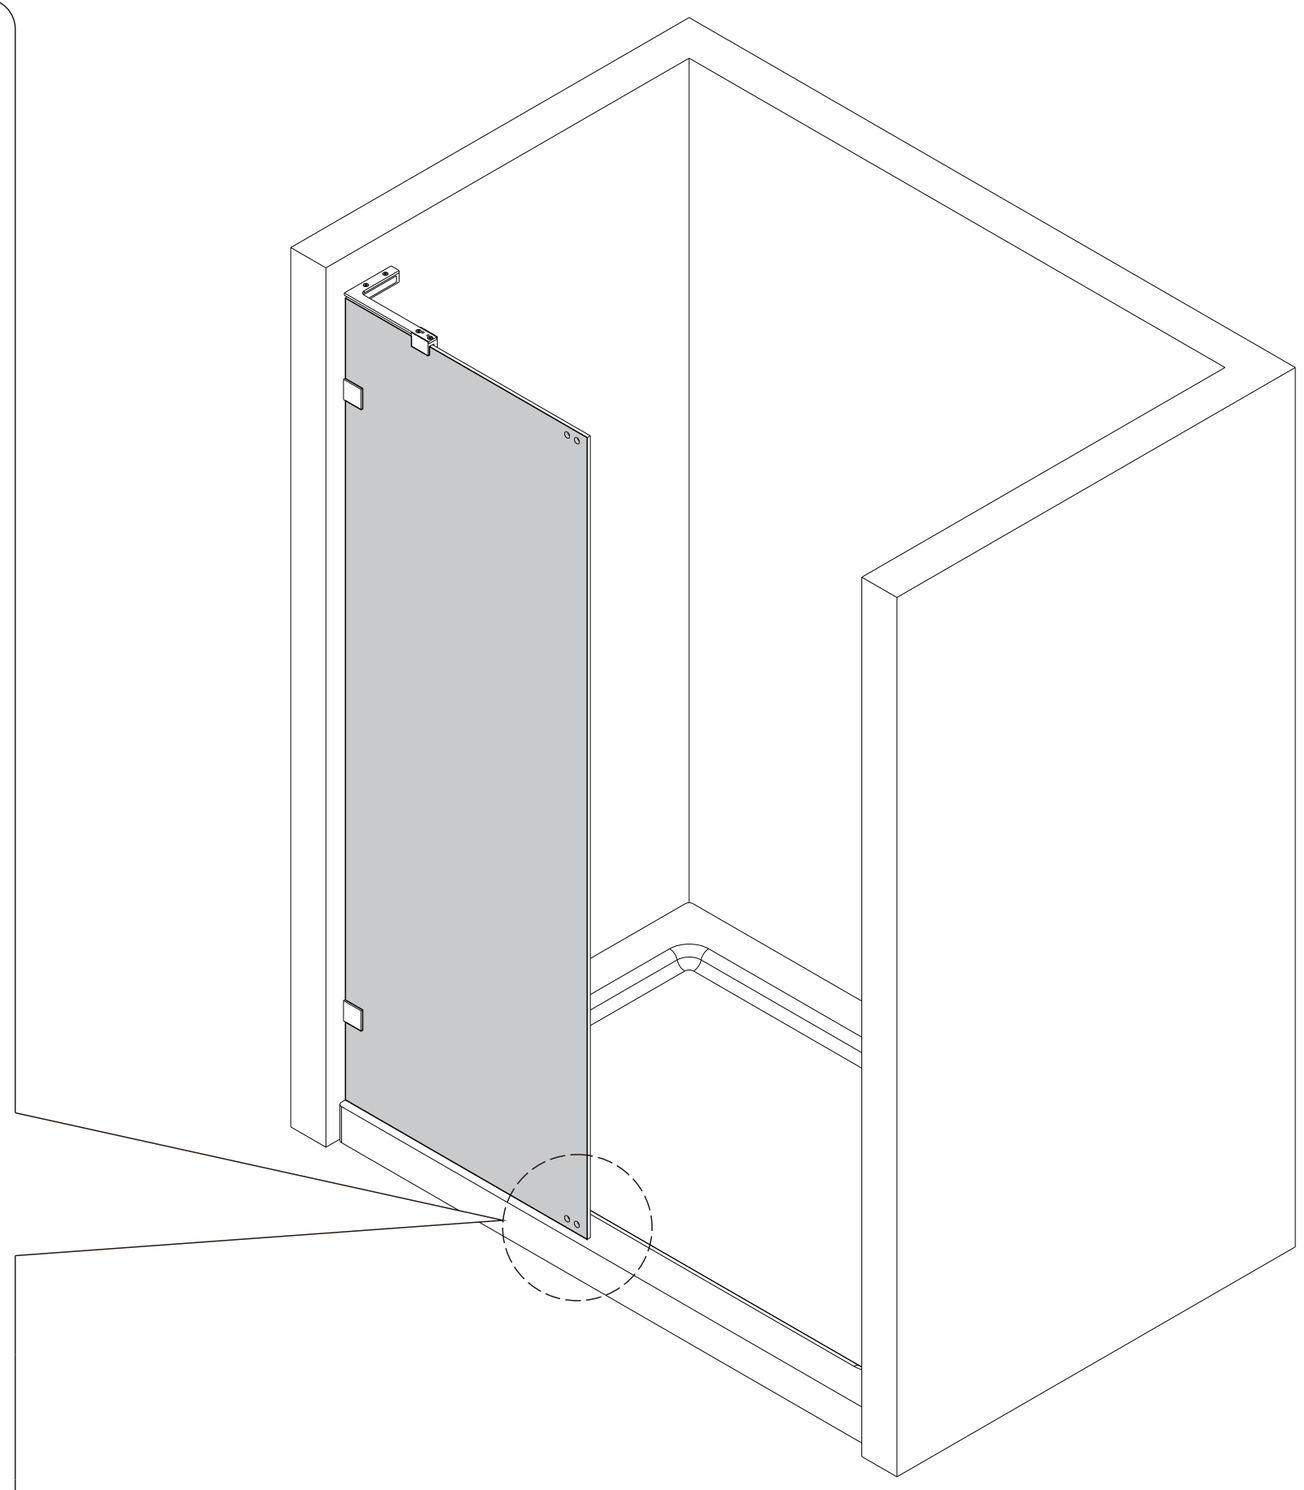

The shower room can be installed from left to right, please confirm the installation direction, the installation direction of this manual is the left door, if the installation direction is the right door, the installation sequence of the **Pivot Sleeve(E&F)** is reversed.

5-2 Install **Wall Anchor(aa)**

NOTE

1.Remove the **Pivot Sleeve(E)** from the **Stationary Glass(C)** as Fig.a .
2. Drill holes with Φ6mm(1/4") drill bit as Fig.b.
3. Insert the **Wall Anchors(aa)** as Fig.c.

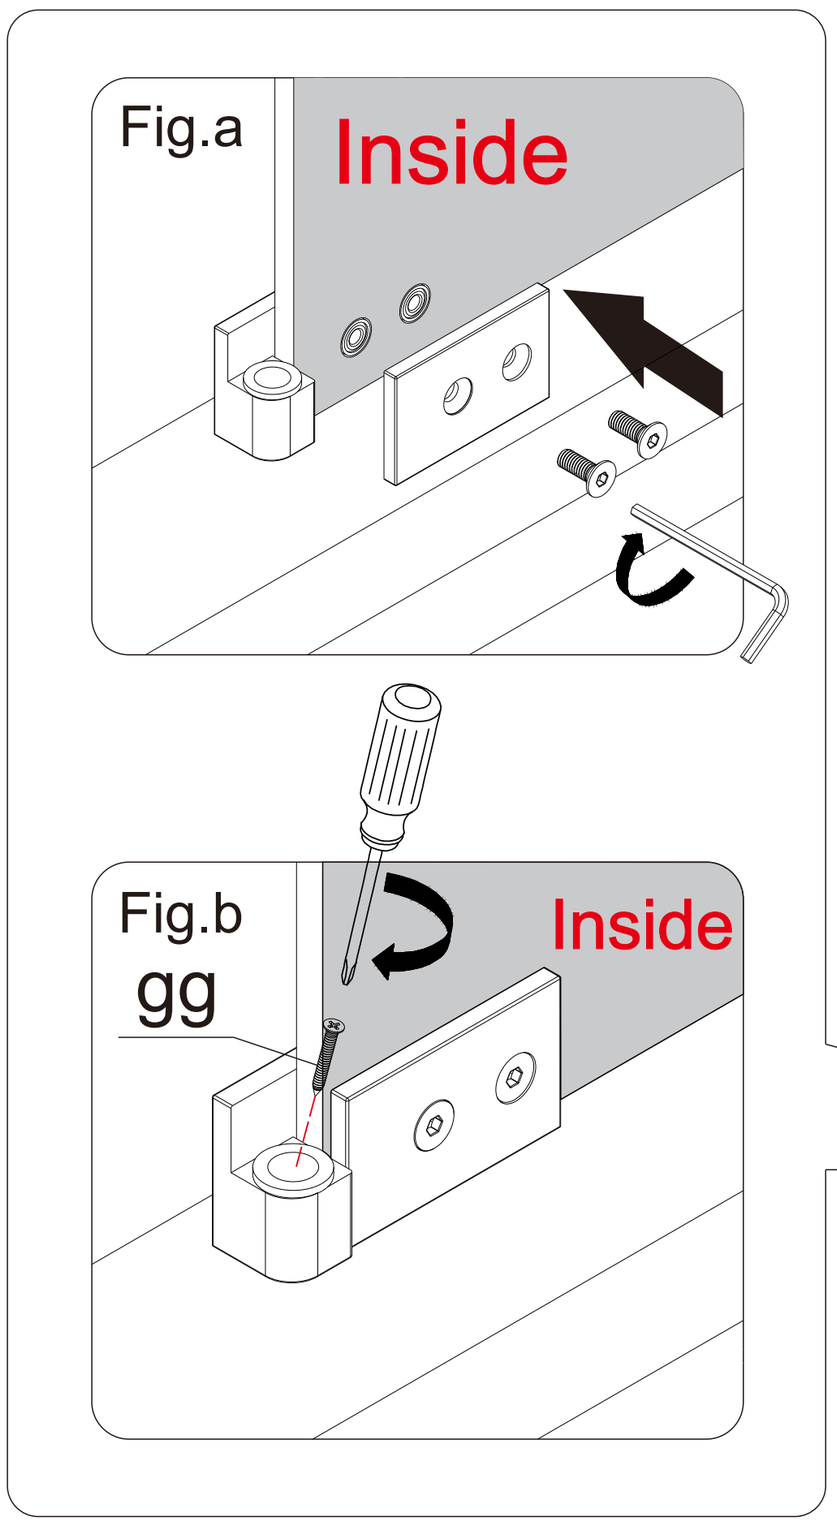

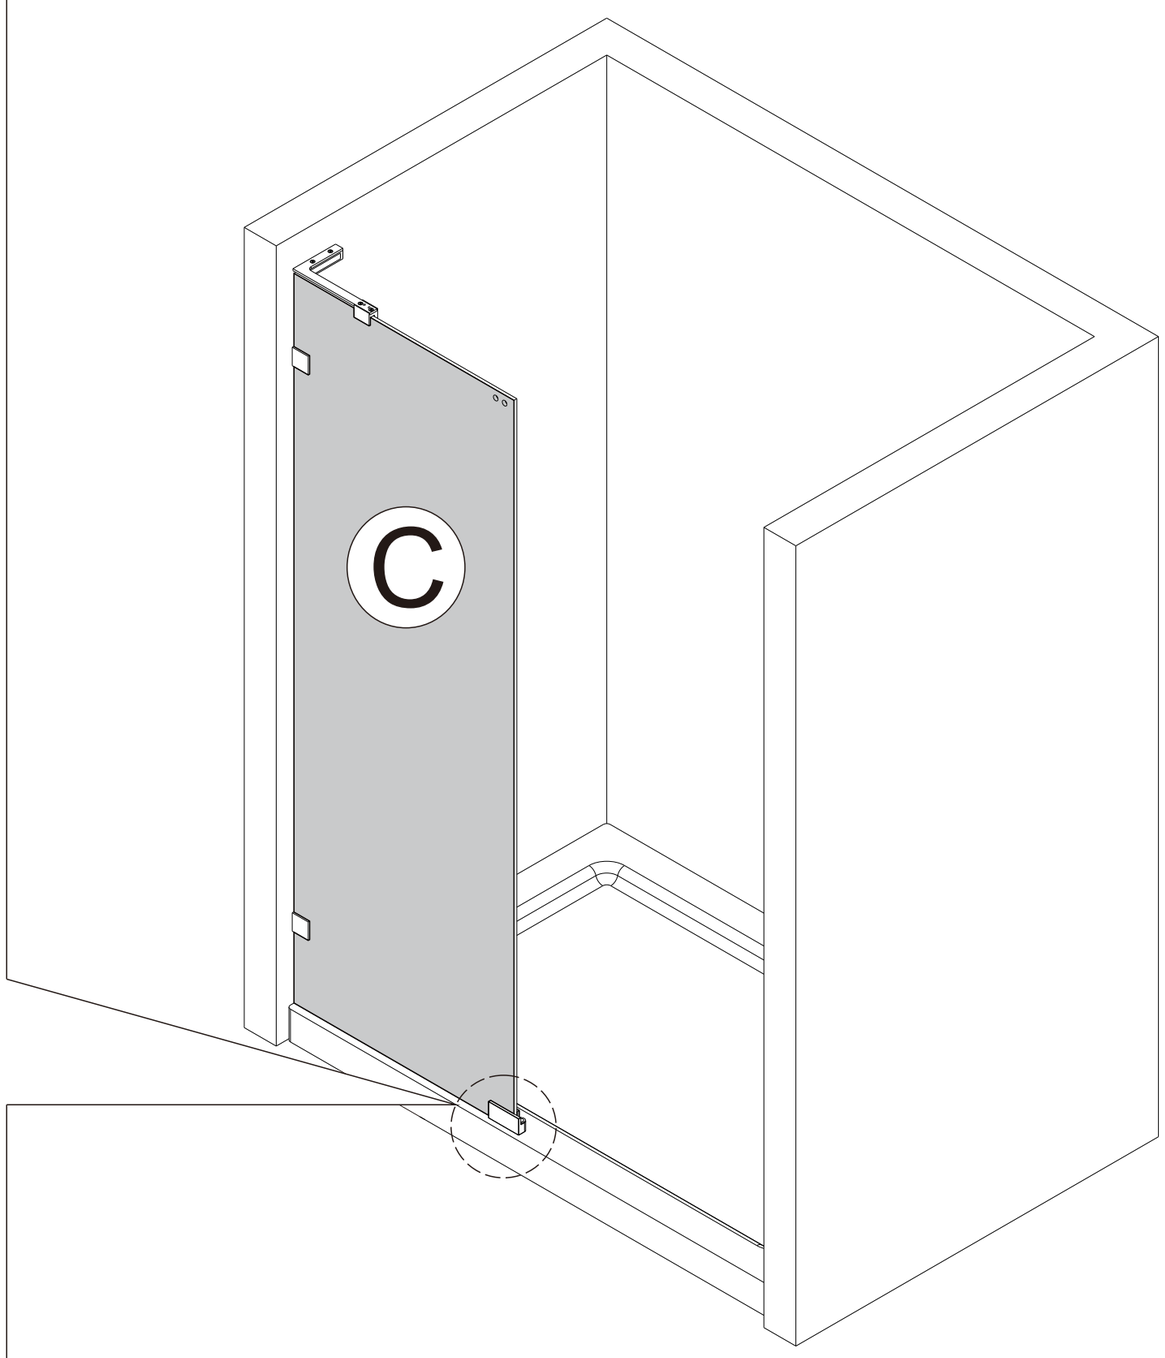

The shower room can be installed from left to right, please confirm the installation direction, the installation direction of this manual is the left door, if the installation direction is the right door, the installation sequence of the **Pivot Sleeve(E&F)** is reversed.

5-3 Install **Pivot Sleeve(E)**

NOTE

1.Install the **Pivot Sleeve(E)** on the **Stationary Glass(C)** as Fig.a .
2.Fix the **Pivot Sleeve(E)** with **Screws (gg)** as Fig.b

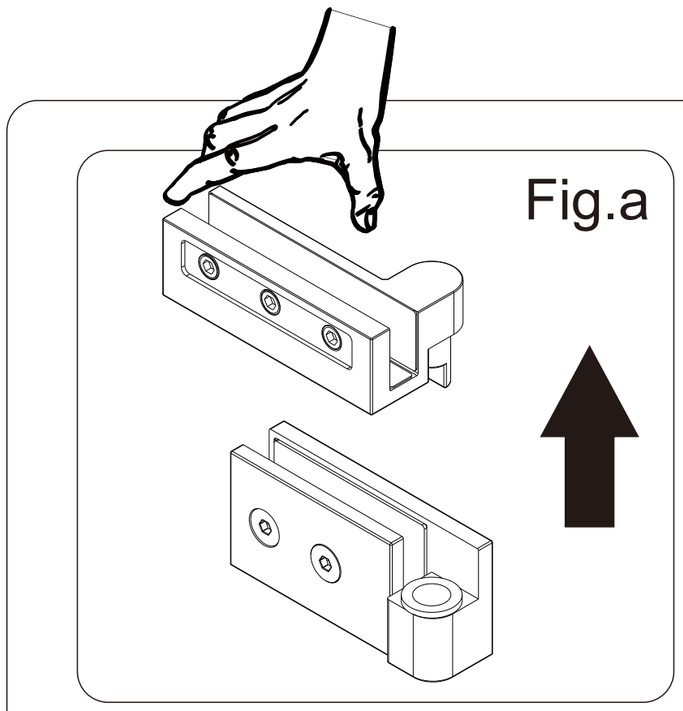

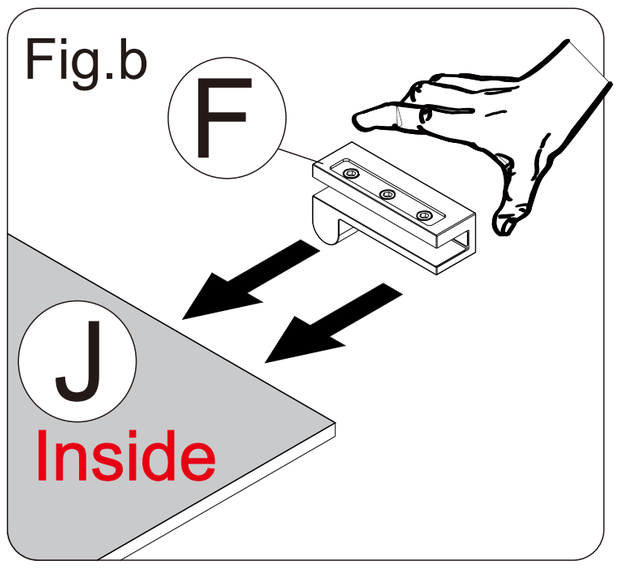

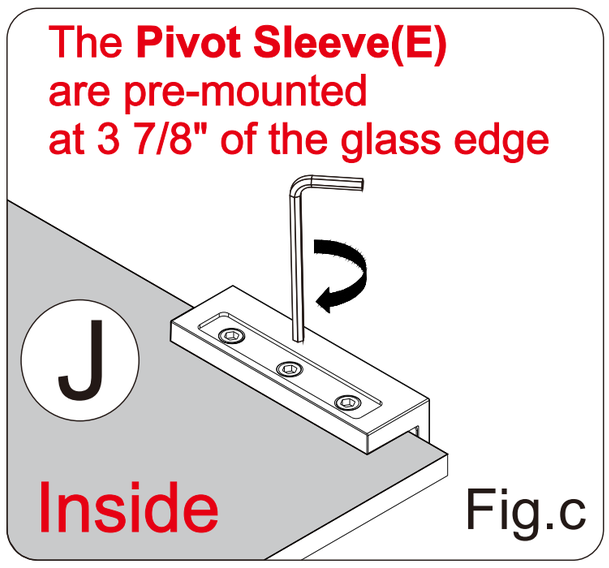

6 Install **Pivot Sleeve(E&F)**

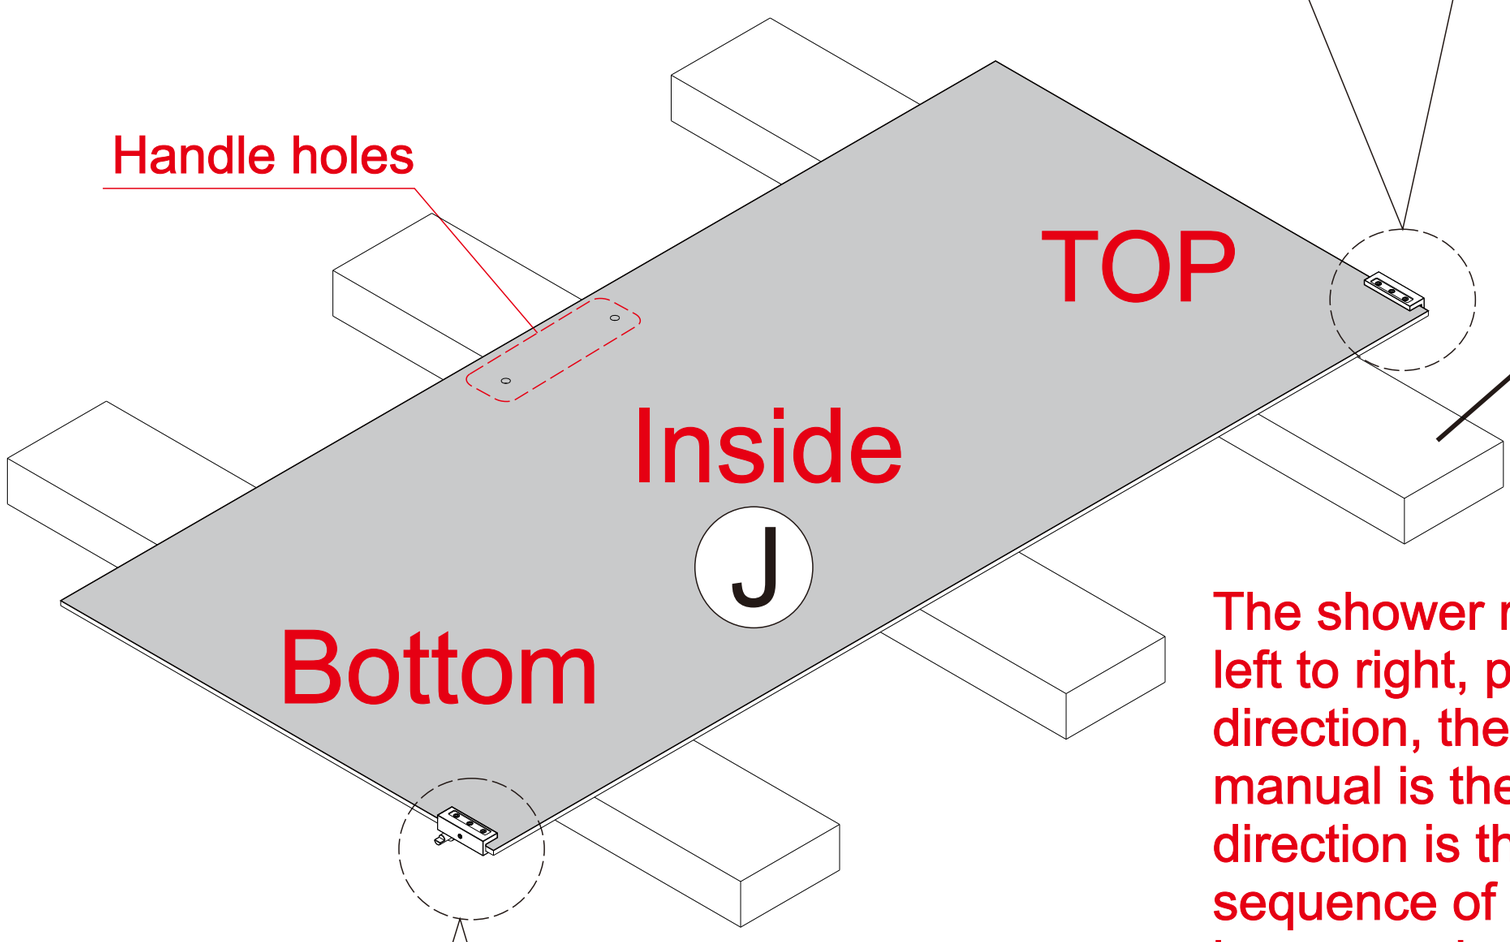

NOTE

1.Install the **Pivot Sleeve(F)** on the **Glass Door(J)** as Fig.a、Fig. b and Fig.c
2.Install the **Pivot Sleeve(E)** on the **Glass Door(J)** as Fig.d and Fig. e .

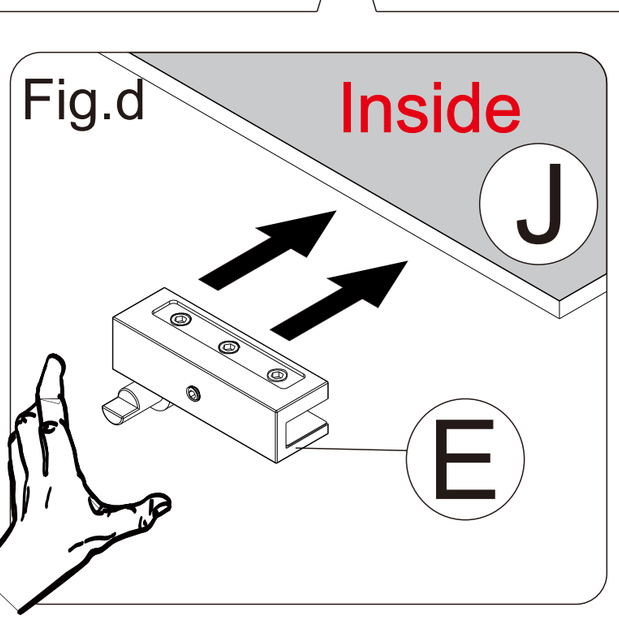

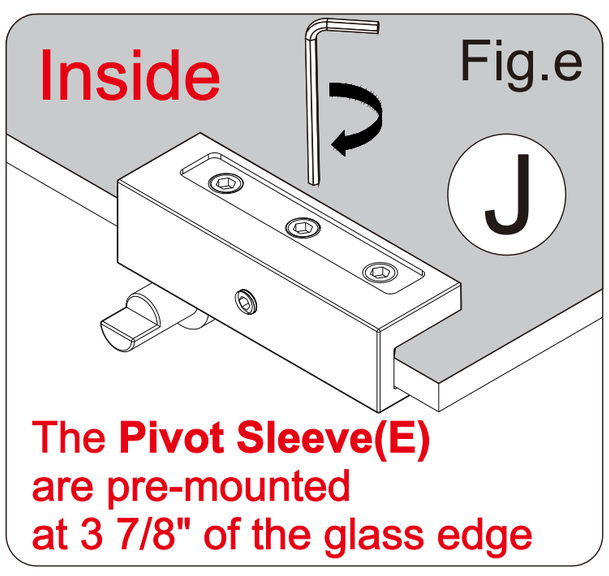

The shower room can be installed from left to right, please confirm the installation direction, the installation direction of this manual is the left door, if the installation direction is the right door, the installation sequence of the **Pivot Sleeve(E&F)** is reversed.

CAUTION: Do not put glass directly on the ground

7 Install **Glass Door(J)**

NOTE

Hold the moving glass and put the bottom **Pivot Sleeve(E) into the hole of the bottom** pivot bracket, insert a Styrofoam under the **Glass Door(J) to hold the glass as Fig.a .**

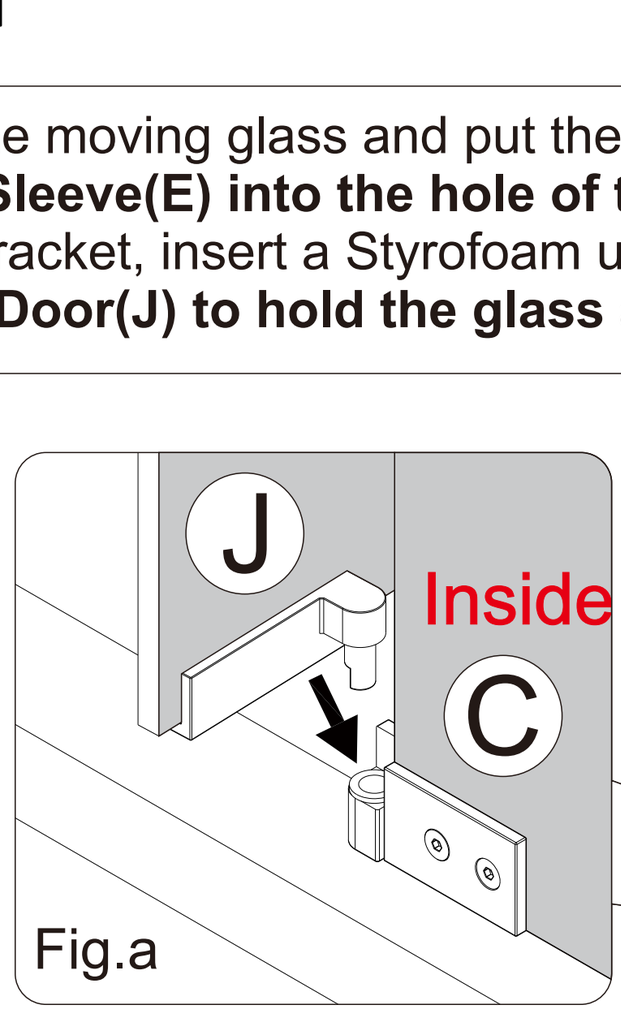

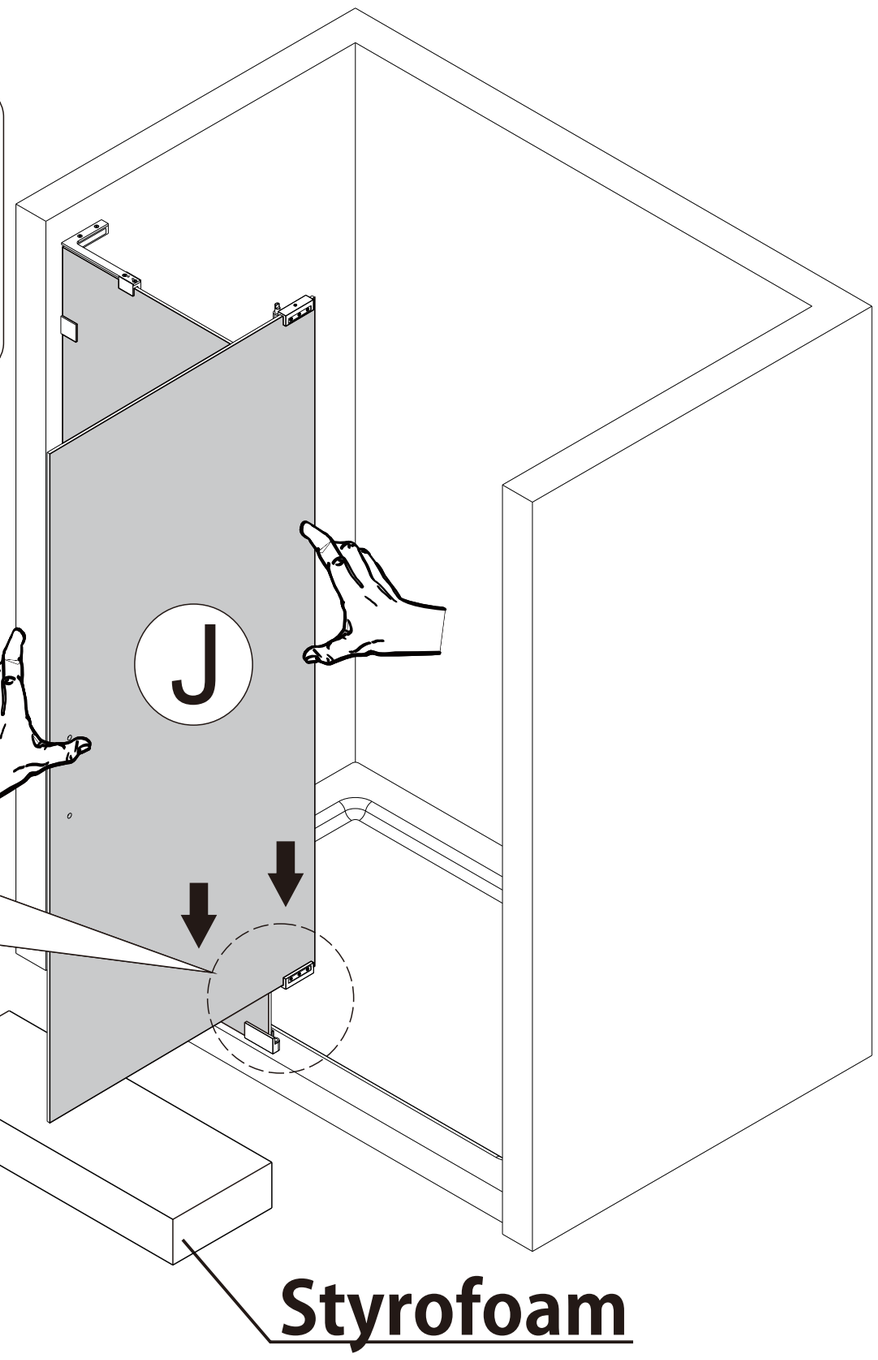

Fig.a

NOTE

Fit the Pivot Sleeve(F) into the pivot bracket on the **Stationary Glass(C)** and fix it as Fig.b and Fig.c

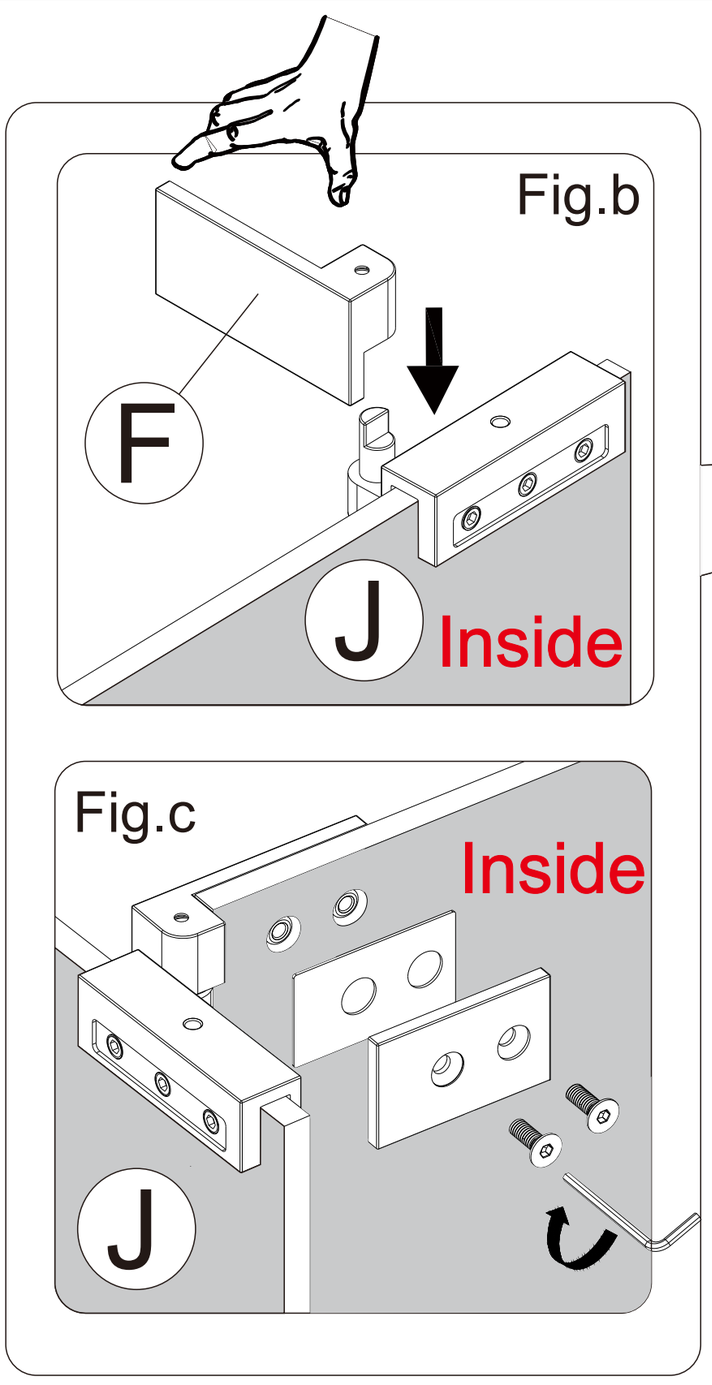

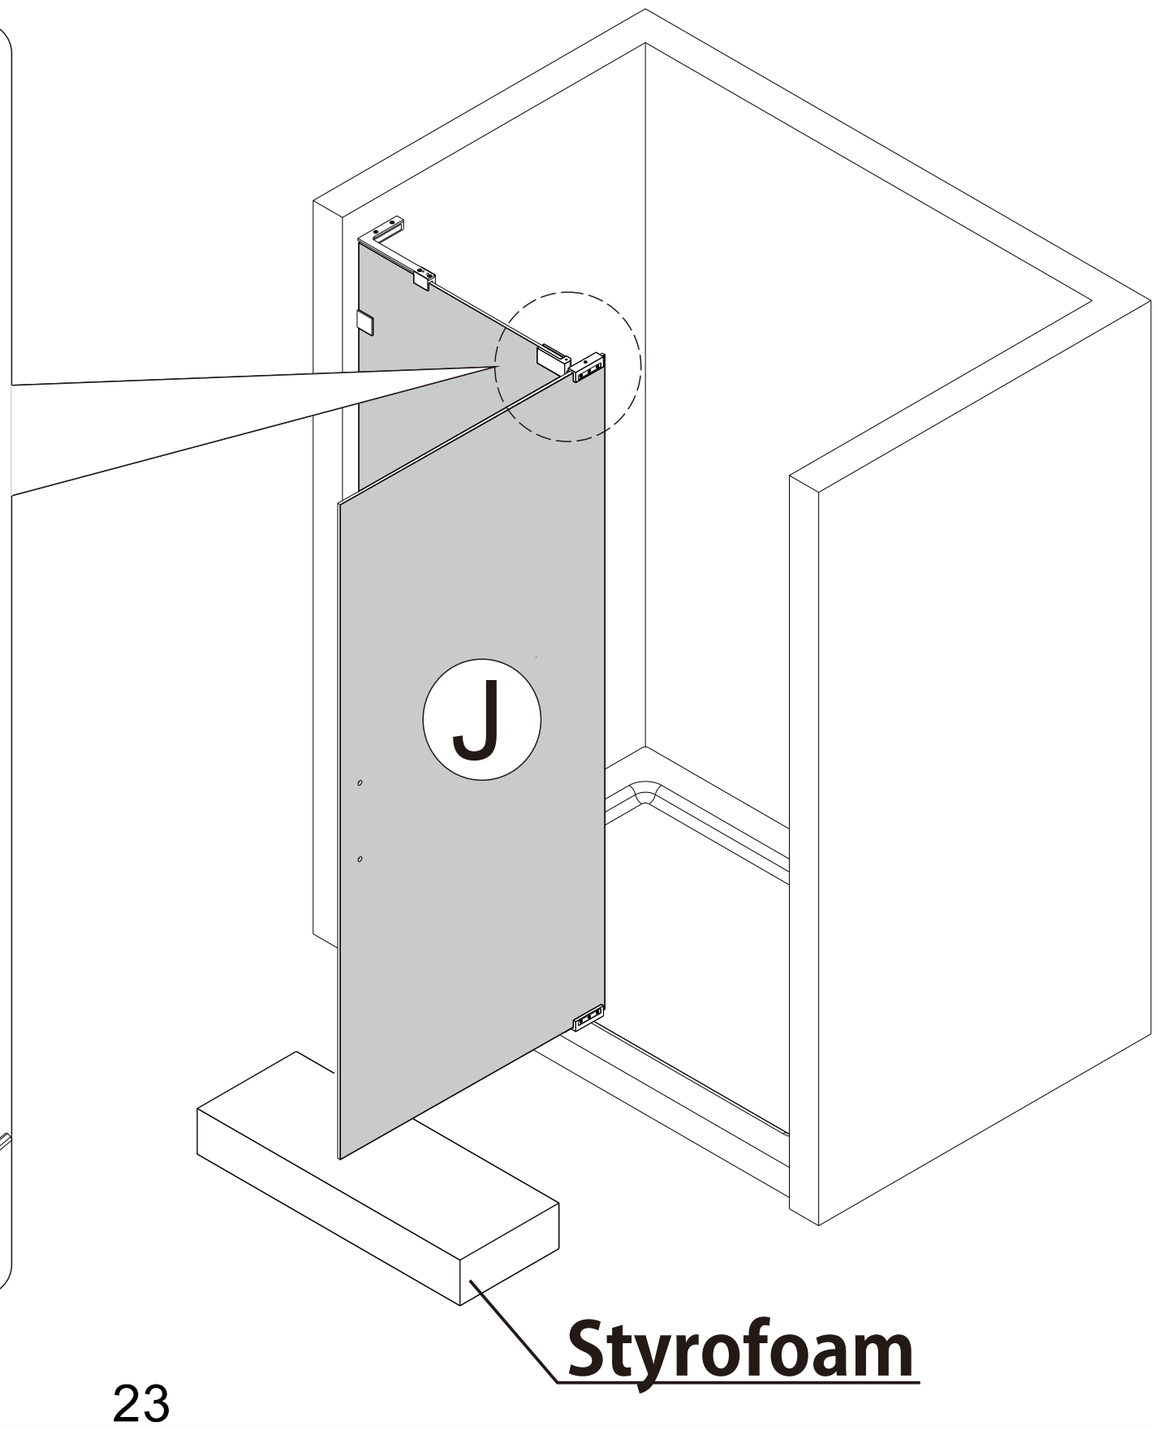

Fig.b

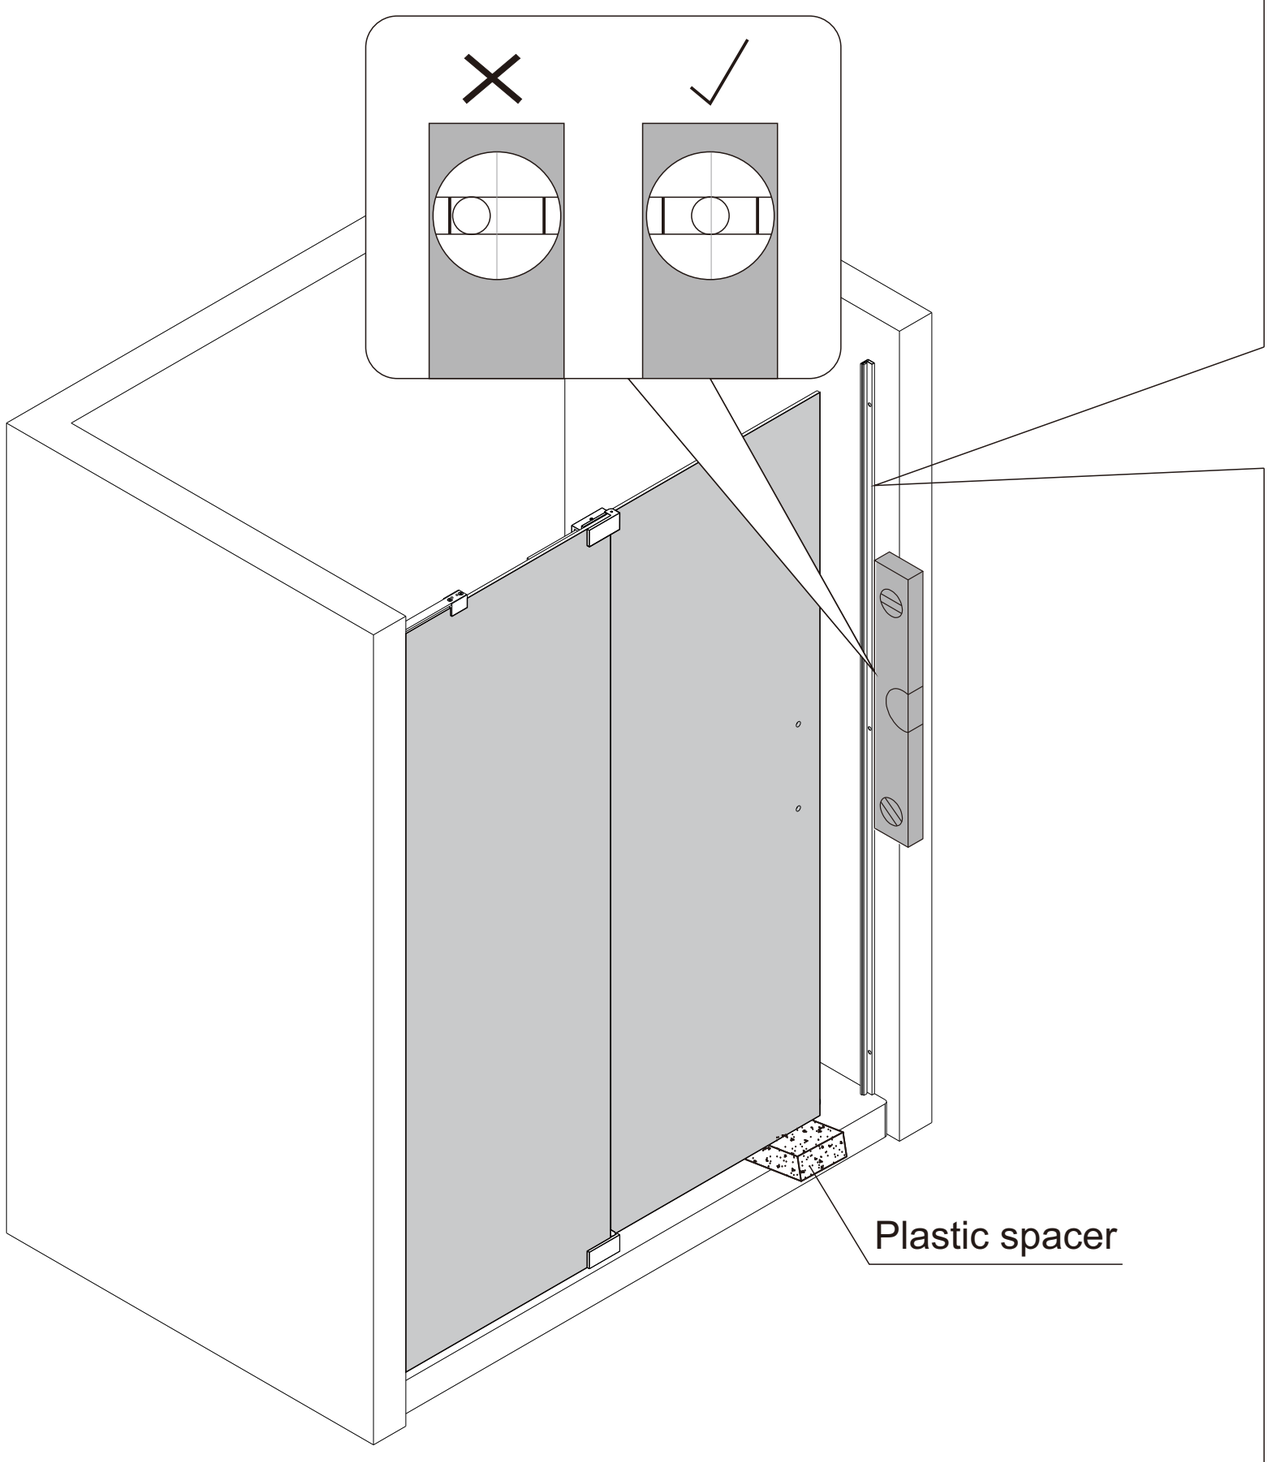

Fig.c

8 Determine your step in from the edge of tray and plumb your **Wall Jamb(G)**.

NOTE

1. Determine your starting point from the edge of tray (3/8" (10mm) is recommended) and mark the position as Fig.a .
2. Plumb your **Wall Jambs(G)** on each side and then mark screw holes position as Fig.b .

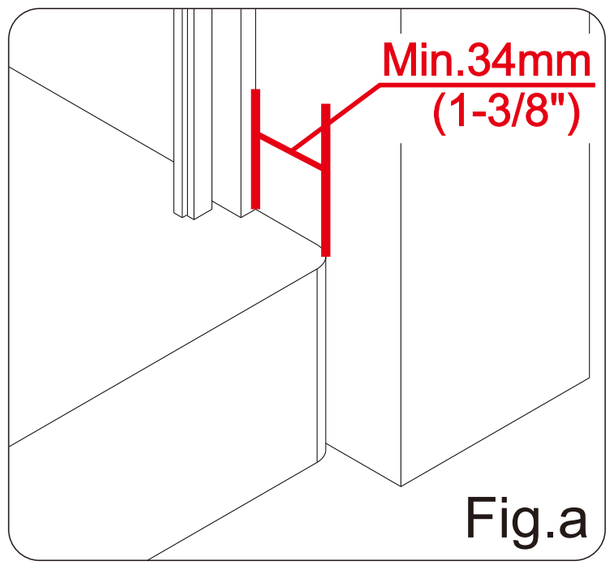

Fig.a

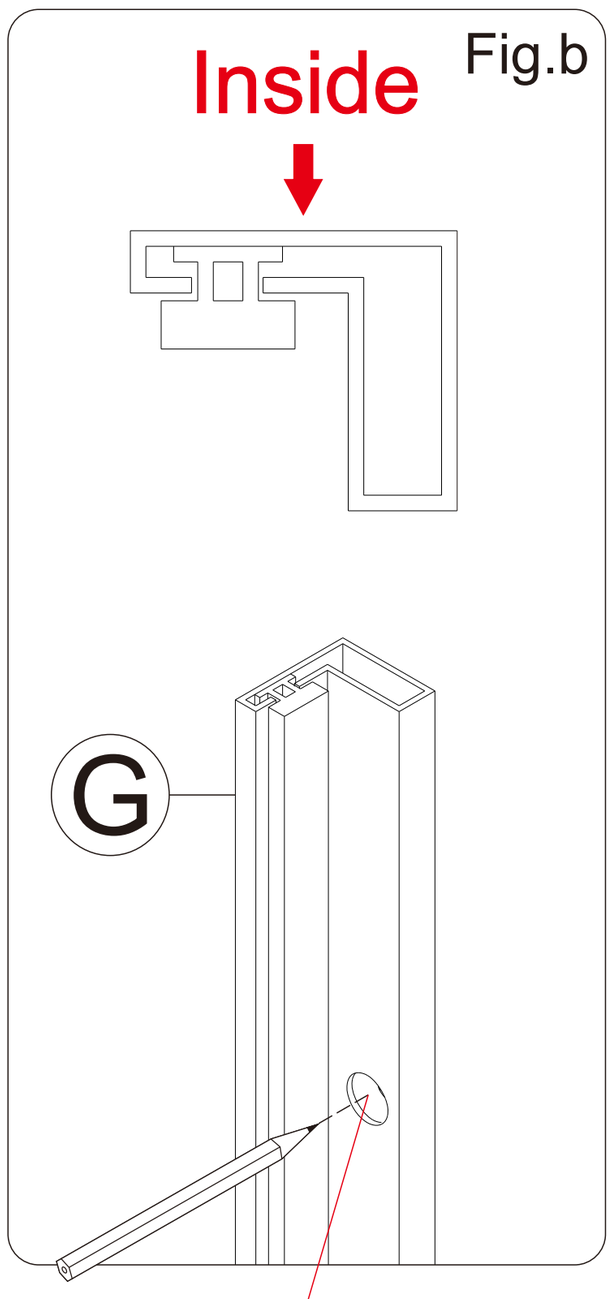

Fig.b

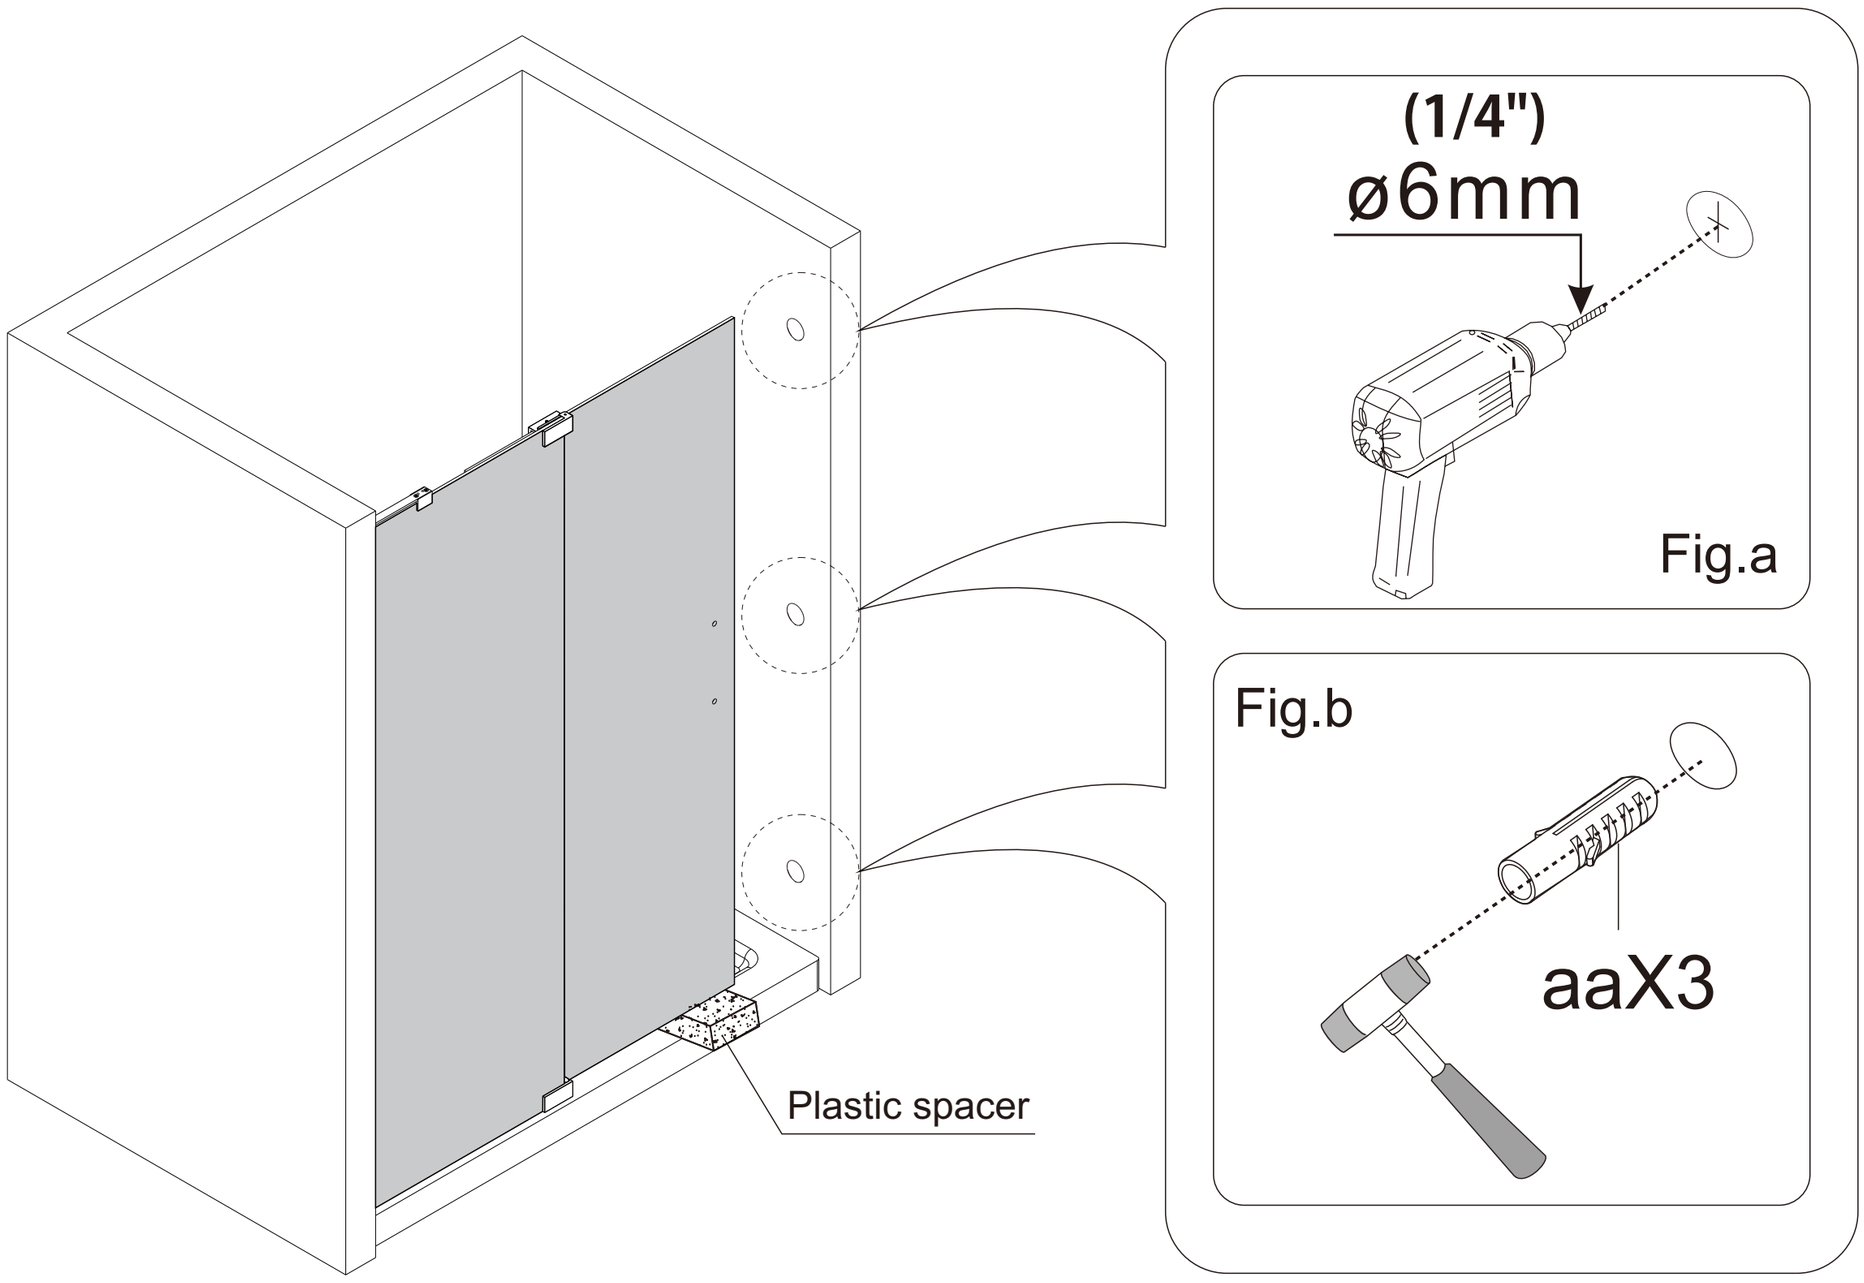

Note: Mark the hole positions with a pencil.

Note: The shower door can be installed left or right, according to the need to determine the installation direction.

9 Install **Wall Anchor(aa)**

NOTE

1.Drill holes with ϕ6mm(1/4") drill bit as Fig.a .
2.Insert **Wall Anchors(aa)** as Fig.b .

CAUTION: Do not put glass directly on the ground

NOTE

● If a Stud is present behind the wall:
drill Φ1/8″(3mm) pilot holes into the stud and use the ST4.0x40mm **Screws(ee)**
OR
● If NO Stud is present behind the wall:
drill Φ1/4"(6mm) holes and insert the **Wall Anchors(aa)** and use the ST4.0x40mm **Screws(ee)**.

Note: The shower door can be installed left or right, according to the need to determine the installation direction.

10 Install **Wall Jamb(G)**

NOTE

1.Fix **Wall Jamb(G)** with **Screw(bb)** as Fig.a .
2.Install the **Wall Jamb Cap(cc)** to the **Wall Jamb(G)** as Fig.b .

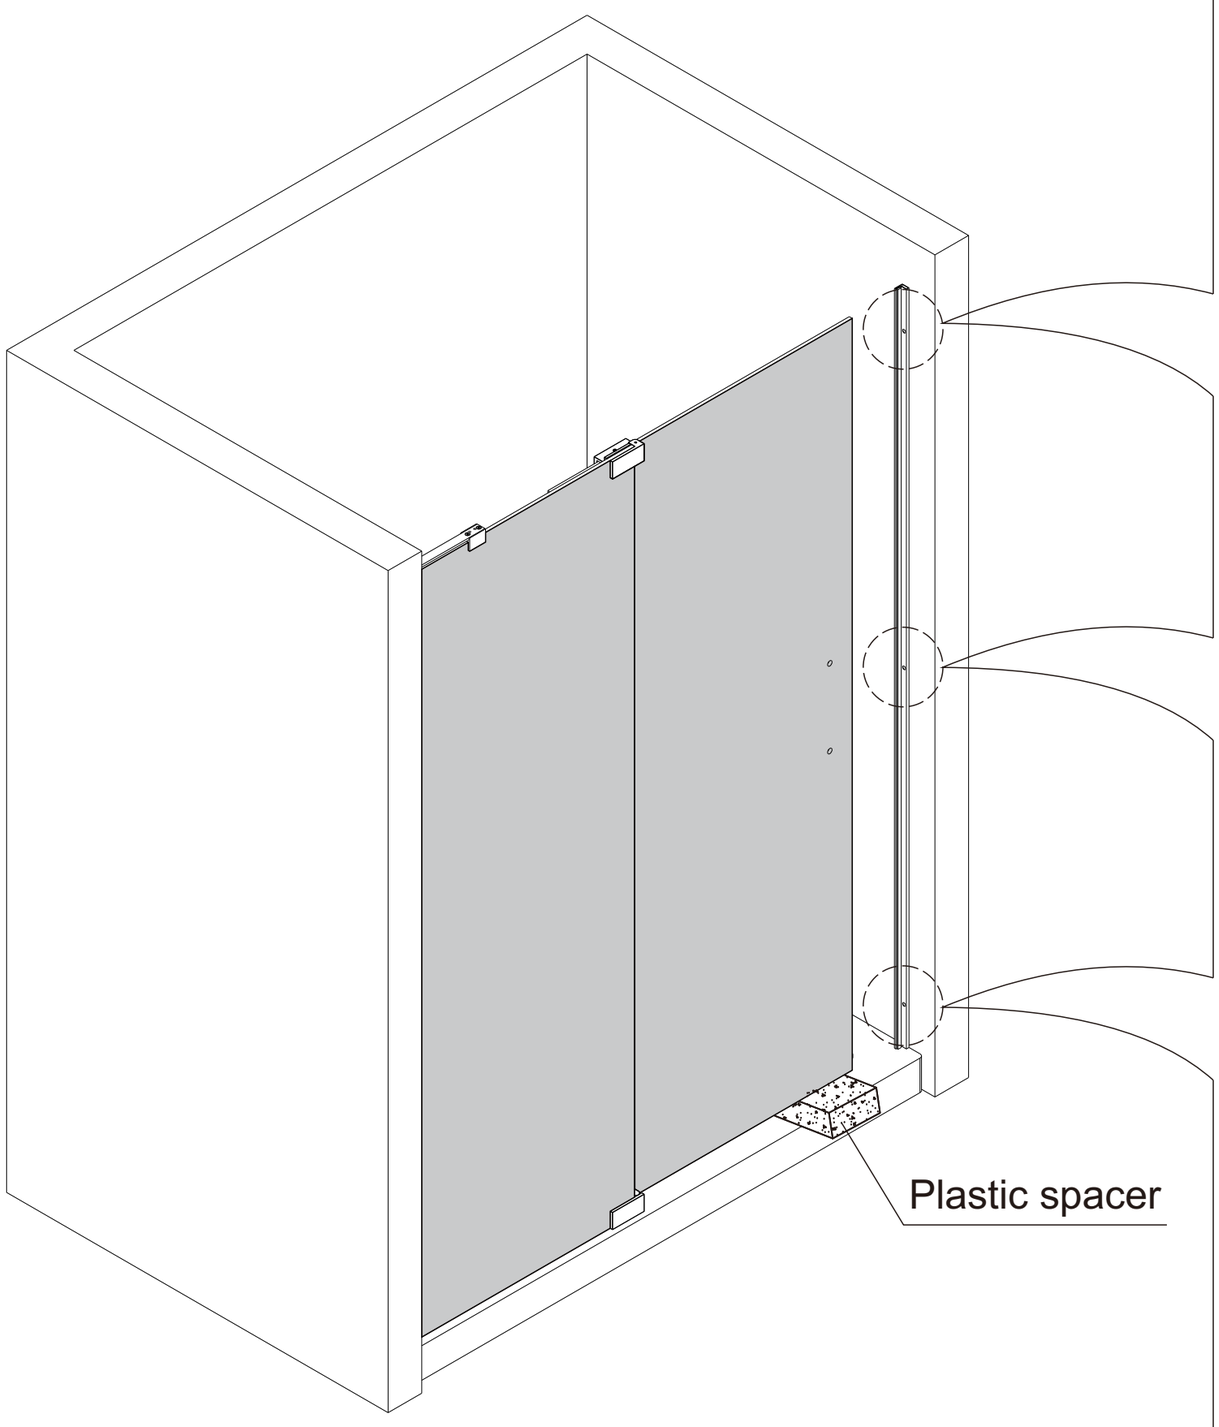

Fig.a

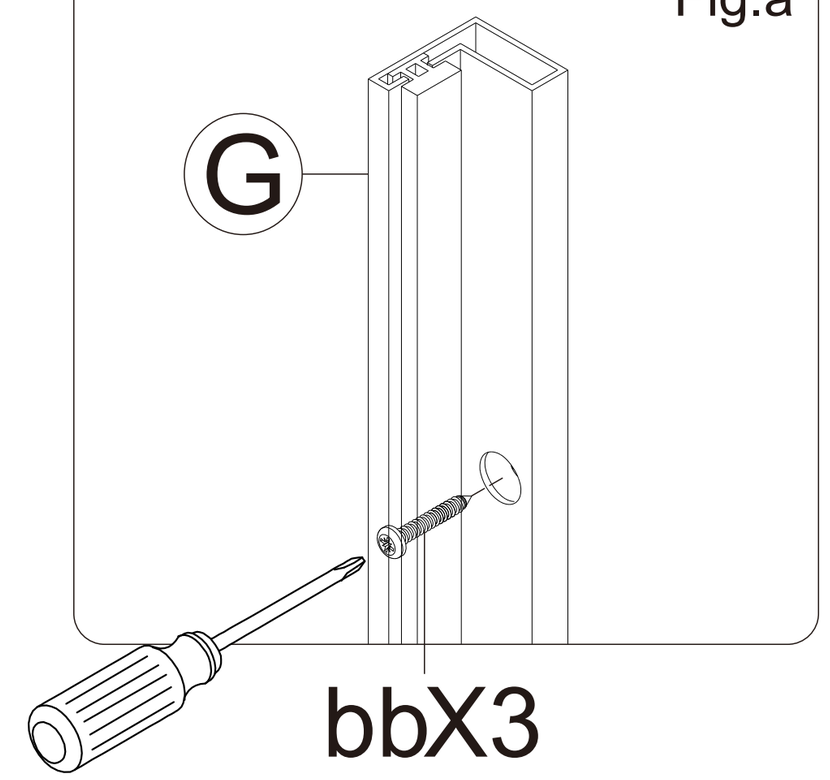

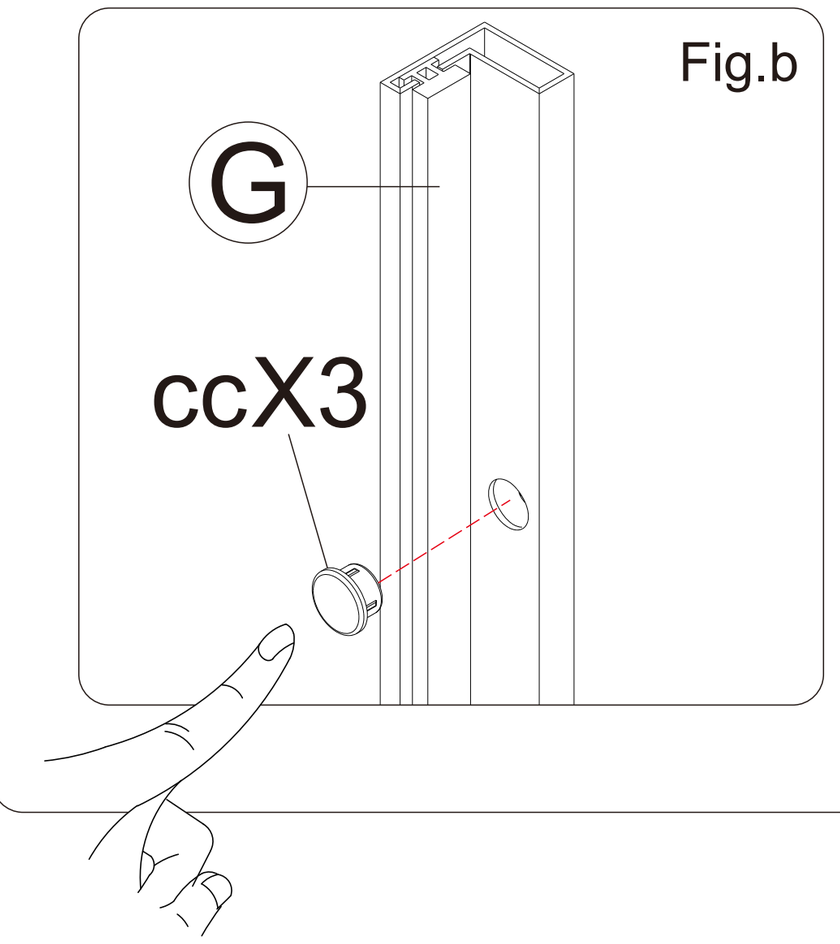

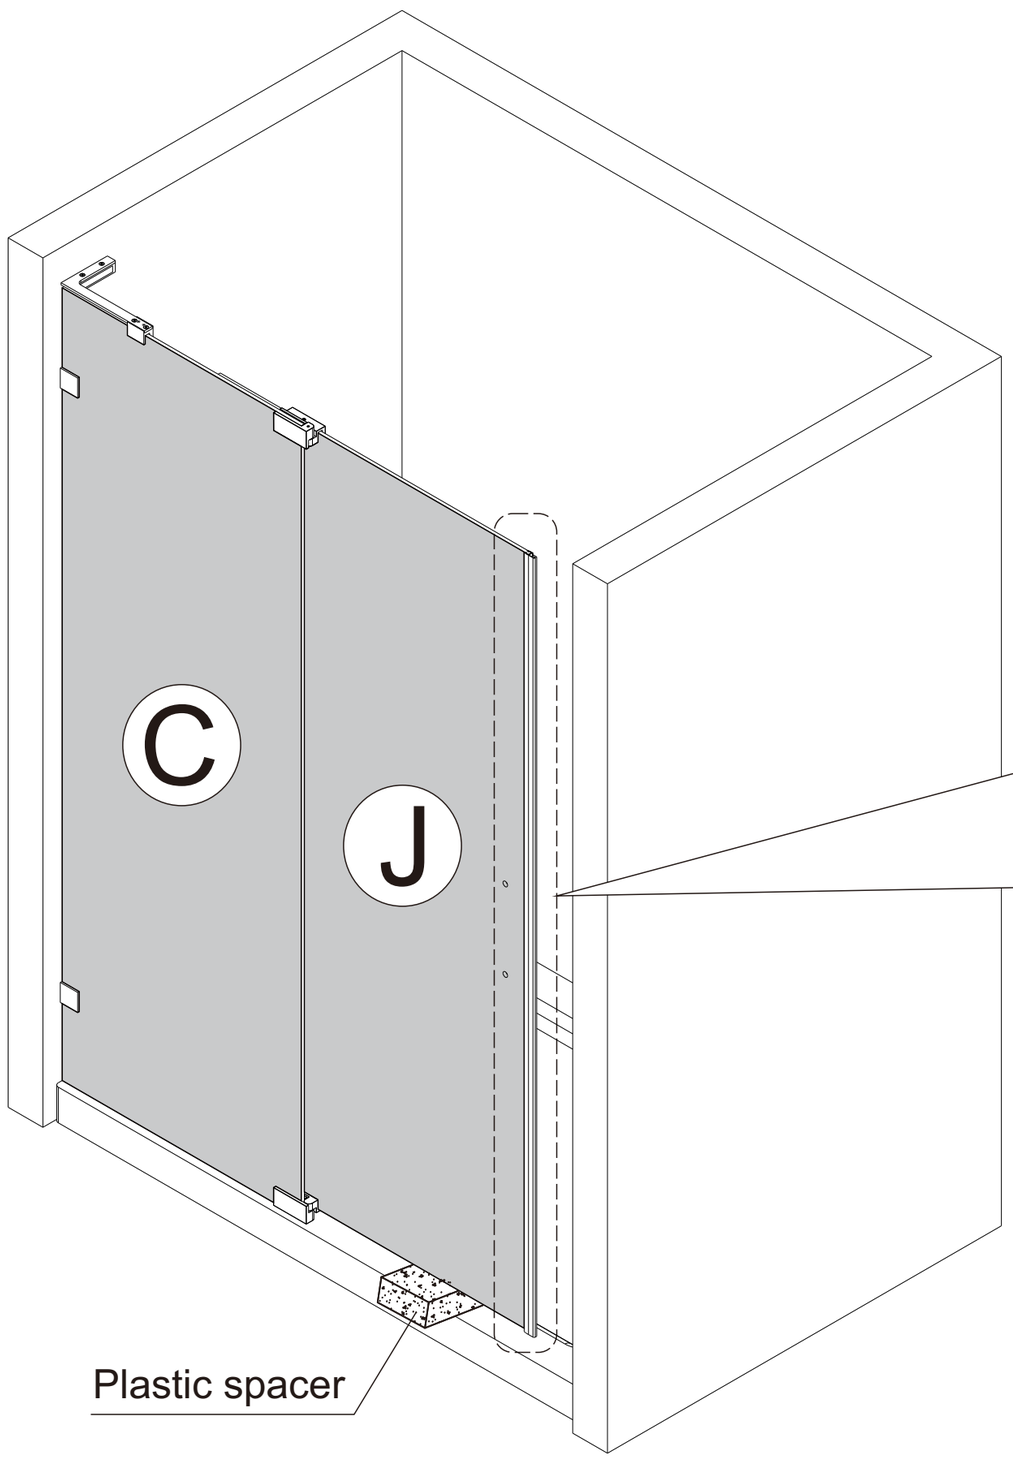

Fig.b

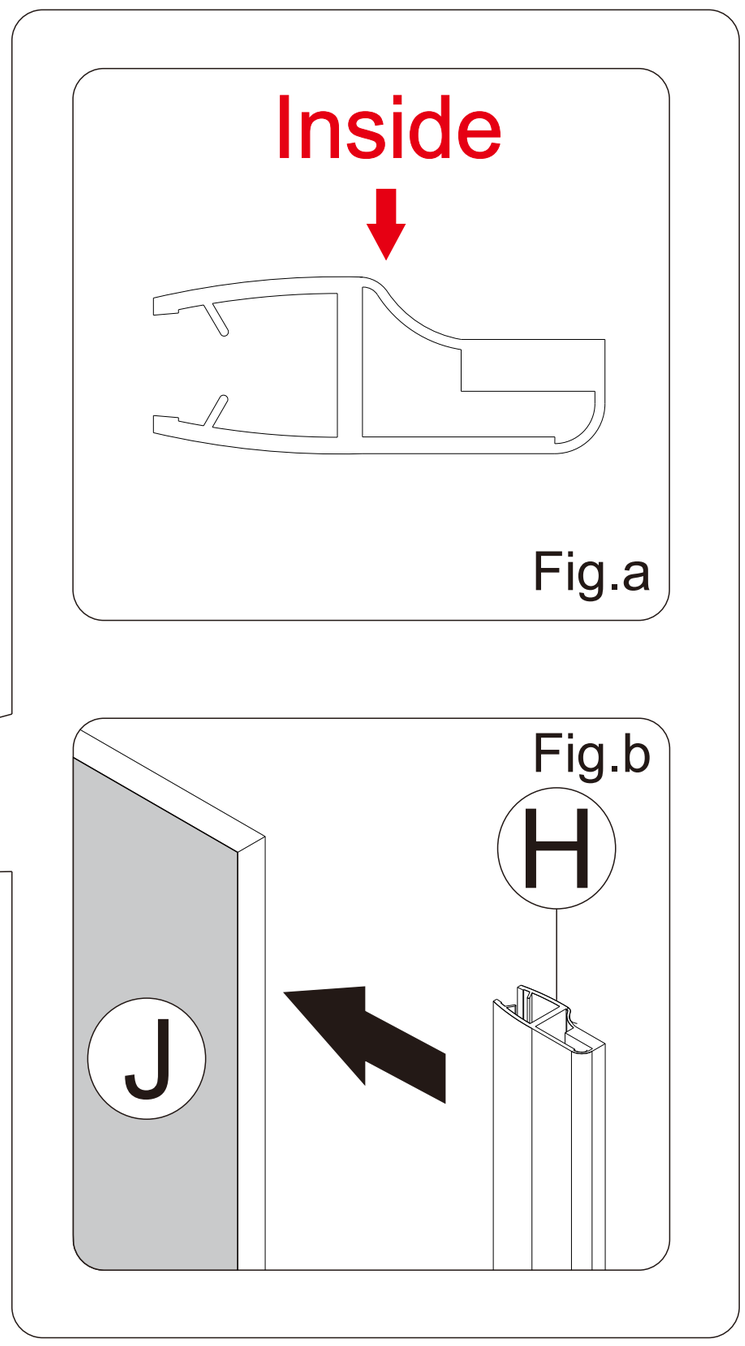

11 Install **Magnetic Strip(H)**

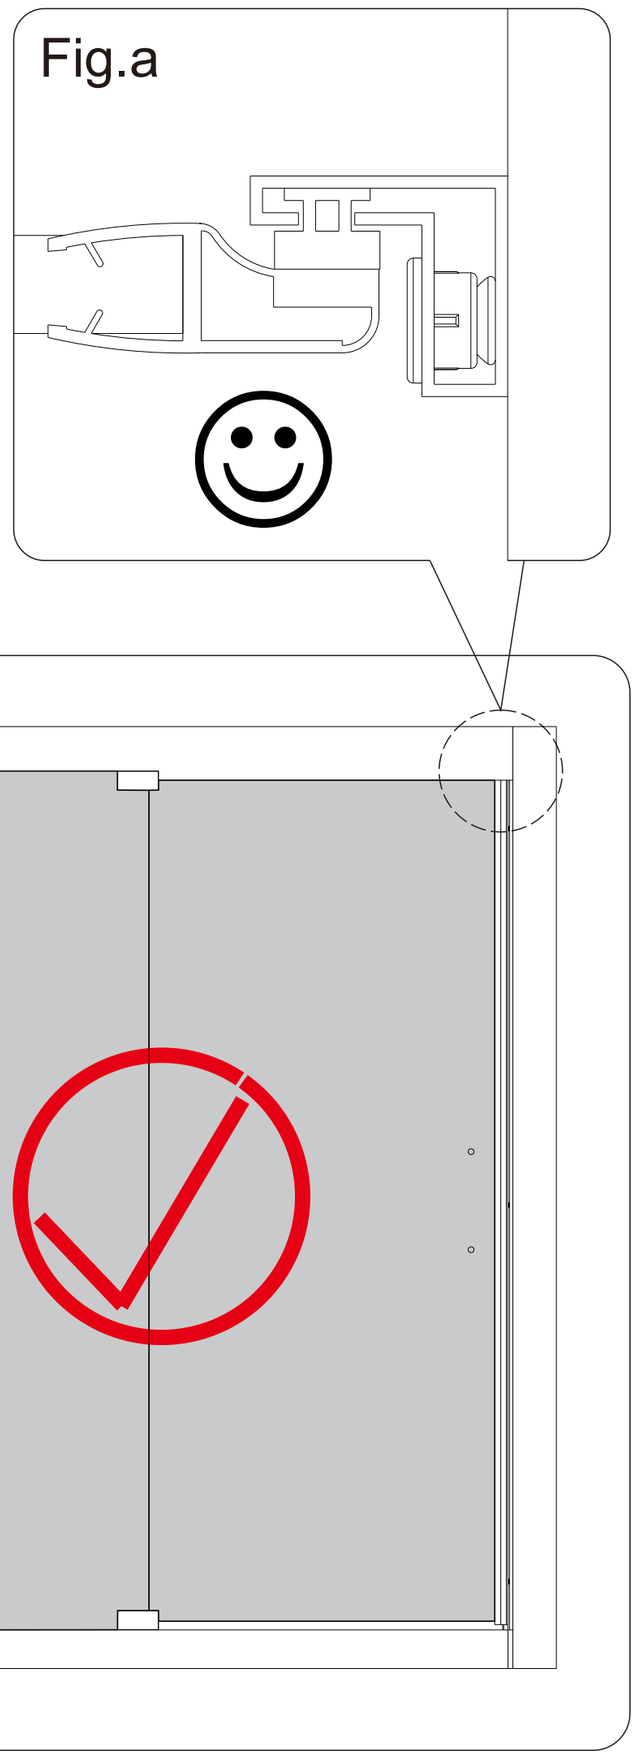

NOTE

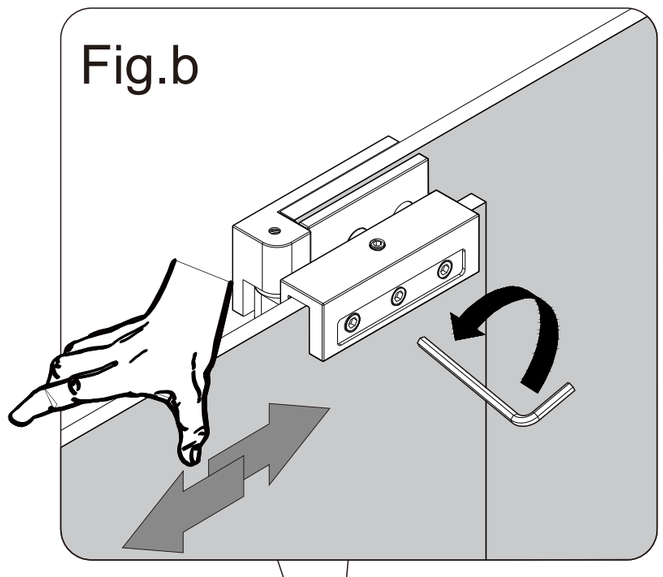

1.Install the **Magnetic Stripe(H)** on the **Glass Door(J)** as Fig.a and Fig.b .

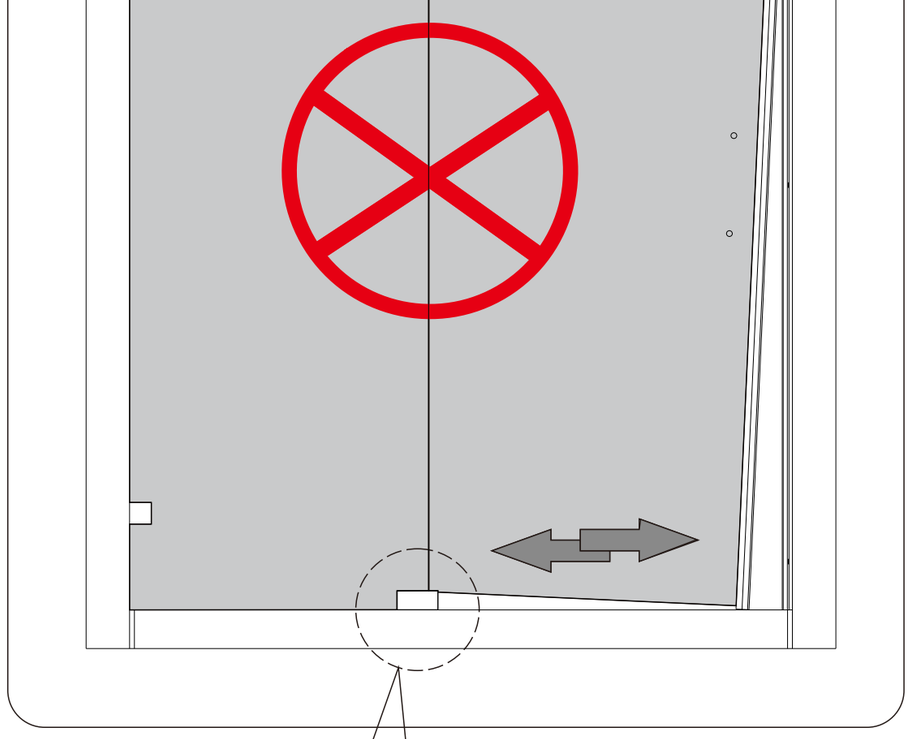

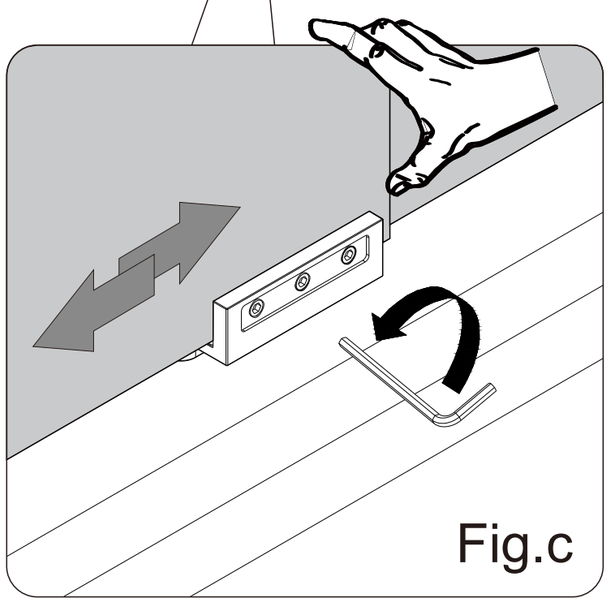

12 Adjustment

NOTE

Loosen the **Pivot Sleeve(E&F)** screws and adjust the **Glass Door (J)** left and right to ensure that the **Magnetic Stripe(H)** fits perfectly with the magnetic stripe on the **Wall Jamb(G) as Fig.a、Fig. b and Fig.c .**

13 Install the **Threshold(M)** and **Decorative cover(L)**

NOTE

1.Measure the distance between the **Pivot Sleeve(E)** and the wall as Fig.a
2.Cut the **Threshold(M)** to the appropriate size as Fig.b .
3.Tear off the double-sided tape on the **Pivot Sleeve(M)** as Fig.c
4.Install the **Threshold(M)**and **Decorative cover(L)**as Fig.d

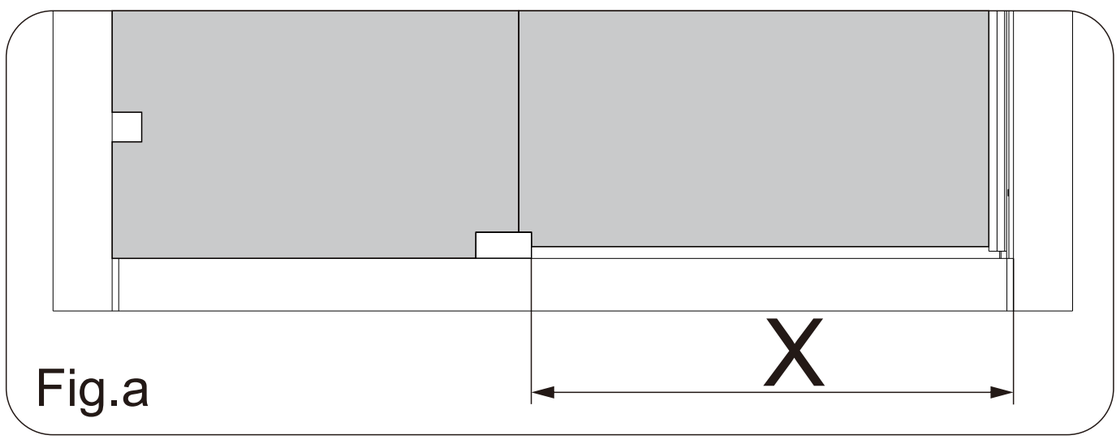

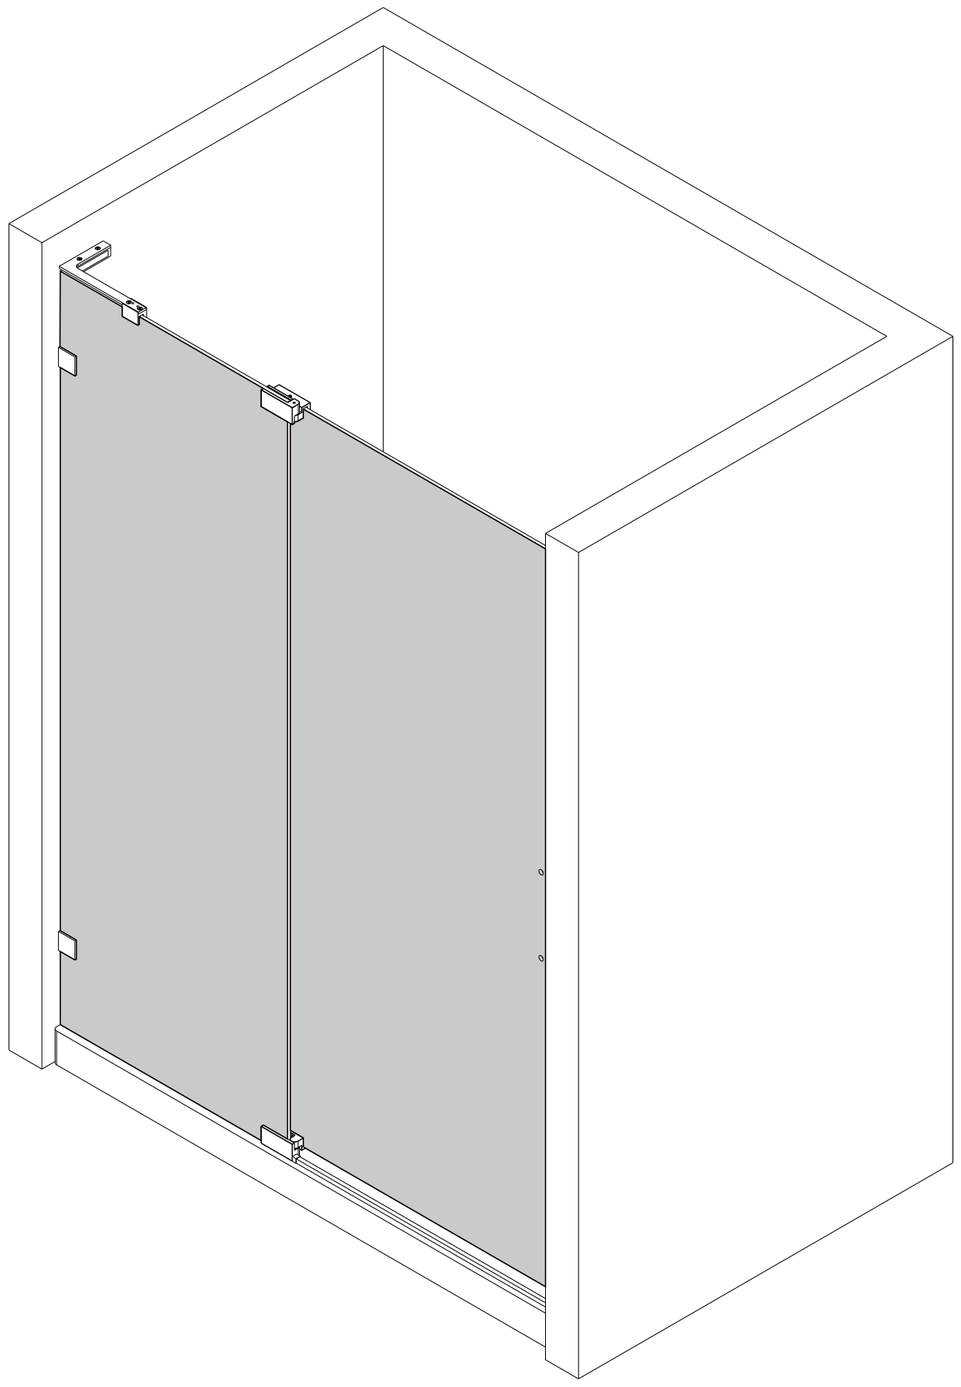

Fig.a

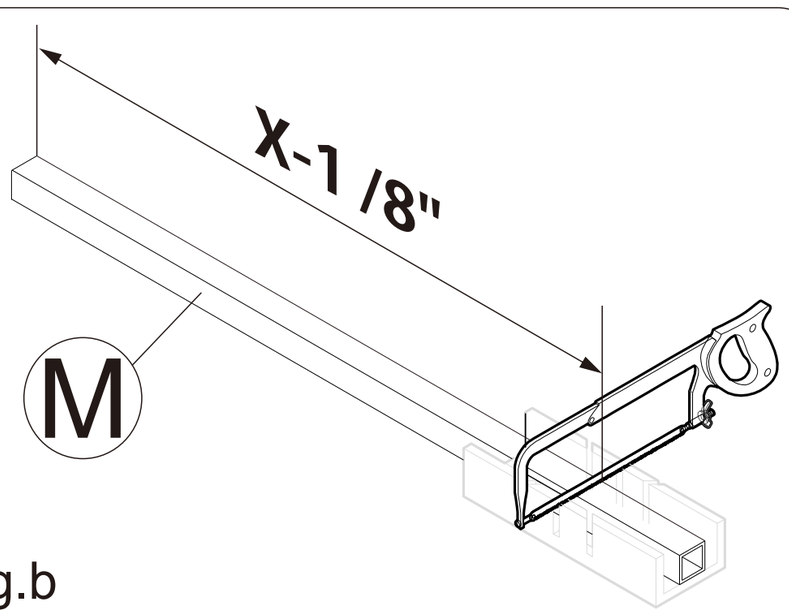

Fig.b

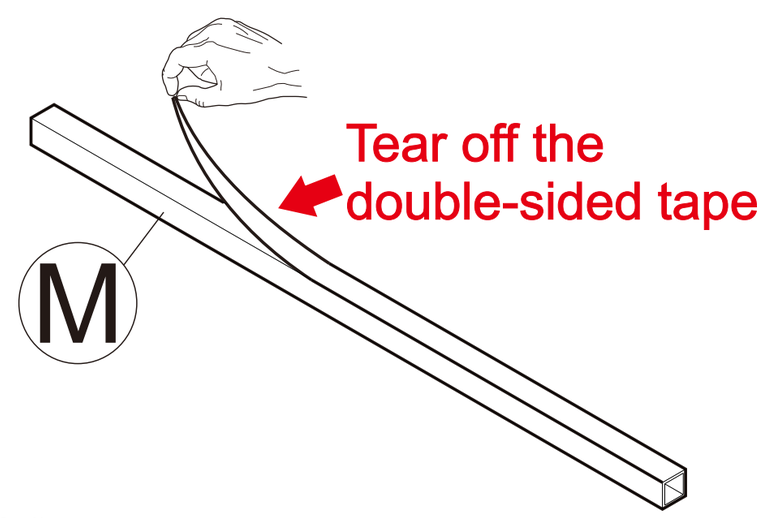

Fig.c

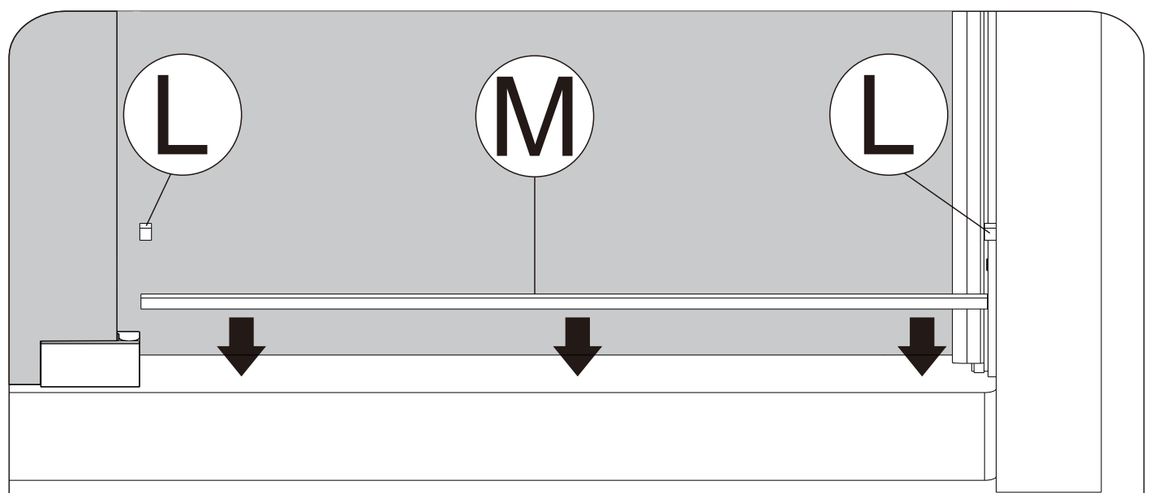

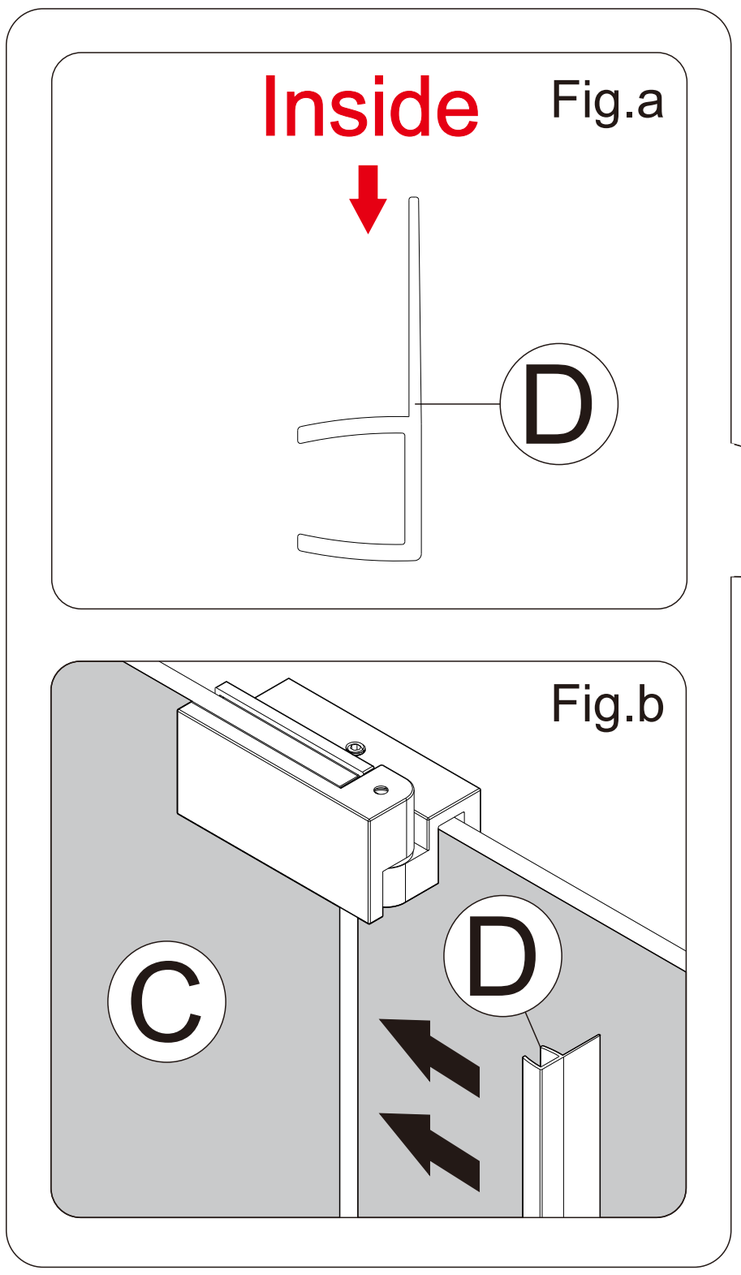

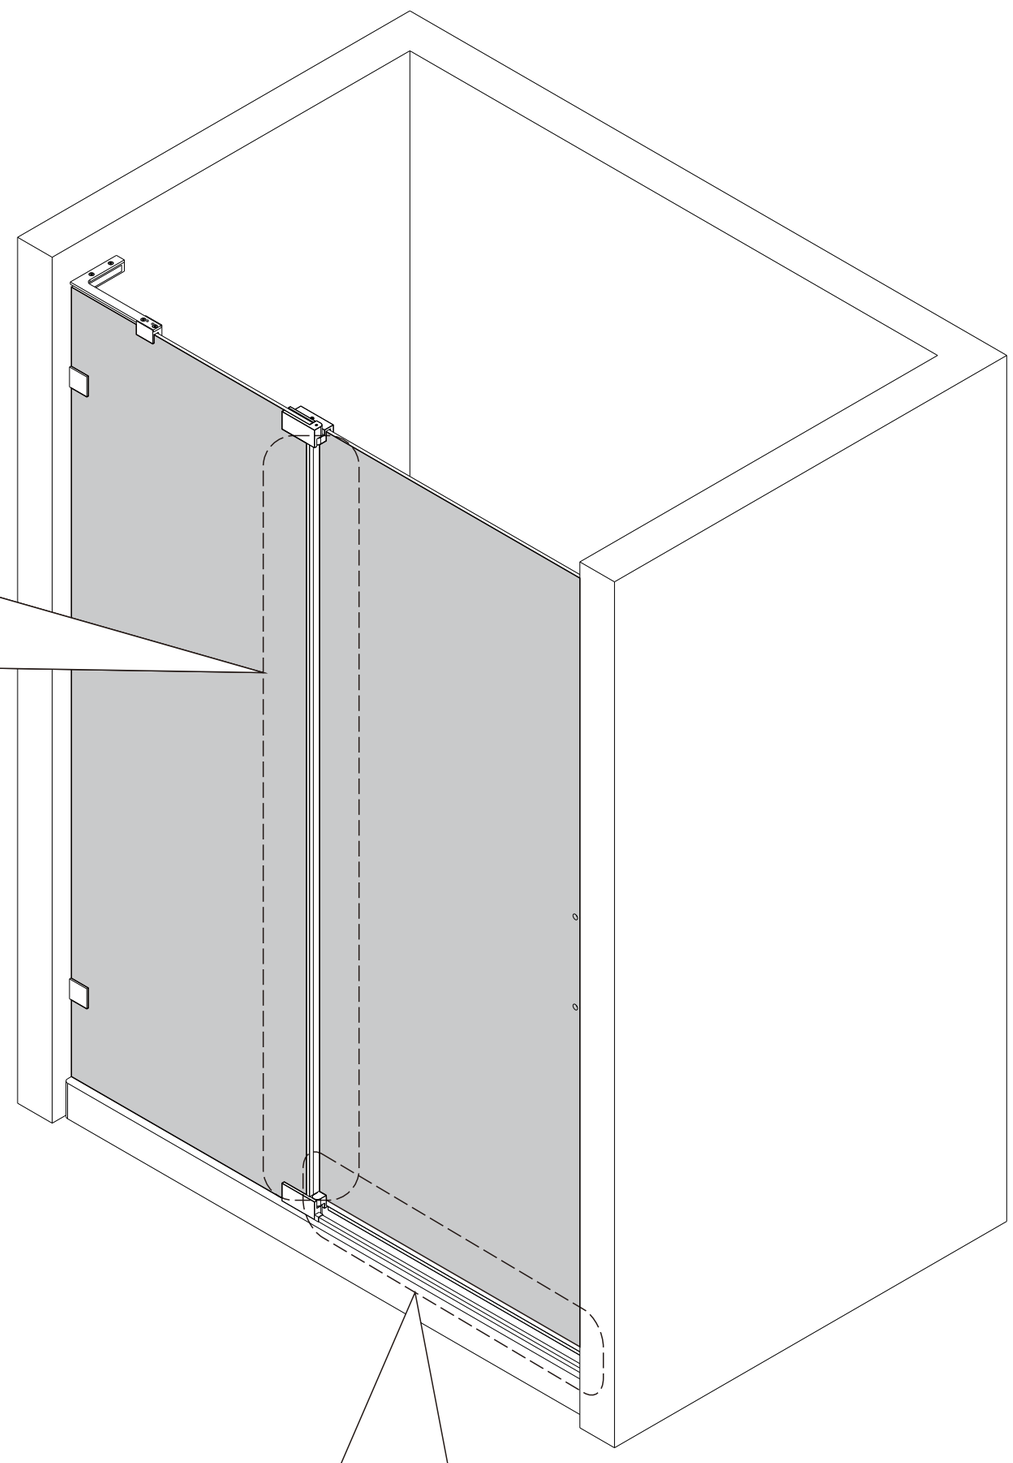

Fig.d

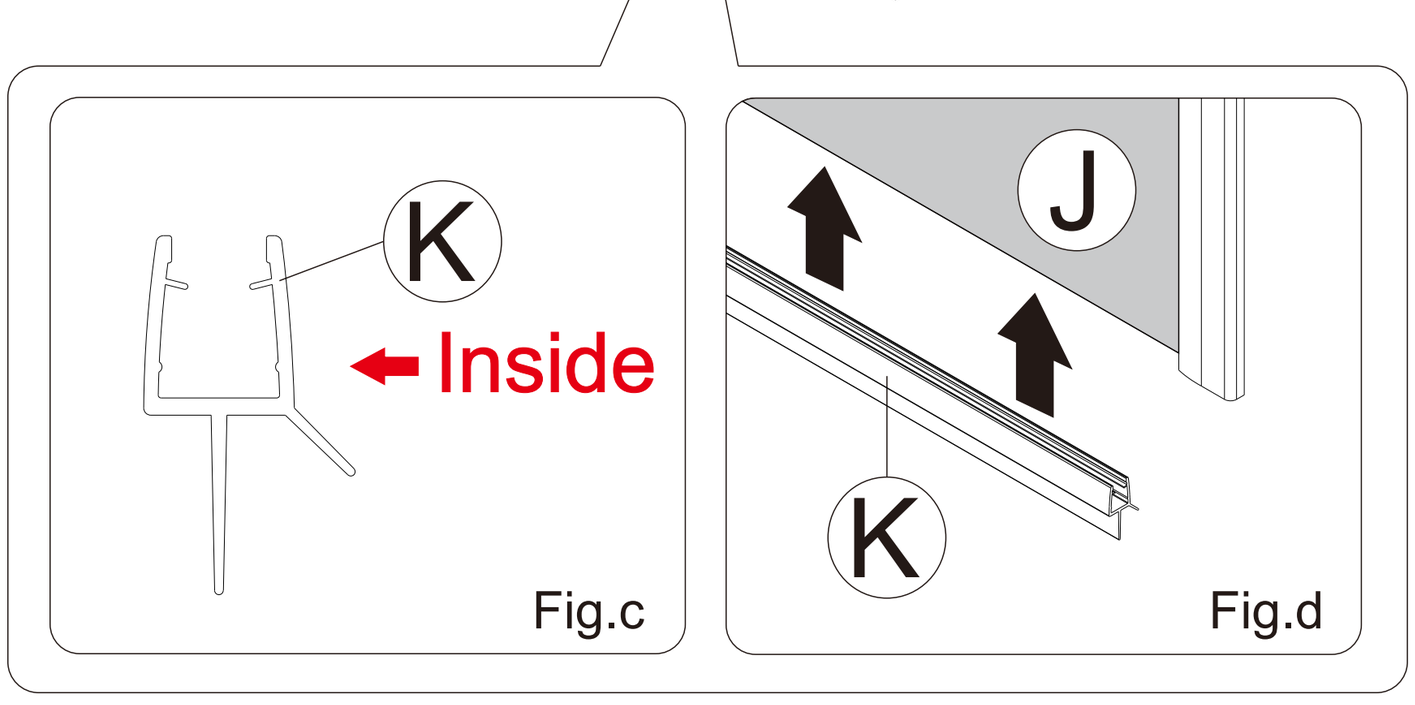

14 Install the **Anti-Water Strip(D)** and **Bottom Anti-Water Strip(K)**

NOTE

1.Install the **Anti-Water Strip(D)** on the **Stationary Glass(C)** as Fig.a and Fig.b .
2.Install the **Bottom Anti-Water Strip(K)** on the **Glass Door(J)** as Fig.c and Fig.d .

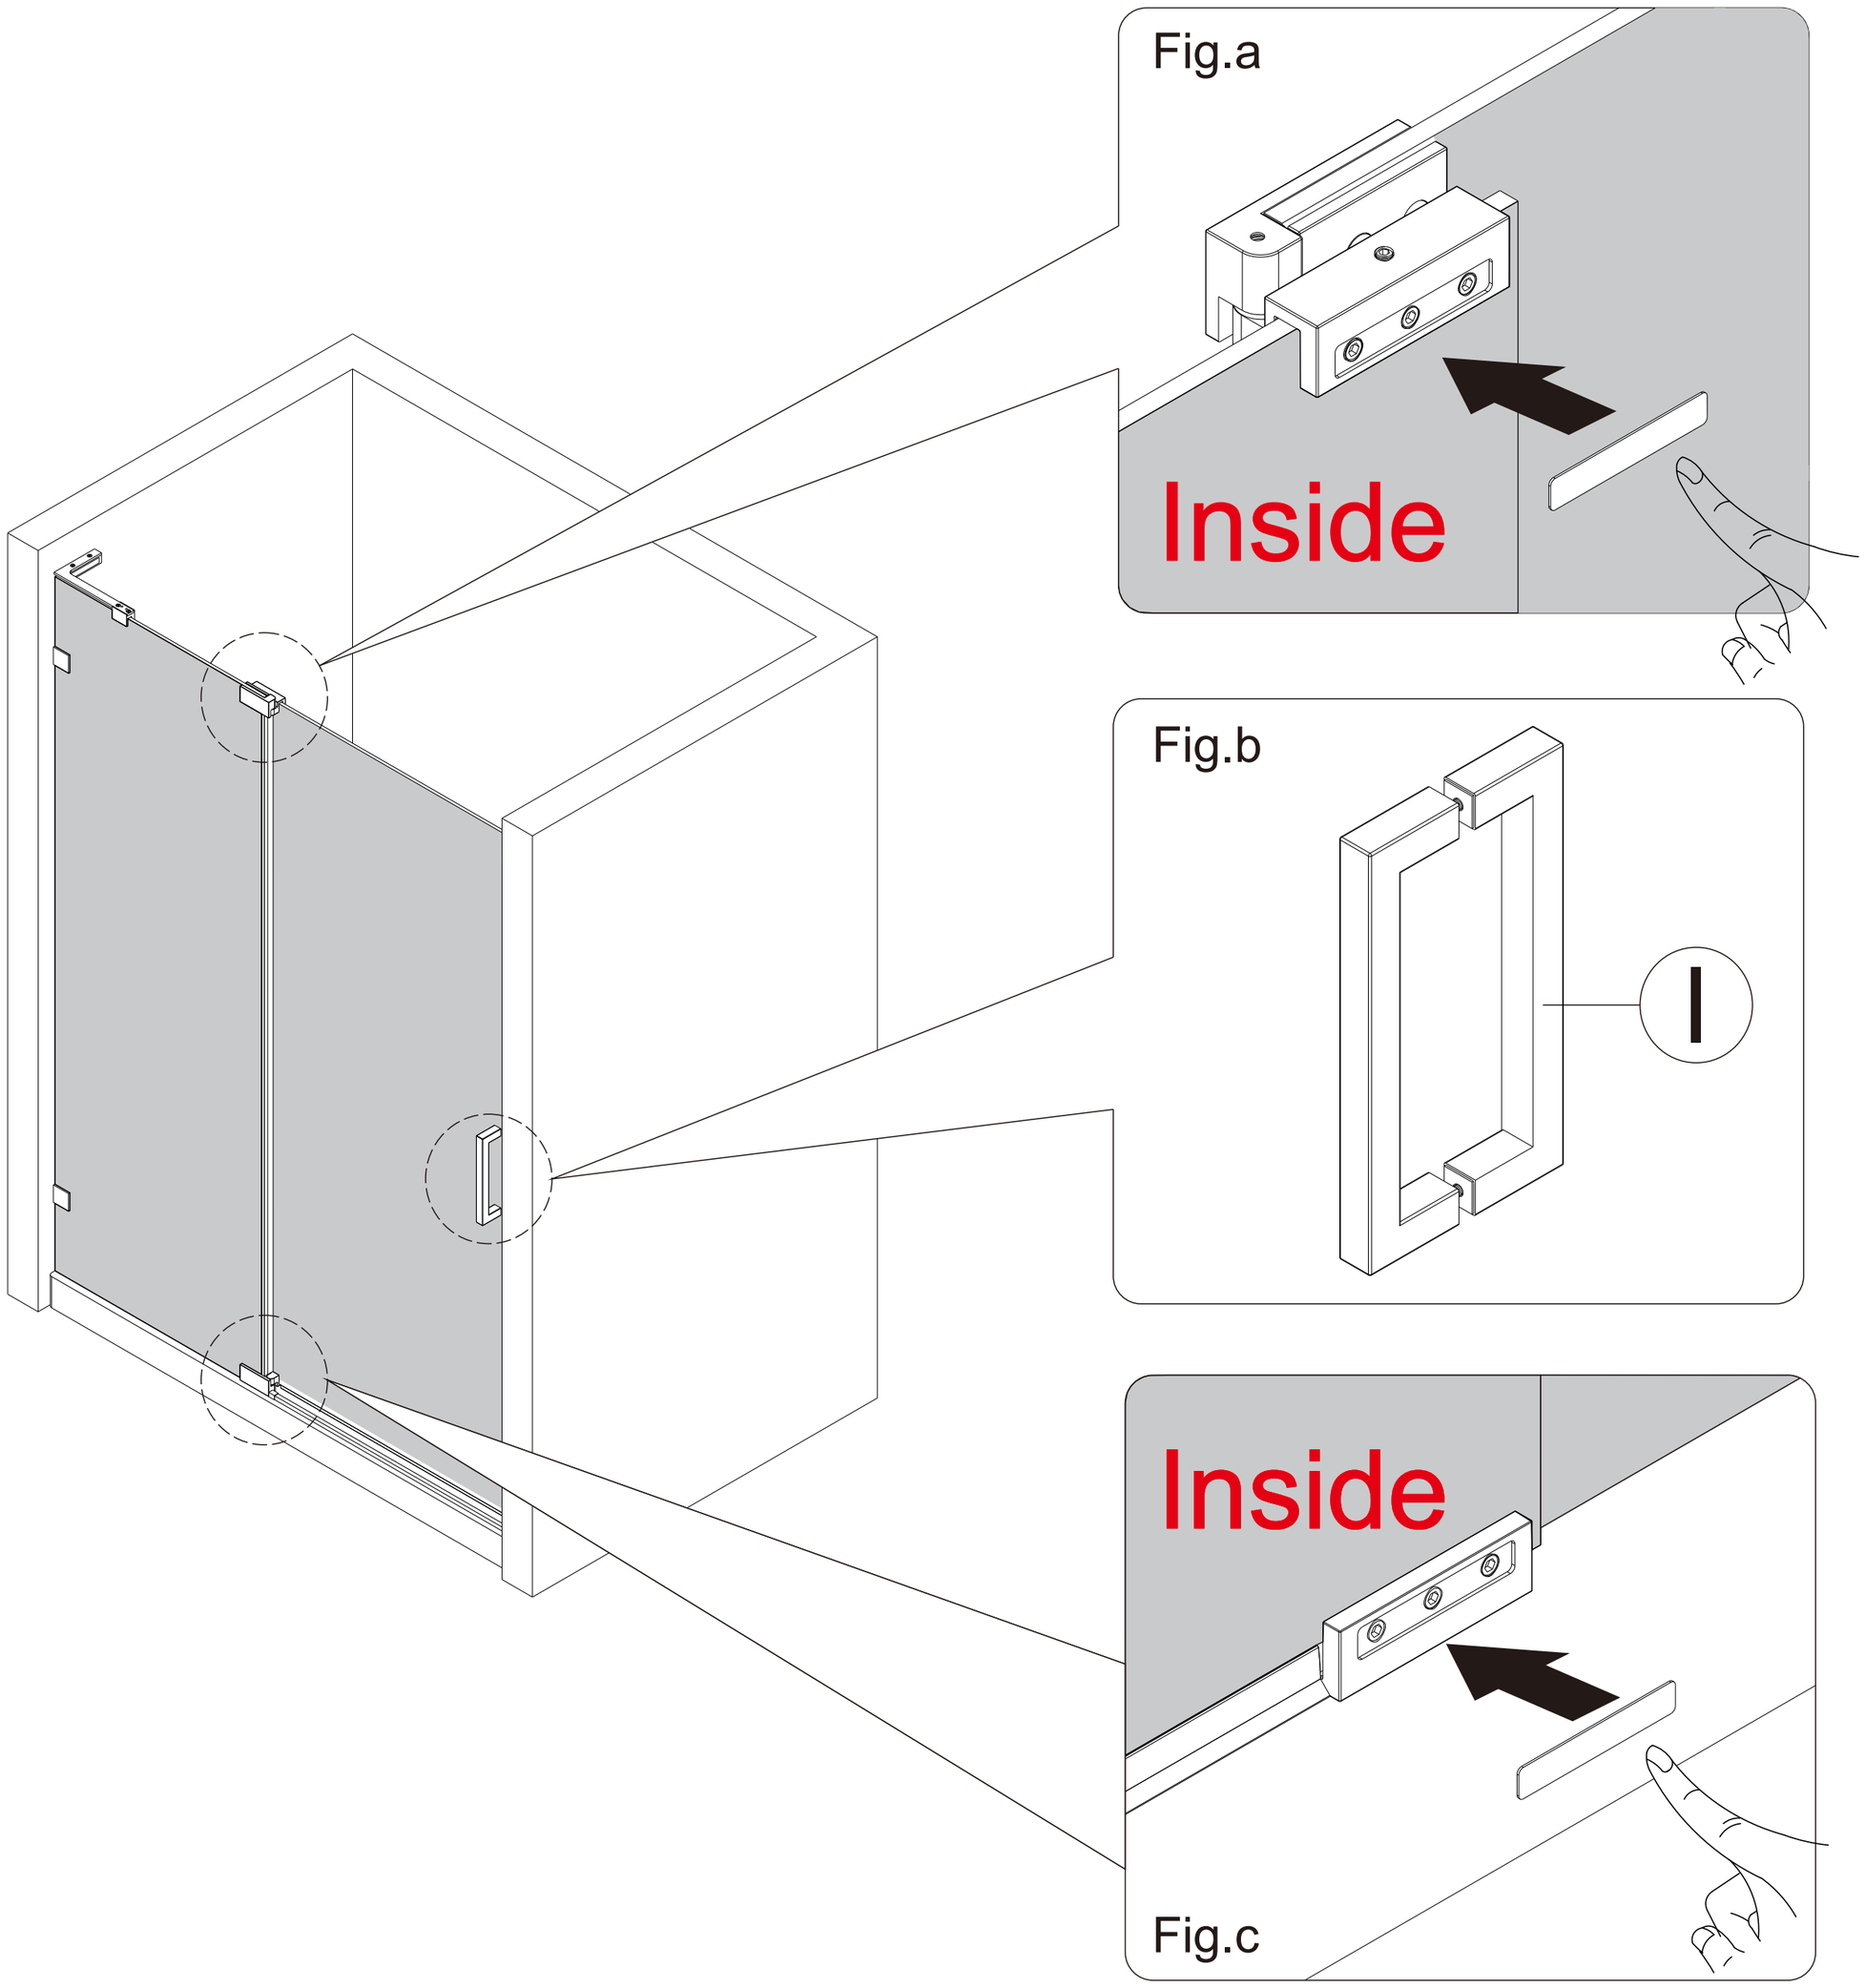

15 Install the **Handle(I)** and the **Pivot Sleeve(E&F)** cover

NOTE

1.Install **Pivot Sleeve(E&F)** Cover as Fig.a and Fig.c .
2.Install the **Handle(I)** on the **Glass Door(C)** as Fig.b .

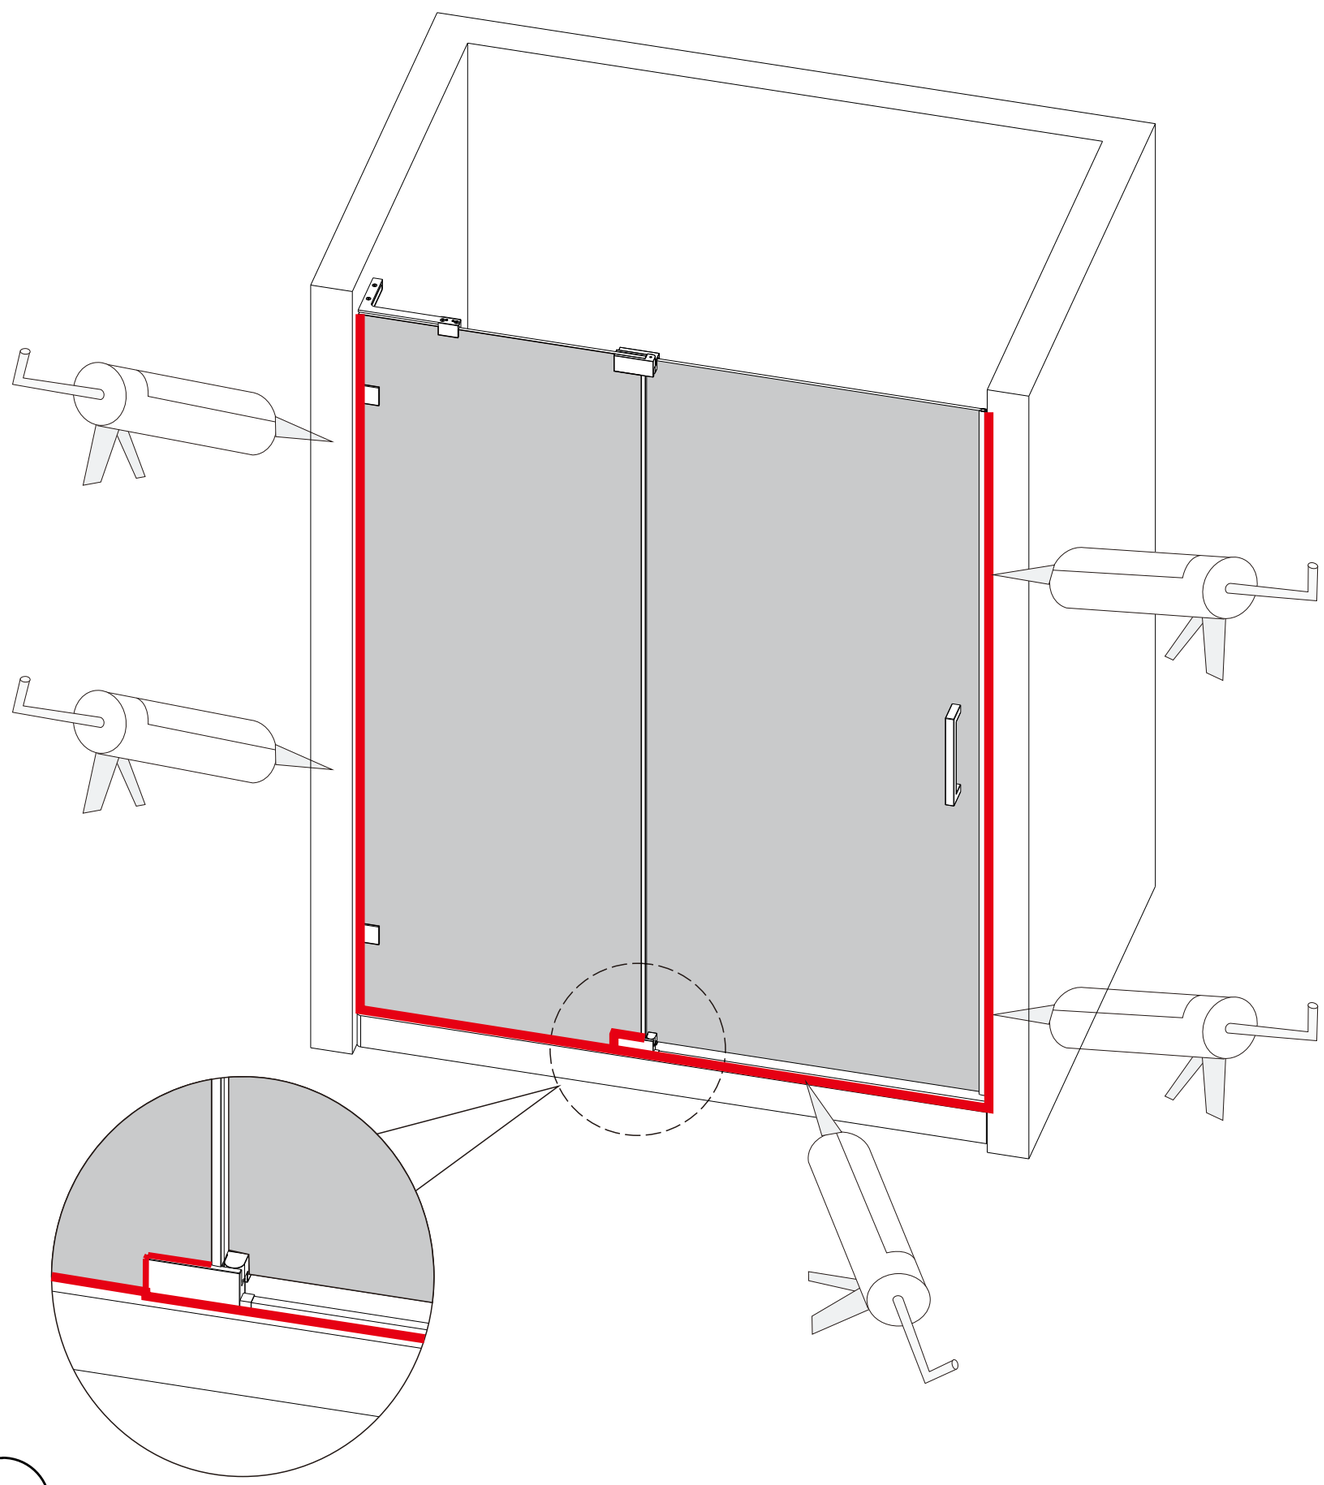

16 SEALING

NOTE The surfaces need to be clean and free of debris before applying silicone.

NOTE Make sure that the Shower door closes tightly and opens smoothly. Apply a good quality silicone sealant along the **Wall Jamb(G)** and **Threshold(M)**.

! Allow 24 hours for the silicone to cure before using the shower.

! Apply Silicone Sealant,(not supplied).

! The shower room needs to be sealed inside and out

17 SEALING

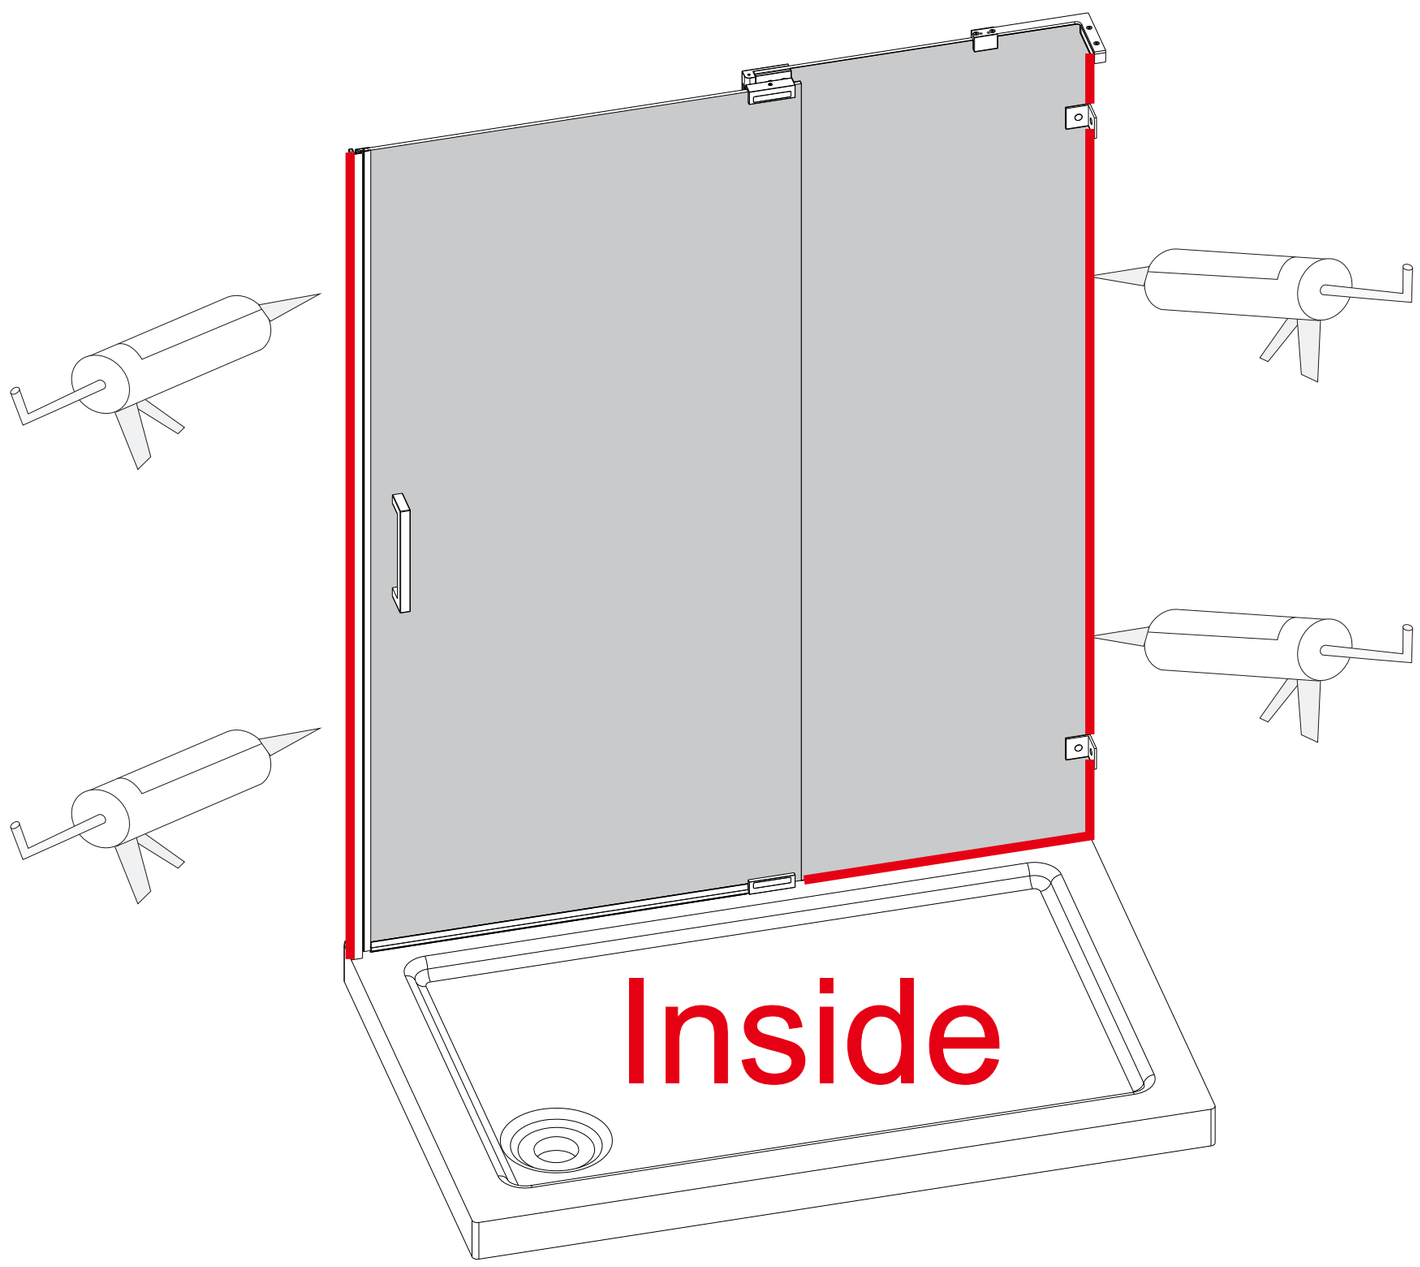

NOTE

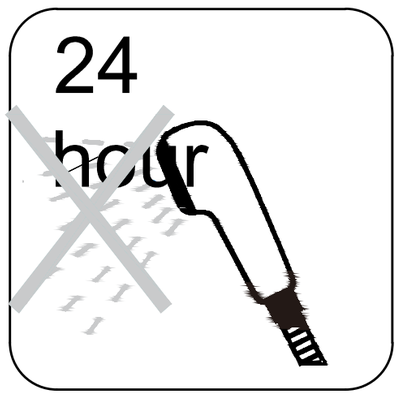

The surfaces need to be clean and free of debris before applying silicone.

NOTE

Make sure that the Shower door closes tightly and opens smoothly.
Apply a good quality silicone sealant along the **Wall Jamb(G)** and **Threshold(M)**.

Allow 24 hours for the silicone to cure before using the shower.

! Apply Silicone Sealant,(not supplied).

The shower room needs to be sealed inside and out
